Bridgeville.—Extended mechanical haulage 3,500 feet. Removed main electric power line from main entry and placed it on the surface.

Brier Hill.—Completed new air shaft, 11 feet 4 inches by 14 feet by 140 feet deep, at face of workings, also ventilating plant, gob hoist, and tippie for disposing of refuse material.

Jumbo.—Tippie remodeled and equipped with a cross-over dump and a chain haul for handling the mine cars. A thirteen-ton electric locomotive installed for gathering the coal from the butt entries to the rope haul. Three chain mining machines added to the coal cutting equipment.

Margerum.—Extended mechanical haulage 3,675 feet.

Partridge.—Extended mechanical haulage 1,800 feet; double-tracked 1,400 feet of motor road; also installed a boiler feed water plant.

Ridgway.—Extended mechanical haulage 1,800 feet.

Shaw.—Built a new barn; placed an additional dump on the tippie.

The mines of this company have all been improved considerably by building 730 brick stoppings to the face of the workings.

## PITTSBURG AND EASTERN COAL COMPANY

Nos. 2 and 3 Mines.—Installed a picking table at each mine to remove the impurities from the coal.

## CARNEGIE COAL COMPANY

Primrose.—Built 145 brick stoppings, 3 overcasts and a new stable.

## VERNER COAL AND COKE COMPANY

Verner.—Installed a boiler feed water softening plant, two gathering locomotives, and added two chain-cutting machines to the coal cutting equipment.

## BULGER BLOCK COAL COMPANY

Bulger.—Built a carpenter shop 20 x 40 feet; installed a boiler feed water purifying plant.

## HUGH McHUGH

Cherry.—Built a new ventilating furnace.

## PRYOR COAL COMPANY

Avella No. 1.—Built a brick and steel overcast.

## HORMEL COAL COMPANY

Federal No. 2.—Installed a new seven-foot Stine fan, driven by an electric motor.

## J. H. SANFORD COAL COMPANY

Armide.—Installed an electrically driven Stine fan, eight feet in diameter.

## Prosecutions for Violations of the Mining Laws

On August 23, information was made against Herman Antonis, a miner employed in the National No. 1 mine of the National Mining Company, for removing a danger signal. He pleaded guilty before the Grand Jury and was sentenced to serve thirty days in jail and to pay the costs of the prosecution.

## Mine Foremen's Examinations

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the Carnegie Free Library Building, Carnegie, April 6, 7, 8 and 9.

The Board of Examiners was composed of John I. Pratt, Inspector, Daniel Boden, Superintendent, and James Blick, Mine Foreman.

There were ninety-nine applicants examined, twenty-three for certificates as Mine Foremen and seventy-six for certificates as Fire Bosses. The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

## First Grade

Frank M. Fritchman and William Lawlor, Jr.

## ***EIGHTH DISTRICT***

---

Clearfield, Centre, Tioga, Lycoming, Bradford and Clinton Counties

---

Philipsburg, Pa., February 21, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I have the honor to transmit herewith to the Department my annual report in compliance with the mining law, for the year ending December 31, 1909.

The report contains the usual statistical tables, a description of the fatal and non-fatal accidents and other necessary data.

There has been a slight increase in production, also a large increase in the number of accidents over former years. The mines in general have been kept in reasonably good condition, several companies having replaced furnaces with fans.

Respectfully submitted,

JOSEPH KNAPPER,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 111       |
| Number of mines in operation, .....                                   | 105       |
| Number of tons of coal shipped to market, .....                       | 3,787,548 |
| Number of tons used at mines for steam and heat, .....                | 66,888    |
| Number of tons sold to local trade and used by employes, ..           | 69,332    |
| Number of tons used in the manufacture of coke, .....                 | 300       |
| Number of tons of coal produced, .....                                | 3,924,068 |
| Number of tons of coke produced, .....                                | 200       |
| Number of coke ovens, .....                                           | 106       |
| Number of coke ovens in operation, .....                              | 4         |
| Number of tons of coal produced by pick mining, .....                 | 2,931,776 |
| Number of tons produced by compressed air machines, ..                | 797,711   |
| Number of tons produced by electrical machines, .....                 | 194,581   |
| Number of persons employed inside of mines, .....                     | 6,487     |
| Number of persons employed outside, including coke<br>workers, .....  | 650       |
| Number of persons employed at manufacture of coke, ..                 | —         |
| Number of fatal accidents inside of mines, .....                      | 6         |
| Number of fatal accidents outside, .....                              | —         |
| Number of non-fatal accidents inside of mines, .....                  | 24        |
| Number of non-fatal accidents outside, .....                          | —         |
| Number of tons of coal produced per fatal accident inside, ..         | 654,011   |
| Number of persons employed per fatal accident inside, ..              | 1,081     |
| Number of persons employed per fatal accident outside, ..             | —         |
| Number of persons employed per non-fatal accident inside, ..          | 270       |
| Number of persons employed per non-fatal accident out-<br>side, ..... | —         |
| Number of wives made widows, .....                                    | 5         |
| Number of children made orphans, .....                                | 8         |
| Number of steam locomotives used inside of mines, .....               | 2         |
| Number of steam locomotives used outside, .....                       | 5         |
| Number of compressed air locomotives used inside, .....               | —         |
| Number of compressed air locomotives used outside, ....               | —         |
| Number of electric motors used inside, .....                          | 44        |
| Number of electric motors used outside, .....                         | —         |
| Number of fans in use, .....                                          | 30        |
| Number of furnaces in use, .....                                      | 62        |
| Number of gaseous mines in operation, .....                           | —         |
| Number of non-gaseous mines in operation, .....                       | 105       |
| Number of new mines opened, .....                                     | 3         |
| Number of old mines abandoned, .....                                  | —         |

Table A  
PRODUCTION OF COAL

| Names of Operators                                                    | Tons    |
|-----------------------------------------------------------------------|---------|
| Morrisdale Coal Company, .....                                        | 491,868 |

| Mar. 18          | Charles E. Husted | American    | Mine foreman     | 57  | M. | 1     | 2                 | 2                | 2                 | Red Jacket        | Clearfield | Fatally injured by fall of slate while preparing working-place for a miner where roof was extremely dangerous.                                         |
| Sept. 17         | Carl Nelson       | Swedish     | Machine scraper. | 22  | S. | ..... | .....             | .....            | .....             | Winburne No. 45,  | Clearfield | Killed by electric shock. He had one hand resting on machine scraper when his neck came in contact with a live wire connected with the main feed wire. |
| Dec. 1           | Samuel Robbins    | English     | Miner            | 61  | M. | 1     | .....             | .....            | .....             | Chester           | Centre     | Killed by fall of coal in heading pillar work.                                                                                                         |
| 7                | Robert Burton     | English     | Miner            | 54  | M. | 1     | 2                 | 2                | 2                 | Electric          | Centre     | Fatally crushed in the mine at foot of plane by runaway mine car.                                                                                      |
| 29               | Herbert Emms      | English     | Driver           | 32  | M. | 1     | 2                 | 2                | 2                 | Jones             | Tioga      |                                                                                                                                                        |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person         | Nationality    | Occupation         | Age | Married or single | Name of Mine            | County            | Nature and Cause of Accident in Brief                                                |
|------------------|------------------------|----------------|--------------------|-----|-------------------|-------------------------|-------------------|--------------------------------------------------------------------------------------|
| Jan. 5           | Benjamin Sneal, -----  | American, --   | Miner, -----       | 22  | S.                | Morrisdale No. 3, --    | Clearfield, ----- | Leg fractured between loaded mine cars while going out of the mine.                  |
| Feb. 3           | Andy Fedor, -----      | Slavonian, --  | Miner, -----       | 35  | M.                | Ogle No. 1, -----       | Clearfield, ----- | Nose and foot broken by fall of roof slate in his working place.                     |
| 4                | Robert Vox, -----      | English, ----- | Miner, -----       | 36  | M.                | Jefferson No. 1, -----  | Clearfield, ----- | Leg fractured between side of heading and trip of empty mine cars.                   |
| Mar. 2           | Crawford Lindsay, ---  | Scotch, -----  | Miner, -----       | 23  | M.                | Morrisdale No. 1, --    | Clearfield, ----- | Body squeezed under a fall of roof slate at face of working place.                   |
| 6                | M. B. Crain, -----     | American, --   | Machine runner, -- | 26  | M.                | Moshannon No. 10, ----- | Centre, -----     | Heel and leg severely bruised by mining machine in the mine while removing it.       |
| 15               | Jespe Desire, -----    | Belgian, ----- | Miner, -----       | 33  | M.                | Hartley, -----          | Clearfield, ----- | Collar bone fractured by fall of coal in his working place.                          |
| 18               | William Patrick, ----- | English, ----- | Miner, -----       | 50  | M.                | Moshannon No. 10, ----- | Centre, -----     | Several ribs fractured by empty cars.                                                |
| 18               | Howard Fleck, -----    | American, --   | Driver, -----      | 23  | M.                | Hartley, -----          | Clearfield, ----- | Leg and body squeezed by mine cars at his working place on main slope.               |
| April 26         | John Andrash, -----    | Slavonian, --  | Miner, -----       | 49  | M.                | Ogle No. 1, -----       | Clearfield, ----- | Spine seriously injured by fall of bone coal at face of room.                        |
| 27               | Jay Bowersock, -----   | American, --   | Miner, -----       | 18  | S.                | Winburne No. 45, --     | Clearfield, ----- | Arm fractured between mine car and road prop.                                        |
| 30               | Caesaer Domonle, ---   | French, -----  | Miner, -----       | 34  | M.                | Morrisdale No. 1, --    | Clearfield, ----- | Back seriously injured by a fall of coal at working face.                            |
| June 23          | Emil Caoskie, -----    | German, ---    | Miner, -----       | 58  | M.                | Winburne No. 45, --     | Clearfield, ----- | Burned by powder while filling a cart-ridge in his working place.                    |
| 25               | John Beeley, -----     | Slavonian, --  | Miner, -----       | 24  | S.                | Sugar Camp No. 9, ----- | Centre, -----     | Collar bone fractured and head lacerated by a fall of coal at face of working place. |
| July 31          | Harry Snall, -----     | English, ----- | Miner, -----       | 40  | M.                | Gulton, -----           | Clearfield, ----- | Foot smashed by fall of slate at face of working place.                              |
| Aug. 11          | Alf Larson, -----      | Swedish, --    | Miner, -----       | 54  | M.                | Arnot No. 5, -----      | Tioga, -----      | Hips crushed by fall of top coal at working face.                                    |
| Sept. 13         | Jacob Maszer, -----    | Polish, -----  | Miner, -----       | 38  | M.                | Sugar Camp No. 9, ----- | Centre, -----     | Both legs fractured by fall of roof slate at face of working place.                  |

## CONDITION OF MINES

## MORRISDALE COAL COMPANY

Morrisdale No. 1.—There are good stoppings on main roadways, but on some headings canvas is used for doors, and, as it is constantly being destroyed by mine cars, the section is somewhat affected. The main trouble, however, has been shortage of water for the boilers, resulting in insufficient air at the fan. Additional boilers are now being installed to remedy this defect. Drainage is defective in places, but water seems to be a safeguard against the excessive floating dust from the mining machines.

Morrisdale No. 2.—Ventilation and drainage in very fair condition. Several miners who were caught using impure oils were proceeded against according to law.

Morrisdale No. 3.—Ventilation very well conducted, but the total volume of air entering the mine was not sufficient, owing to the shortage of water for the boilers. Drainage fair.

## MORRIS RUN COAL MINING COMPANY

Jones.—Ventilation and drainage in good condition. A new Stine fan, twelve feet by five feet, has been installed.

Lake.—The furnace has not sufficient power to ventilate this mine properly, but they are making a drift to the surface near the working faces to reduce the friction and increase the volume of air. Drainage is fair.

## CLEARFIELD BITUMINOUS COAL CORPORATION

Grassflat Nos. 9, 10 and 11.—Ventilation and drainage fair.

Knox Run.—Ventilation and drainage fair. Shelter holes on animal haulage way needed whitewashing, which I requested to be done.

Pleasant Hill.—Ventilation in the north heading not sufficient. I ordered it to be increased. Other places in good condition. Drainage good.

## PEALE-PEACOCK AND KERR, INCORPORATED

Ogle No. 1.—Ventilation and drainage in very fair condition. I requested that the roadways be cleared of refuse to allow more space for the men to pass the cars.

Ogle No. 6.—This mine worked only a few days in December and was not inspected.

Ogle No. 9.—Ventilation weak at faces of one and two left headings; other places in good condition. The management promised that the headings would be put in proper condition. Drainage good.

Decatur No. 1.—Does not come under the law as only a few men are employed.

Decatur No. 3.—Does not come under the law at the present time.

Decatur No. 4.—This mine is rapidly becoming exhausted and will soon be abandoned as far as inspections are concerned. Ventilation and drainage in fair condition.

Decatur Nos. 7 and 8.—Fairly well ventilated at time of last inspection. They were naturally too dry, and I called the attention of the officials to the matter.

## BLOSSBURG COAL COMPANY

Arnot No. 1.—Ventilation was not sufficient, and part of the force was put off until a shaft 5 x 6 x 60 feet deep could be made near the working faces to increase the volume of air. This, I am informed, has been done since my visit. Drainage in good condition.

Arnot No. 2.—Ventilation was defective in the first left heading, and the mine was stopped until the volume could be increased, which has since been done. Drainage in good condition. Shelter holes were not completed.

Arnot Nos. 3 and 5.—One mine. Ventilation in fair condition. A complaint was made that the fan was shut down as soon as the mine day's work was over, but I learned this was only for a short time on account of scarcity of water. Drainage fair only in center drift.

Arnot No. 7.—Ventilation in fair condition if the furnace is kept going constantly. Drainage in fair condition.

Arnot No. 8.—A new opening. They have been driving to reach a thicker coal seam. In good condition.

Bear Run.—Ventilation and drainage in very fair condition.

## CLARENCE COAL COMPANY

Sugar Camp No. 9.—It requires constant attention to the furnace to get the required volume of air, which is rather defective in summer months. Drainage in fair condition. Canvas doors were ordered kept up to conduct ventilation up the rooms.

Sugar Camp No. 10.—Ventilation in fair condition. Drainage good. Broken roof needs constant attention from the foreman.

Sugar Camp No. 12.—This is a mine of holes, opened along the crop line, and they have to depend on natural ventilation at all times. In fair condition. Drainage needed to be improved.

Sugar Camp No. 13.—Ventilation in fair condition where rooms were not turned in violation of the mining laws. I gave minute instructions about this for the future. Drainage fair.

Sugar Camp No. 14.—Ventilation and drainage in good condition.

## MOSHANNON COAL MINING COMPANY

Electric.—Ventilation during part of the year was not as required by law, but upon complaint it was improved. Drainage in very fair condition.

Moshannon No. 8.—Did not come under the law, as less than ten persons were employed.

Moshannon No. 10.—This mine is becoming very extensive. The mining machines produce considerable dust, so I have advised and recommended the use of safety explosives for blasting. Ventilation and drainage in fair condition.

Centre.—A small operation; not visited.

## PENNSYLVANIA COAL AND COKE COMPANY

(T. H. Watkins, Receiver)

Winburne No. 45.—Ventilation and drainage in good condition. I requested more trappers for doors, and also safety explosives for blasting.

Winburne No. 46.—This mine was not operated very regularly during the year. In good condition.

Winburne No. 47.—On my visit in October the mine had not been thoroughly cleaned up after a long period of idleness, otherwise it was in good condition.

#### IRISH BROTHERS COAL COMPANY

Colorado No. 5.—There was not sufficient air conducted to face of headings, but there was ample volume at the fan. I requested that this be remedied. Drainage in good condition.

Cuba Nos. 1 and 2.—Not under the law.

Gearhart.—One right heading and also right drift were not properly ventilated on my last visit. Carbon dioxide was very noticeable. I ordered that the ventilation be improved. Drainage in good condition.

Jefferson No. 1.—I ordered seventh right heading stopped on account of ventilation during the month of May, as the furnace ventilation was not effective, but recent inspections show that this condition has been improved. Drainage good.

Jefferson No. 2.—This mine was reported as working more than nine men, but on inspection I found it was not. Ventilation in fair condition.

Red Jacket.—Ventilation and drainage kept in good condition. The foreman met with a fatal accident in the performance of his duty, the roof of this mine being the worst in the State.

#### KELLEY BROTHERS COAL COMPANY

Cherry Run No. 2.—A new fan has been installed for ventilation and it has shown the leakage with higher pressure ventilation, but this will be remedied and put in good condition. Drainage very fair.

Snow Shoe No. 5.—Ventilation and drainage in fair condition. I requested manway to be cleaned.

Snow Shoe No. 9.—This mine is composed of five drifts along a crop line where no permanent ventilation could be maintained, but mine was kept in fair condition.

Tunnell Nos. 1 and 2.—In fair condition as to ventilation and drainage.

#### CARBON COAL AND MINING COMPANY

Bloomington J. No. 12.—Ventilation good. Drainage in wet seasons is defective, owing to numerous crop line holes where water comes in in volumes.

#### VICTORIA COAL MINING COMPANY

Acme No. 2.—Ventilation has been kept in good condition for extent of territory, but as they have acquired new properties it is now necessary to put up more permanent brattices. Drainage in fair condition, except in Hawk Run headings.

Acme No. 5.—Did not come under the law, as less than ten persons were employed.

Acme No. 6.—Ventilation and drainage in good condition. I requested that the passageway between No. 6 and No. 2 mine be cleaned up.

## GHEM COAL COMPANY

Ghem.—Ventilation and drainage in good condition.

## MONARCH COAL COMPANY

Leader No. 3.—The ventilation was not up to the required standard, owing to excessive use of canvas for main doors, which I ordered removed. The furnace was along the crop line where a high motive column was impossible, and in consequence had to be moved nearer the working faces constantly to maintain proper ventilation. Drainage good.

Leader No. 4.—A shaft mine. During the year they added a small seven-foot Stine fan for ventilation, and, while it is ample for the present, it will soon be inadequate. Drainage in very fair condition.

## ASHMAN COAL COMPANY

Ghem No. 1.—Ventilation and drainage in fair condition, but require further improvement.

Ashman No. 1.—This mine employed only a few men in two drifts, with separate tipples, and did not come under the law.

Ashman No. 3.—Ventilation and drainage in very fair condition.

## ATHERTON-BARNES COMPANY

Bloomington S. No. 14.—Ventilation, drainage and general condition good. I made information against several miners for neglecting to spray their coal properly.

## THOMAS J. LEE

Chester.—Ventilation and drainage in fair condition.

Davis.—This mine was not operated steadily during the year. Ventilation and drainage in good condition.

## FALL BROOK COAL COMPANY

Anna S.—Idle most of the year owing to differences between the miners and operators. Ventilation in fair condition on my last visit. Roadways rather defective in drainage.

Antrim Nos. 1 and 2.—Indefinitely shut down.

## GUION COAL COMPANY

Guion.—Ventilation ample at the fan, but not sufficient at face of workings. Drainage in fair condition.

## BLAIR BROTHERS COAL COMPANY

Orient Nos. 4 and 5.—A new drift has been added on another seam. Ventilation and drainage in good condition.

## DUNBAR COAL MINING COMPANY

Fairmont No. 1.—Ventilation and drainage in good condition.

Fairmont No. 2.—Part of the year the ventilation was not in good condition, but it is now very fair. Drainage good.

## RED RUN COAL COMPANY

Red Run.—Ventilation and drainage in good condition.

## THOMAS F. KELLEY

Cato.—Ventilation and drainage in good condition.

## R. H. MULL

Imperial No. 1.—Ventilation and drainage in good condition.

## GOLDEN BROTHERS

Coal Run.—Ventilation insufficient on my last visit. They are dependent on natural ventilation through old workings of Morris Run mines, which is not always sufficient. I have requested that a more permanent ventilator be installed. Drainage good.

## J. E. HORN AND COMPANY

Ophir No. 9.—Ventilation and drainage in good condition, except that several rooms were turned ahead of ventilation on my last visit.

## COALDALE MINING COMPANY

Coaldale No. 12.—Ventilation and drainage in good condition. There was a scarcity of supplies on one visit, to which I called the officials' attention and the matter was remedied.

## W. SCOTT AND THOMAS JENKINS

Jenkins Brothers.—Ventilation and drainage were in very fair condition. Manway has been changed during the year, but was not completed on my last visit.

## JASON COAL COMPANY

(J. Swires, Receiver)

Hillside.—Ventilation in fair condition. Drainage good.

## RED BANK COAL COMPANY

Bloomington S. No. 7.—Ventilation and drainage in good condition. A seven-foot Stine fan has been added to the equipment to replace furnace.

## J. F. AND W. F. O'DONNOLL

O'Donnoll Brothers Nos. 1 and 2.—Ventilation in fair condition. Drainage at times not good.

## GRAHAM COAL COMPANY, INCORPORATED

Hartley.—Ventilation at faces of headings insufficient. Drainage defective in places. I requested that the leakage be stopped on main stoppings, also that the roads be drained, and the uninsulated wires for mining be protected.

## PEALE AND HOOTEN

Ogle No. 8.—Ventilation and drainage in fair condition.

## C. H. MILSOM

Powelton No. 1.—Ventilation is natural and in fair condition. Drainage good.

Powelton No. 2.—A new operation. The furnace was not completed on my last visit, but the cold weather gave ample ventilation for men employed. Drainage was not in good condition. Manway was not completed.

POTTER-BIGLER AND POTTER

Horse Shoe.—Ventilation and drainage in good condition.

W. F. HOLT

Phoenix.—Ventilation and drainage are in good condition.

ATHERTON AND BARNES

Troy.—Ventilation at face of left heading was insufficient and I requested that it be improved. In other parts of the mine it was good. Drainage in dry season is good; at other times it is not.

JAMES F. STOTT

Red Jacket No. 1.—Ventilation is natural and in good condition. Drainage good.

Red Jacket No. 2.—Did not come under the law, as less than ten men were employed.

HAYES RUN FIREBRICK COMPANY

Hayes Run.—Ventilation and drainage in fair condition.

F. J. DUNHAM AND COMPANY

Royal No. 2.—A new operation. Ventilation fair; drainage good. In warm weather the ventilation may not be sufficient.

DECATUR COAL MINING COMPANY

Beacon.—Ventilation and drainage good.

NOWAK COAL COMPANY

Jenkins.—Ventilation was not sufficient at face of workings. Drainage good. Did not come under the law the entire year.

LONG VALLEY COAL COMPANY

Barclay.—They were working ten men on my last visit, but had no mine foreman, and reduced their force rather than employ one. Ventilation in fair condition. Drainage rather defective.

Long Valley.—This mine came under the law only a short time, during which time no inspections were made. It is now partly idle.

BURGESS-ENGLAND COAL COMPANY

Mitchell.—Ventilation and drainage in good condition. This mine is busy only in winter season.

ANDREW G. SPEARS

(F. G. Smith, Trustee)

Myers Run.—Ventilation and drainage in good condition.

## DERBY BRANCH COAL COMPANY

Colorado Nos. 1 and 2.—These mines formerly belong to Irish Brothers. They did not employ over nine men, hence did not come under the law.

## CENTRE COAL AND COKE COMPANY

Union No. 3.—Ventilation and drainage in fair condition.

## MATT SHADDOCK

Mosquito Creek.—Ventilation and drainage in fair condition.

## JOHN HILL, SR.

Decatur No. 2.—This mine employed less than ten men and did not come under the law.

## HENRY MILLER

Coal Run No. 1.—Ventilation fair. Did not come under the law.

## HEATH BROTHERS

Reese.—Ventilation and drainage in fair condition.

## SCOOTAC MINING COMPANY

Scootac.—Did not come under the law, but it was kept in fair condition.

## A. J. LUNDQUIST AND COMPANY

Delmar.—Ventilation and drainage in good condition.

## M. J. KELLEY AND COMPANY

Kelley No. 1.—Did not come under the law, but was in fair condition.

## HARRY BARNES AND COMPANY

Tin Top.—Ventilation in very fair condition, but drainage defective. The mine was inspected only once, as it worked very little during the year.

## LANE COAL COMPANY

Lane No. 5.—A new operation. Well drained and ventilated.

## CENTRE STEAM COAL COMPANY

Taylor No. 1.—Did not come under the law. Ventilation and drainage in fair condition.

## GEORGE BOWER

Bower.—This mine did not come under the law. There are over ten employes reported, but most of them are officials.

## JOHN BARNES AND SONS

Lancashire No. 2.—Ventilation in fair condition. Drainage natural and good in dry weather.

## SMITH AND GLEASON

Mt. Carmel.—Ventilation was good in one drift, but in others was not up to the standard. Drainage was not fully restored, the mine having been idle for a considerable time.

## MT. VERNON COAL MINING COMPANY

Pauline.—This mine has been idle for some time. No inspection made since work was resumed.

## CATARACT COAL COMPANY

Cataract.—Idle.

## ELLSWORTH-DUNHAM COAL COMPANY

Royal No. 1.—Idle.

## PARKER COAL COMPANY

Parker.—Idle.

## TIOGA COAL COMPANY

Ratler.—Idle.

## HARLEIGH COAL COMPANY

Harleigh.—A new slope mine not yet completed.

## ISAAC STAGE

Karthus.—Idle.

## Improvements

## MORRISDALE COAL COMPANY

Morrisdale Nos. 1, 2 and 3.—Concrete stoppings have been put in on all main haulage roads.

## MORRIS RUN COAL MINING COMPANY

Jones.—A new Stine fan, 12 x 5 feet, run by electricity, has been added to the equipment.

Lake.—A new drift, 6 x 7 feet, through sand rock for 300 feet and slate 85 feet, has been opened near the face of workings for ventilation and traveling way.

## CLEARFIELD BITUMINOUS COAL CORPORATION

Knox Run.—Tail rope haulage has been installed on main heading, instead of mules, with additional boiler power for ventilation and haulage.

## PEALE-PEACOCK AND KERR, INCORPORATED

Ogle No. 1.—An air shaft, 5 x 6 feet and 40 feet deep, has been opened near the face of main heading for ventilation.

Ogle No. 9.—They are going over all main heading stoppings with concrete to improve ventilation.

## BLOSSBURG COAL COMPANY

Arnot No. 1.—An air shaft, 5 x 6 feet and 60 feet deep, has been sunk near the face of right headings for ventilation.

## MONARCH COAL COMPANY

Leader No. 4.—A seven-foot Stine fan was installed during the year to replace exhaust steam.

## ATHERTON-BARNES COMPANY

Bloomington S. No. 7.—A seven-foot Stine fan was installed to replace furnace.

### Violations of the Mining Laws

I made an official inspection of Ophir No. 9 mine on June 12 and found the Mine Foreman, Samuel Sykes, was violating Section 3, of Article 6, of the Act of May 15, 1893, in not properly conducting the ventilation through the workings and in not having the furnace in operation. He plead guilty before the justice of the peace, and on payment of all costs, with the consent of the court and the district attorney, the case was withdrawn.

On the 23rd of December, I made an official inspection of a small mine, called Butterworths, and found over nine men regularly employed with no mine foreman in charge, as required by Section 5 of Article 6 of the Act of May 15, 1893. The operator plead guilty to the charge, and on payment of all costs, with the consent of the court and the district attorney, the case was withdrawn. He reduced his force to nine persons.

### MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the Public School, Morrisdale, April 6, 7, 8 and 9.

The Board of Examiners was composed of Joseph Knapper, Mine Inspector; Charles Maxwell, Operator, and Frank Boyd, Mine Foreman.

There were twenty-nine applicants for certificates as Mine Foremen, second grade, and one applicant for certificate as Mine Foreman, first grade. The following persons having passed a satisfactory examination were granted certificates:

#### Second Grade

L. M. Kelley, Snow Shoe; Joseph Round, Morrisdale; Le Baron Smith, Philipsburg.

## ***NINTH DISTRICT***

---

FAYETTE AND SOMERSET COUNTIES

---

Connellsville, Pa., February 24, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I have the honor to transmit herewith my report as Inspector of Mines of the Ninth Bituminous District, for the year ending December 31, 1909. I assumed charge of this district July 1, 1909.

The report includes the statistical tables, a statement of the most important improvements in and about the mines, a brief account of the prosecutions for violations of the Mining Law, and the result of the annual examination of candidates for certificates of qualification as mine foremen and fire bosses.

Respectfully submitted,

P. J. WALSH,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 53        |
| Number of mines in operation, .....                                   | 45        |
| Number of tons of coal shipped to market, .....                       | 820,120   |
| Number of tons used at mines for steam and heat, .....                | 175,853   |
| Number of tons sold to local trade and used by employes, .....        | 118,462   |
| Number of tons used in the manufacture of coke, .....                 | 6,831,861 |
| Number of tons of coal produced, .....                                | 7,946,296 |
| Number of tons of coke produced, .....                                | 4,615,872 |
| Number of coke ovens, .....                                           | 8,678     |
| Number of coke ovens in operation, .....                              | 8,232     |
| Number of tons of coal produced by pick mining, .....                 | 6,451,838 |
| Number of tons produced by compressed air machines, ....              | 803,360   |
| Number of tons produced by electrical machines, .....                 | 691,098   |
| Number of persons employed inside of mines, .....                     | 5,343     |
| Number of persons employed outside, including coke<br>workers, .....  | 3,196     |
| Number of persons employed at manufacture of coke, ....               | 1,997     |
| Number of fatal accidents inside of mines, .....                      | 22        |
| Number of fatal accidents outside, .....                              | 3         |
| Number of non-fatal accidents inside of mines, .....                  | 38        |
| Number of non-fatal accidents outside, .....                          | 1         |
| Number of tons of coal produced per fatal accident inside, .....      | 361,195   |
| Number of persons employed per fatal accident inside, ....            | 243       |
| Number of persons employed per fatal accident outside, ..             | 1,065     |
| Number of persons employed per non-fatal accident inside, ..          | 141       |
| Number of persons employed per non-fatal accident out-<br>side, ..... | 3,196     |
| Number of wives made widows, .....                                    | 15        |
| Number of children made orphans, .....                                | 39        |
| Number of steam locomotives used inside of mines, ....                | —         |
| Number of steam locomotives used outside, .....                       | 23        |
| Number of compressed air locomotives used inside, .....               | 10        |
| Number of compressed air locomotives used outside, ....               | —         |
| Number of electric motors used inside, .....                          | 10        |
| Number of electric motors used outside, .....                         | 9         |
| Number of fans in use, .....                                          | 43        |
| Number of furnaces in use, .....                                      | 1         |
| Number of gaseous mines in operation, .....                           | 28        |
| Number of non-gaseous mines in operation, .....                       | 17        |
| Number of new mines opened, .....                                     | 3         |
| Number of old mines abandoned, .....                                  | —         |

TABLE A  
PRODUCTION OF COAL

| 13       | Preston Brooks, .....  | American,--  | Driver, .....   | 27 | M. Furnace No. 2.    | Foot smashed, necessitating amputation, between cars on entry.                               |
| Dec. 8   | George Taylor, .....   | American,--  | Driver, .....   | 30 | S. Phillips, .....   | Squeezed and internally injured between car and mule at lay-off when chain caught in switch. |

Fayette, .....

## CONDITION OF MINES

## H. C. FRICK COKE COMPANY

Adelaide, Bitner, Juniata, Trotter, Leisenring Nos. 1, 2, 3, Lemont No. 1 and Phillips.—In good condition.

Davidson, Lemont No. 2 and Youngstown.—Ventilation defective in part of each mine. Drainage also defective in part of Davidson. All the mines are worked with locked safety lamps, except Bitner, which is non-gaseous. Competent men are employed as "fall bosses" to look after the safety of miners engaged in drawing of pillars.

Effective watering systems are provided, consisting of water-pipes and water cars, and are used to keep the roadways damp. None but permissible explosives are used in these mines.

## W. J. RAINEY

Fort Hill, Paul, Elm Grove and Royal.—In good condition.

Mt. Braddock.—Ventilation was poor at face of workings at the time of my first inspection, but it was very much improved during the latter part of the year.

Royal and Paul.—In these mines the roadways are dampened by use of water-cars, and the mines are worked with locked safety lamps exclusively, except the drift section of Fort Hill, which is non-gaseous and is ventilated by a separate fan. None but permissible explosives are used at these mines.

## PITTSBURG COAL COMPANY

Colonial No. 1.—In good condition. Water-cars are used to keep the roadways damp.

Colonial No. 2.—Idle the entire year.

Colonial No. 3.—In good condition. Locked safety lamps are used exclusively.

Colonial No. 4.—In good condition. Mixed lights are used in this mine. Water-car is used to dampen the roadways.

These mines use permissible explosives exclusively.

## LINCOLN COAL AND COKE COMPANY

Lincoln Nos. 1 and 2.—In very good condition. No. 1 mine is worked exclusively with locked safety lamps. An effective watering system is used to dampen the roadways. Permissible explosives are used exclusively in these mines.

## PITTSBURG AND ERIE COAL COMPANY

Sumner No. 1.—Idle the entire year.

Sumner No. 2.—Ventilation good, but weak in some places at the working face, due to poorly constructed stoppings and excessive use of canvas brattice for guiding and directing the air currents. Roads are kept damp by the use of water-car. Permissible explosives are used exclusively in this mine.

## DUNBAR FURNACE COMPANY

Furnace Nos. 1 and 2.—In excellent condition in regard to ventilation and drainage. Safety lamps are used exclusively in No. 1 mine. These mines adopted the use of permissible explosives exclusively during the latter part of the year.

## OLIVER AND SNYDER STEEL COMPANY

Oliver No. 3.—Ventilation good, but not conducted to the working faces in parts of the mine. Drainage very good. Locked safety lamps and permissible explosives are used exclusively. Roadways are kept damp by use of water-car.

## BROWN AND COCHRAN

Nellie.—In excellent condition. Permissible explosives used exclusively.

## ATLAS COKE COMPANY

Lafayette.—In excellent condition. Permissible explosives and locked safety lamps are used exclusively. Water-cars are used to dampen the roadways.

## WALTERSBURG COKE COMPANY

Edna No. 2.—In good condition. Locked safety lamps and permissible explosives are used exclusively. An effective sprinkling system is being installed to dampen the mine, consisting of pipe-lines and sprinkling hose.

## CAMBRIA STEEL COMPANY

Atlas and Mahoning.—In good condition. Both mines are worked with locked safety lamps exclusively.

## JAMES COCHRAN SONS COMPANY

Clarissa.—In good condition. Permissible explosives are used exclusively.

## HOGSETT COAL AND COKE COMPANY

Hogsett.—In good condition. Locked safety lamps only are used.

## SUNSHINE COAL AND COKE COMPANY

Chester.—In good condition. Permissible explosives are used exclusively.

## LISTONBURG COAL MINING COMPANY

Liston.—Idle during entire year.

Miller.—Ventilation good; drainage defective in part of mine.

## SMITH-MEYERS AND COMPANY, INCORPORATED

Anspach.—In excellent condition throughout.

## GENUINE CONNELLSVILLE COKE COMPANY

Park Hill.—In good condition. Permissible explosives used exclusively.

## LANG COAL AND SAND COMPANY

Basil.—In fair condition. Did not come under the law.

## ELK LICK COAL COMPANY

Beachley.—Ventilation and drainage were not satisfactory at time of inspection. I am informed that conditions have been improved since then.

## HUFF COAL COMPANY

Maude.—A new mine not yet inspected.

## BROWNING COKE COMPANY

Browning.—In fair condition. Did not come under the law.

## MARIETTA-GANIER COKE COMPANY

Junction.—In fair condition. Did not come under the law.

## SOMERSET FUEL COMPANY

Beals.—In fair condition. Worked but a few days during the year.

## SOUTHERN COAL COMPANY

Southern Nos. 1 and 2.—Idle.

## UNITED FIRE BRICK COMPANY

Ferguson.—Ventilation very weak. Did not come under the law.

## FRANKLIN COKE COMPANY

Leon.—In course of construction.

## PERCY MINING COMPANY

Percy.—Idle.

## IMPROVEMENTS

## H. C. FRICK COKE COMPANY

Davidson.—Built sixty-five permanent stoppings, two permanent overcasts, an addition to lamp house and installed one 15 K. W. 220 volt electric light plant.

Juniata.—Built thirty permanent overcasts.

Trotter.—Built one hundred and forty-eight permanent stoppings and twelve permanent overcasts; installed one duplex air compressor for mine pumps.

Leisenring No. 1.—Built twenty permanent stoppings and two overcasts. One pump room, built of rubble masonry and steel I beams, in which was placed one Jeanesville duplex pump, 22 x 12 x 36, with a capacity of 1,000 gallons per minute. An underground stable was built of rubble masonry laid in cement, the top being constructed of steel I beams on which is laid reinforced concrete slabs four inches, and the floor being paved with hard burned red brick laid on edge; mangers, stall, troughs and necessary rooms attached are constructed of incombustible material, making an excellent underground stable, accommodating forty head of stock. Installed one Laidlow-Dunn-Gordon four-stage high pressure air compressor with a capacity of 1,000 cubic feet per minute. Six boilers, of 150 horse-power each, installed.

Leisenring No. 2.—Built eleven brick stoppings and one overcast.

Leisenring No. 3.—New manway to southwest and northwest sides of mine constructed; one overcast built.

Lemont No. 1.—Built twenty-four brick stoppings and three overcasts. Installed tailrope haulage, with necessary engine, etc. Sunk new shaft, 14 x 17 feet and 465 feet deep, at face of workings for ventilation. New pump room constructed, in which is installed one Yough pump, 30 x 12 x 36.

Lemont No. 2.—Built twenty brick stoppings and four overcasts.

Phillips.—Installed one Laidlaw-Dunn-Gordon four-stage cross-compound high pressure air compressor; one Ingersoll-Rand two-stage compound low pressure air compressor; two 12-ton 9 x 14 simple, H. K. Porter Company, air locomotives; four Sullivan and one Ingersoll coal mining machines of the puncher type; one hundred all steel mine cars. Built thirteen permanent stoppings and four overcasts. Built and equipped one electrical repair shop and storage room.

Youngstown.—Built forty-six permanent stoppings.

#### W. J. RAINEY

Mt. Braddock.—Built thirty-two permanent stoppings. Erected forty rectangular coke ovens with machinery to draw, level and load coke.

Elm Grove.—Built fifty-seven permanent stoppings from fan to face between main inlet and return.

#### PITTSBURG COAL COMPANY

Colonial No. 3.—Erected five permanent stoppings.

Colonial No. 4.—Built twenty-four permanent stoppings and two overcasts.

#### LINCOLN COAL AND COKE COMPANY

Lincoln No. 1.—Built thirty-four permanent stoppings and two overcasts. Installed one ten-ton compressed air locomotive.

#### PITTSBURG AND ERIE COAL COMPANY

Sumner No. 2.—Built eleven permanent stoppings and three overcasts.

#### DUNBAR FURNACE COMPANY

Furnace No. 1.—One overcast and twenty-one permanent stoppings built. Installed telephone system throughout the mine, connected with tippie and offices. Outside: Two 300 horse-power boilers installed, and a concrete storage room built for explosives.

Furnace No. 2.—Twenty permanent stoppings built, and tippie covering three hundred feet.

#### OLIVER AND SNYDER STEEL COMPANY

Oliver No. 3.—Built fifteen permanent stoppings and one overcast; also one four-room dwelling house.

#### ATLAS COKE COMPANY

Lafayette.—Two permanent overcasts built.

## WALTERSBURG COKE COMPANY

Edna No. 2.—Built ten permanent stoppings and one overcast.

## HOGSETT COAL AND COKE COMPANY

Hogsett.—Ten permanent stoppings built.

## SMITH-MEYERS AND COMPANY, INCORPORATED

Auspach.—Installed one General Electric Company generator and one electric motor for haulage, two boilers, 125 horse-power each, one ventilating fan and engine complete. Built fourteen dwelling houses.

## HUFF COAL COMPANY

Maude.—A new operation with necessary buildings and equipment.

## FRANKLIN COKE COMPANY

Leon.—A new coke operation, with necessary buildings and equipment.

## Prosecutions for Violations of the Mining Laws

On January 7 information was made against John Smith, charging him with taking smoker's materials into Adelaide mine of the H. C. Frick Coke Company, which is worked exclusively with locked safety lamps. March 10, he plead guilty of the charge and was sentenced to pay a fine and costs, amounting to \$35.23.

On February 18, information was made against John Vohesky, charging him with passing a danger signal in Colonial No. 1 mine, of the Pittsburg Coal Company. On June 16 he plead guilty of the charge and was sentenced to pay \$25.00 fine and to undergo imprisonment in jail for thirty days.

On March 20, information was made against William Conners, fire boss, at Leisenring No. 3 mine, of the H. C. Frick Coke Company, charging him with failing to erect danger board at entrance to place that he found dangerous while making an examination. Case dismissed upon payment of costs by Conners, amounting to \$16.62.

## Mine Foremen's Examinations

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the First National Bank Building, Connellsville, April 6, 7, 8 and 9.

The Board of Examiners was composed of the following persons: T. D. Williams, Inspector; James J. Stoker, Superintendent, and John Boylan, Mine Foreman. There were forty-three applicants examined, twelve for certificates as Mine Foremen and thirty-one for certificates as Fire Bosses.

The following persons having passed a satisfactory examination were granted certificates as Mine Foremen:

## First Grade

Patrick Flynn, Leisenring; Duncan Bennett, Connellsville; and D. R. DePriest, Waltersburg.

## **TENTH DISTRICT**

---

CAMBRIA, BLAIR, INDIANA AND CLEARFIELD COUNTIES

---

Altoona, Pa., February 18, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: In compliance with the mining law, I herewith transmit my report for the Tenth Bituminous District for the year ending December 31, 1909.

The report contains the usual statistical matter, together with remarks on accidents, condition of mines and improvements.

Respectfully submitted,

JOSEPH WILLIAMS,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 98        |
| Number of mines in operation, .....                                   | 84        |
| Number of tons of coal shipped to market, .....                       | 4,625,622 |
| Number of tons used at mines for steam and heat, .....                | 152,297   |
| Number of tons sold to local trade and used by employes, .....        | 32,477    |
| Number of tons used in the manufacture of coke, .....                 | 587,576   |
| Number of tons of coal produced, .....                                | 5,397,972 |
| Number of tons of coke produced, .....                                | 374,047   |
| Number of coke ovens, .....                                           | 1,331     |
| Number of coke ovens in operation, .....                              | 1,306     |
| Number of tons of coal produced by pick mining, .....                 | 3,486,492 |
| Number of tons produced by compressed air machines, ..                | 757,848   |
| Number of tons produced by electrical machines, .....                 | 1,153,632 |
| Number of persons employed inside of mines, .....                     | 8,889     |
| Number of persons employed outside, including coke<br>workers, .....  | 1,197     |
| Number of persons employed at manufacture of coke, ....               | 357       |
| Number of fatal accidents inside of mines, .....                      | 39        |
| Number of fatal accidents outside, .....                              | 1         |
| Number of non-fatal accidents inside of mines, .....                  | 93        |
| Number of non-fatal accidents outside, .....                          | 2         |
| Number of tons of coal produced per fatal accident inside, ..         | 138,410   |
| Number of persons employed per fatal accident inside, ..              | 228       |
| Number of persons employed per fatal accident outside, ..             | 1,197     |
| Number of persons employed per non-fatal accident inside, ..          | 96        |
| Number of persons employed per non-fatal accident out-<br>side, ..... | 598       |
| Number of wives made widows, .....                                    | 18        |
| Number of children made orphans, .....                                | 39        |
| Number of steam locomotives used inside of mines, .....               | -----     |
| Number of steam locomotives used outside, .....                       | 8         |
| Number of compressed air locomotives used inside, .....               | -----     |
| Number of compressed air locomotives used outside, ....               | -----     |
| Number of electric motors used inside, .....                          | 63        |
| Number of electric motors used outside, .....                         | -----     |
| Number of fans in use, .....                                          | 58        |
| Number of furnaces in use, .....                                      | 26        |
| Number of gaseous mines in operation, .....                           | 4         |
| Number of non-gaseous mines in operation, .....                       | 80        |
| Number of new mines opened, .....                                     | 1         |
| Number of old mines abandoned, .....                                  | 2         |

TABLE A  
PRODUCTION OF COAL

| Names of Operators                                                  | Tons    |
|---------------------------------------------------------------------|---------|
| Pennsylvania Coal and Coke Company (T. H. Watkins, Receiver), ..... | 961,207 |
| Commercial Coal Mining Company, .....                               | 405,236 |
| Portage Coal Mining Company, .....                                  | 268,962 |
| Sonman Shaft Coal Company, .....                                    | 243,776 |
| Shoemaker Coal Mining Company, .....                                | 222,082 |
| Tunnel Cbaling Company, .....                                       | 199,425 |
| Vinton Colliery Company, .....                                      | 197,865 |
| NantYGlo Coal Mining Company, .....                                 | 168,673 |
| Big Bend Coal Mining Company, .....                                 | 167,661 |
| Altoona Coal and Coke Company, .....                                | 162,625 |
| Forge Coal Mining Company, .....                                    | 157,002 |
| Taylor and McCoy Coal and Coke Company, .....                       | 144,125 |
| Cresson and Clearfield Coal and Coke Company, .....                 | 140,583 |
| W. H. Piper and Company, .....                                      | 126,018 |
| Miller Coal Company, .....                                          | 121,695 |
| George Pearce and Sons, .....                                       | 116,409 |
| Lackawanna Coal and Coke Company, .....                             | 116,409 |
| Irvona Coal and Coke Company, .....                                 | 96,794  |
| Leahey Coal Mining Company, .....                                   | 84,533  |
| Lilly Coal Company, .....                                           | 72,784  |
| Glen White Coal and Lumber Company, .....                           | 71,931  |
| Estep Brothers Coal Mining Company, .....                           | 68,178  |
| Baker Whitely Coal Company, .....                                   | 68,116  |
| Penker Coal Company, .....                                          | 65,543  |
| Princess Coal Mining Company, .....                                 | 63,100  |
| Andersen Coal Mining Company, .....                                 | 59,006  |
| Bens Creek-Sonman Coal Company, .....                               | 58,710  |
| A. Smith and Company, .....                                         | 57,969  |
| Blain Run Coal Company, .....                                       | 56,800  |
| J. Blair Kennerly, .....                                            | 54,344  |
| Plymouth Coal Mining Company, .....                                 | 52,353  |
| Cardiff Coal Company, .....                                         | 50,629  |
| Springfield Coal Mining Company, .....                              | 48,835  |
| Lincoln Coal Company, .....                                         | 48,613  |
| S. S. Hegarty's Sons, .....                                         | 48,374  |
| Kiskiminetas Coal Company, .....                                    | 45,518  |
| Standard Coal Company, .....                                        | 43,233  |
| Aetna Coal Mining Company, .....                                    | 35,403  |
| John A. Leap, .....                                                 | 35,225  |
| Bellfield Coal and Coke Company, .....                              | 32,395  |
| Puritan Coal Mining Company, .....                                  | 38,000  |
| Harbison-Walker Refractories Company, .....                         | 19,684  |
| Bells Mill Coal Company, .....                                      | 16,733  |
| E. W. Turley Company, .....                                         | 14,531  |

|                                              |           |

TABLE I.—Operators and mines, kind of openings, type and size of fans, size of furnaces, volume of air produced by fan or furnace per minute, number of splits of air currents, and number of persons employed inside

| Names of Operators and Mines        | Kind of opening | Gaseous or non-gaseous | Method of ventilation | Diameter of fan in feet and inches | Width of blades in feet and inches | Depth of blades in feet and inches | Number of revolutions per minute | Water gauge developed—in inches | Name of fan    | Power used       | Area of furnace bars in square feet | Number of splits of air currents | Number of cubic feet of air per minute entering the mine at inlet | Total quantity of air per minute circulating in all the splits in cubic feet | Number of cubic feet per minute passing out at outlet | Number of persons employed inside |

 ## DESCRIPTION OF FATAL ACCIDENTS

## WEHRUM DISASTER

On the morning of January 23, 1909, at 7.30, an explosion of coal dust occurred in the first left, north heading in the Lackawanna No. 4 mine at Wehrum, Indiana county, operated by the Lackawanna Coal and Coke Company, which resulted in the death of twenty-one persons and the serious injury of twelve others.

At the time of the explosion the employes had commenced the day's work. Most of the men were in the mine at the time of the explosion, although no coal was being hoisted. The company men were working and most of the miners were loading the empty cars in preparation for the next day.

No person anticipated any danger, as the mine was considered to be one of the safest in the region. No explosive gas could be discovered by a safety lamp. A small feeder of gas had been found issuing from the roof in third north heading about eight days before. This gas was so feeble that it would diffuse before reaching the flame in the safety lamp, and, at times, it could not be ignited by an open light, as the miners testified at the inquest. No other traces of explosive gas could be found in the mine.

On the afternoon of January 22, Thomas Bestesta and two other Italian miners were working in the first left, north heading, and had blasted a shot in the bottom. The bottom consisted of eighteen inches of fire clay and six inches of coal, the coal being below the fire clay. They had drilled the hole six feet deep and charged it with two feet of black powder. This blast failed to break up the bottom sufficiently and Bestesta and his partners decided to use dynamite to break it up. The following morning, January 23, they placed two and one half sticks of dynamite in the hole, using no stemming. Bestesta stated at the inquest that he never used stemming with dynamite. When the shot was fired the heading was filled with flame that reached the back haulage road, five hundred feet from the face of the heading. All the coal from the north side of the mine had been taken over this road and hence fine coal was necessarily deposited along the route. The ignition of the gases from this dust caused an explosion of great violence around the bottom of the slope and shaft and extended near the face of the second south heading. A can that had contained powder was found near the face of the heading parallel to the second south heading with its top blown off. The bodies of the two men who had worked in this heading were found, one in the draw-road and the other in the second south heading. A drill auger stood in a partially drilled hole. Evidently one of the men was engaged in drilling a hole and the other in filling a cartridge from the can of powder. The ignition of the powder at the time of the explosion only can account for evidence of flame in this part of the workings.

The witnesses examined before the inquest were employed in all parts of the mine and testified to their belief in the safe condition of the mine prior to the explosion. Some of these witnesses had worked

in the mine since it was opened in 1903. No one had any knowledge of explosive gas having been found, except the small feeder in third left, north heading, mentioned before.

Mr. W. N. Johnson, superintendent, testified that he had but once seen a trace of gas in his safety lamp. He discovered the gas in a hole in the roof in one of the long wall blocks about five years ago. At that time the fan was stopped for thirteen hours.

On my visits to the mine no gas was discovered by me, and, on questioning the workmen, the answer invariably was that no gas had been seen.

Since the explosion, and on the evidence given by the superintendent of having seen a small trace of gas in the mine five years ago, I requested that fire bosses be employed to examine every working place in the mine before the men enter. My last visit to the mine was on November 12, and the fire boss report book showed that no explosive gas had been reported.

At the time of my visit, December 20, thirty-three days before the explosion, I found the mine to be in a safe and healthy condition. There was no accumulation of coal dust to cause me to be apprehensive of danger. The humidity of the air was high, as the drainage of the mine was about 1,000 gallons per minute, and this water was collected by several pumps from different parts of the mine.

It seemed to me to be impossible to have an explosion under such conditions, and yet it has proven that the blasting of the two and one-half sticks of dynamite in the coal pulverized by the previous blast of black powder, and most of the force of the dynamite blast being spent on the atmosphere, contained all the necessary requisites for causing an explosion.

It also teaches us that if carelessness or ignorance is allowed in the use and handling of explosives, there is no mine that is safe from explosions. Especially is this true in our large mines where high velocities of air course the haulage roads and trips of loaded cars are run at high speed. Very fine dust will accumulate along the roof, sides and floor of the haulage roads, no matter how vigilant we are. The best that can be done is to reduce the danger. If permissible explosives and incombustible stemming had been used with reasonable care in the Lackawanna No. 4 mine, the explosion at Wehrum would not have occurred.

On December 10, Michael Robeck and Albert Cozy, Polish miners, and Lawrence Sisco, a Polish driver, met their death by suffocation in the Wilmore No. 1 mine. At 6.55 P. M. a fire was discovered at the fan which burned into the fan drift, the fumes and smoke entering the mine. Twenty-one persons escaped by the way of the haulage road, their being twenty-four men employed in the mine. The three victims were working on the intake side of the mine and when the smoke reached them, in their effort to escape they went directly toward the fire at the inlet until, being overcome, they fell and were suffocated by the smoke. There were two ways convenient for them to have escaped, one by the way of the haulage road and the other by going over the overcast which led to the traveling way on the opposite side of the haulage road. They became bewildered and knowing the inlet opening to be the nearest point of egress from their working places they took the road that led them to their death. The origin of the fire could not be discovered.

## CONDITION OF MINES

## PENNSYLVANIA COAL AND COKE COMPANY

(T. H. Watkins, Receiver)

Pennsylvania Nos. 1, 7, 16, 9, 14 and 19.—In fair condition. Ventilation and drainage reasonably fair.

Pennsylvania No. 2.—The traveling way was not in good condition. On my last visit to the mine preparations were being made to improve it. Ventilation good.

Pennsylvania No. 10.—The ventilation in some parts of the mine was not sufficient. The mine is very extensive and work is being done to reduce some of the friction on the air. If this does not sufficiently improve the ventilation, they will be compelled to sink a shaft near the face of the workings. Drainage good.

## COMMERCIAL COAL MINING COMPANY

Commercial Nos. 2, 3, 4 and 5.—In good condition. No. 2 mine is about exhausted and during the year has been employing less than ten men.

No. 4 mine fan forces the air into the mine, while No. 3 mine fan exhausts the air from the mines; hence the fans assist each other.

## PORTAGE COAL MINING COMPANY

Portage Nos. 2 and 4.—Ventilation and drainage good.

Portage No. 3.—Idle during the year.

## SONMAN SHAFT COAL COMPANY

Sonman Shaft.—This mine was in a very unsatisfactory condition during the year. As the workings were extended it became necessary to ask the Chief of the Department of Mines to send two other Inspectors to advise with me concerning the health and safety of persons employed in this mine. The result was that information was made against the Superintendent and Mine Foreman, charging them with violating the Mining Law, and an injunction was asked to restrain them from operating the mine unless improvements be made forthwith. The improvements were made as requested.

## SHOEMAKER COAL MINING COMPANY

Wilmore No. 1.—Ventilation and drainage in fair condition.

## TUNNEL COALING COMPANY

Tunnel No. 1.—In very fair condition.

Tunnel No. 2.—Only worked the latter part of the year. In fair condition.

## VINTON COLLIERY COMPANY

Vinton Nos. 1 and 4.—Ventilation, drainage and general conditions good.

Vinton Nos. 2 and 3.—Idle.

Vinton No. 5.—Worked the first part of the year and was abandoned in February. In the future the coal will be worked from Vinton No. 6 mine.

## NANT Y GLO COAL MINING COMPANY

NantYGlo No. 1.—In fair condition except that the ventilation needs to be divided into two currents. They are working day and night shifts to meet the demands for their coal.

## BIG BEND COAL MINING COMPANY

NonPareil No. 1.—In good condition.

## ALTOONA COAL AND COKE COMPANY

Delaney No. 5.—The ventilation was weak in some parts of the mine. Drainage and general conditions good.

Horseshoe.—In fair condition.

No. 6 Mine.—Idle.

## FORGE COAL MINING COMPANY

Forge Slope No. 1.—During the fore part of the year the ventilation on one side of the mine was weak. The latter part of the year it was improved.

## TAYLOR AND McCOY COAL AND COKE COMPANY

Gallitzin Shaft.—Ventilation was not satisfactory. Too many men were employed in one of the currents of air. Preparations were being made to improve this condition. Drainage good.

## CRESSON AND CLEARFIELD COAL AND COKE COMPANY

Dean No. 8.—Idle during greater part of year. In good condition when visited.

Dean No. 9.—When visited less than ten men were working.

Dean No. 10.—In very fair condition.

## W. H. PIPER AND COMPANY

Sonman No. 2.—Ventilation and drainage good.

Sonman No. 4.—Did not come under the law and was not visited.

## MILLER COAL COMPANY

Miller Shaft No. 1.—Ventilation very fair. Drainage fair. Much trouble was experienced to keep roadways in fair condition, caused by water working through soft fire clay bottom.

## GEORGE PEARCE AND SONS

Excelsior No. 1.—In fair condition.

Excelsior No. 2.—In good condition.

## LACKAWANNA COAL AND COKE COMPANY

Lackawanna No. 3.—Idle.

Lackawanna No. 4.—Ventilation, drainage and roadways in good condition on each of my visits. On June 23 an explosion of coal dust occurred, a description of which is given under the head of Description of Fatal Accidents.

## IRVONA COAL AND COKE COMPANY

Irvona No. 5.—Ventilation feeble at the working places. Drainage good.

Irvona No. 10.—Ventilation fair. Drainage poor.

## LEAHEY COAL MINING COMPANY

Leahey No. 1.—Ventilation fair. Drainage good.

Leahey No. 2.—Ventilation and drainage in very fair condition.

## LILLY COAL MINING COMPANY

Lilly No. 2.—In very good condition. Ventilation and drainage good.

## GLEN WHITE COAL AND LUMBER COMPANY

Glen White No. 1.—Idle.

Glen White No. 2.—In very fair condition.

## ESTEP BROTHERS COAL MINING COMPANY

Ivory Hill.—Ventilation fair. On my last visit I requested that the ventilation be split into two separate currents to comply with the law. Drainage good.

## BAKER WHITELY COAL COMPANY

Ivy Ridge.—In fair condition.

## PENKER COAL COMPANY

Penker No. 1.—In fair condition. Ventilation and drainage fair.

## PRINCESS COAL MINING COMPANY

Priscilla No. 6.—Ventilation poor at the faces. Drainage good.

Priscilla No. 8.—Ventilation and drainage good.

## ANDERSEN COAL MINING COMPANY

Peerless No. 1.—In good condition.

Peerless No. 2.—In fair condition.

Peerless No. 4.—The means of ingress and egress to this mine were not in a lawful condition. At my request the mine was closed down to improve the condition so as to comply with the law. Ventilation poor.

## BENS CREEK-SONMAN COAL COMPANY

Bens Creek Shaft.—In fair condition. Ventilation fair. Drainage good.

## A. SMITH AND COMPANY

Superior No. 1.—Ventilation poor at the working faces on my last visit, but work was being done that would improve it. Drainage good.

Superior Nos. 2 and 3.—Idle.

Superior No. 4.—Not under the requirement of the law at my last visit. At my request it was closed down to make improvements.

## BLAIN RUN COAL COMPANY

Blain Run No. 1.—In good condition.

## PLYMOUTH COAL MINING COMPANY

Plymouth No. 1.—In fair condition. Ventilation fair and drainage good.

## CARDIFF COAL COMPANY

Cardiff.—Ventilation very fair for the number of men employed. The number of men inside had been reduced at time of inspection. The ventilation, however, will not comply with the law when the mine is worked to its full capacity. Drainage good.

## SPRINGFIELD COAL MINING COMPANY

Springfield No. 1.—Ventilation and drainage good.

## LINCOLN COAL COMPANY

Lincoln Mine.—Ventilation at the working faces very poor. They are installing a fan to take the place of the furnace, which will improve the ventilation. Drainage good.

## S. S. HEGARTY'S SONS

Oakland No. 2.—In fair condition.

Oakland No. 3.—The ventilation weak on one side of the mine. I requested that a door be erected in place of a canvas sheet that had been hung on the main heading.

## KISKIMINETAS COAL COMPANY

Kiskiminetas No. 2.—Ventilation and drainage good.

## STANDARD COAL COMPANY

Standard No. 1.—Ventilation and drainage poor in this mine until the latter part of the year. There was some improvement on my last visit.

## PURITAN COAL MINING COMPANY

Puritan No. 1.—Ventilation poor at the working faces. An auxiliary fan is used back in the mine. Some of the return air leaks into the intake and is continually circulating in the working faces. I have demanded an improvement in the ventilation.

Puritan No. 2.—Ventilation was very poor on my last visit. The management promised to install a fan to take the place of the furnace.

## AETNA COAL MINING COMPANY

Aetna No. 1.—Ventilation good. Drainage fair. I have requested another opening to be made for egress, as the present second opening does not comply with the law.

## JOHN A. LEAP

Plane.—On my last visit the ventilation was fair, except in the lower heading, where they were about to cut through to old workings. Drainage fair.

## BELLFIELD COAL AND COKE COMPANY

Bend No. 5.—Ventilation very weak in some of the working places. I requested that it be improved. A new furnace was built to improve the condition. Drainage good.

## HARBISON-WALKER REFRACTORIES COMPANY

Cambria No. 1.—In good condition.

## BELLS MILL COAL COMPANY

Bells Mill.—In fair condition for the number of men employed. They had less than ten men. A fan will be installed as the number of men is increased. Drainage on the haulage roads was good.

## E. W. TURLEY COMPANY

Wister No. 3.—In fair condition.

## FEDERAL COAL AND COKE COMPANY

Knickerbocker No. 4.—Idle until the latter part of the year. Ventilation and drainage good.

Knickerbocker No. 5.—Ventilated by the same current of air as No. 4 mine, which is not satisfactory. At the time of my visit eighteen men were employed inside. I requested that the ventilation be improved before more men were employed. Drainage good.

## BENNINGTON COAL COMPANY, INCORPORATED

Bennington No. 2.—In fair condition.

## KELLY AND FLANAGAN

Kelly No. 1.—In good condition.

## J. E. SCHMITTLE

Pleasant Hill.—In fair condition.

## BIG FOUR COAL MINING COMPANY

Big Four No. 1.—This is Big Bend No. 1 mine re-opened. In good condition.

## M. J. LEISENRING COMPANY

Sonman No. 1.—Ventilation and drainage good.

## MAX FRICK'S ESTATE

Frick's No. 2.—Both openings in good condition. Ventilation good; drainage fair.

## F. A. GARMAN

Wopsy.—Abandoned.

## HARRIS COLLIERY COMPANY

Mount Verde.—Only worked the two last months of the year and was not visited.

## MUNSTER COAL COMPANY

Eleanor.—Taking the pillars out and only working a few men at present.

## ASHVILLE COAL AND COKE COMPANY

Ashville.—Idle the greater part of the year. When visited it was in good condition.

## BLACKLICK MINING COMPANY

Big Bend No. 6.—A new mine and has not been visited.

## BRADLEY AND REED

Bradley No. 1.—Worked during the latter part of the year, but was not visited.

Bradley No. 3.—Idle.

## AULD RUN COAL COMPANY

Auld Run.—Only worked at the end of the year.

## JOSEPHINE COAL AND COKE COMPANY

Josephine.—Idle.

## KOKOMO COAL COMPANY

Kokomo.—Idle.

## PRESTON COAL MINING COMPANY

Oakland No. 4.—Did not come under the law.

## IMPROVEMENTS

## PENNSYLVANIA COAL AND COKE COMPANY

(T. H. Watkins, Receiver)

Pennsylvania Nos. 7 and 16.—Improved in ventilation and drainage by the construction of a water course to the surface, by the straightening of the airway from the fan, and by the building of two overcasts to divide the ventilation into separate air currents.

Pennsylvania No. 9.—Two overcasts were built to divide the air currents.

Pennsylvania No. 14.—The seven-foot Stine disk fan was replaced by an improved Stine fan 12 x 5 x 3.5 feet. A shaft, 6 x 8 feet and 65 feet deep, was sunk for egress and ventilation near the hill workings.

## SONMAN SHAFT COAL COMPANY

Sonman Shaft.—Ventilation improved by facing the stoppings with cement and making two new overcasts. Shelter holes were constructed along the mechanical haulage roads. Connection was made with Bens Creek Shaft for egress by a passageway, 5 x 5 and 600 feet long, along the Bens Creek side of the line of the barrier pillar between Bens Creek and Sonman Shafts.

## VINTON COLLIERY COMPANY

Vinton Nos. 1, 4 and 6.—Ventilation in Vinton Nos. 1 and 4 mine improved by the building of two new overcasts, and in No. 6 mine by the building of one overcast to divide the air into separate currents.

## FORGE COAL MINING COMPANY

Forge Slope No. 1.—A new shaft was sunk for ventilation and pumpage.

## GEORGE PEARCE AND SONS

Excelsior Nos. 1 and 2.—Two new overcasts were built in Excelsior No. 2 to divide the air into separate currents.

## BAKER WHITELY COAL COMPANY

Ivy Ridge No. 1.—Another opening was made for egress by driving a room into a drift that had been previously made. One new overcast was built to split the air.

## PENKER COAL COMPANY

Penker No. 1.—Ventilation was improved by driving a heading to connect the air shaft with the working faces, thereby shortening the air course.

## ANDERSEN COAL MINING COMPANY

Peerless No. 4.—Made a second opening for egress by sinking a shaft, 5 x 5 and 15 feet deep. From this point it sloped for a distance of 25 feet, making a depth in all to the coal, of 23 feet.

## J. BLAIR KENNERLY

Beccaria.—Another opening was made for egress by driving a room into a drift that had been previously made. A furnace was constructed near the face of the workings and a shaft, 6 x 6 and 30 feet deep, was sunk for it.

## CARDIFF COAL COMPANY

Cardiff.—A separate traveling way was made from the face of the workings a distance of about 4,000 feet, by taking down the roof of the back heading, making it not less than five feet in height.

## LINCOLN COAL COMPANY

Lincoln.—An electric haulage and electric mining machines were installed. The second opening was improved by taking down some roof and retimbering it.

## PURITAN COAL MINING COMPANY

Puritan Nos. 1 and 2.—The stables near the bottom of the shaft were improved by the construction of cement walls.

## FEDERAL COAL MINING COMPANY

Knickerbocker No. 5.—The main haulage road was improved by cleaning and relaying the road.

### Prosecutions for Violations of the Mining Laws

On February 27, Joe Franko and Andy Birto, Hungarian miners, pleaded guilty to the charge of passing a danger board in the Cardiff mine of the Cardiff Coal Company on February 20. They paid the costs, amounting to about \$84, and sentence was suspended.

On October 5, James Strachan, Superintendent, and W. G. Strachan, Mine Foreman, at Sonman Shaft of the Sonman Shaft Coal Company, pleaded guilty to the charge of violating the Mining Law. They were ordered to pay the costs, and sentence was suspended.

On December 23, Andy Mudge, Hungarian miner, pleaded guilty to the charge of passing a danger board in Vinton No. 6 mine of the Vinton Colliery Company, before the fire boss had returned to make his report. He was bound over in \$200 bail for his appearance at court.

### Mine Foremen's Examinations

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the LeVan Building, Altoona, April 6, 7, 8 and 9.

The Board of Examiners was composed of Joseph Williams, Mine Inspector; F. P. McFarland, Superintendent; and John M. Jones, Mine Foreman.

There were twenty-eight applicants for certificates as Mine Foremen and one applicant for certificate as Fire Boss. The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

#### Second Grade

Charles A. Brown, Blandburg; Robert Robertson, Scalp Level; M. J. Bracken, Gallitzin; Thomas Hogarth, Wehrum.

## ***ELEVENTH DISTRICT***

---

FAYETTE AND WESTMORELAND COUNTIES

---

Scottdale, Pa., February 21, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir:—

In compliance with the Acts of Assembly, approved May 15, 1893, and April 14, 1903, I have the honor to transmit herewith my annual report as Inspector of Mines for the Eleventh Bituminous District for the year ending December 31, 1909.

I was transferred to this district July 1, 1909, from the Sixth District.

The report contains the usual tables of statistics, brief descriptions of the condition of the mines, the most important improvements, report of the annual examination of applicants for mine foremen and fire boss certificates, and a report of the legal proceedings.

Respectfully submitted,

D. R. BLOWER,  
Inspector

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 71        |
| Number of mines in operation, .....                                   | 65        |
| Number of tons of coal shipped to market, .....                       | 919,559   |
| Number of tons used at mines for steam and heat, .....                | 195,475   |
| Number of tons sold to local trade and used by employes, ..           | 76,816    |

| Number of coke ovens in operation, .....                              | 9,187     |
| Number of tons of coal produced by pick mining, .....                 | 6,815,682 |
| Number of tons produced by compressed air machines, ....              | 622,112   |
| Number of tons produced by electrical machines, .....                 | 357,191   |
| Number of persons employed inside of mines, .....                     | 6,132     |
| Number of persons employed outside, including coke<br>workers, .....  | 3,634     |
| Number of persons employed at manufacture of coke, ....               | 2,419     |
| Number of fatal accidents inside of mines, .....                      | 20        |
| Number of fatal accidents outside, .....                              | 1         |
| Number of non-fatal accidents inside of mines, .....                  | 44        |
| Number of non-fatal accidents outside, .....                          | 1         |
| Number of tons of coal produced per fatal accident inside, ..         | 389,749   |
| Number of persons employed per fatal accident inside, ...             | 307       |
| Number of persons employed per non-fatal accident inside, ..          | 139       |
| Number of persons employed per fatal accident outside, ..             | 3,634     |
| Number of persons employed per non-fatal accident out-<br>side, ..... | 3,634     |
| Number of wives made widows, .....                                    | 19        |
| Number of children made orphans, .....                                | 41        |
| Number of steam locomotives used inside of mines, .....               | —         |
| Number of steam locomotives used outside, .....                       | 35        |
| Number of compressed air locomotives used inside, .....               | 8         |
| Number of compressed air locomotives used outside, ....               | —         |
| Number of electric motors used inside, .....                          | 7         |
| Number of electric motors used outside, .....                         | 3         |
| Number of fans in use, .....                                          | 55        |
| Number of furnaces in use, .....                                      | 7         |
| Number of gaseous mines in operation, .....                           | 27        |
| Number of non-gaseous mines in operation, .....                       | 38        |
| Number of new mines opened, .....                                     | 4         |
| Number of old mines abandoned, .....                                  | —         |

TABLE A  
PRODUCTION OF COAL

| Names of Operators                               | Tons      |
|--------------------------------------------------|-----------|
| H. C. Frick Coke Company, .....                  | 4,980,127 |
| Washington Coal and Coke Company, .....          | 1,320,773 |
| W. J. Rainey, .....                              | 377,106   |
| Westmoreland Coal Company, .....                 | 329,462   |
| Mount Pleasant Coke Company, .....               | 118,592   |
| Mount Pleasant Connellsville Coke Company, ..... | 81,626    |
| Veteran Coke Company, .....                      | 71,148    |
| Clare Coke Company, .....                        | 64,151    |
| Cochran Brothers, .....                          | 48,487    |
| B. F. Keister and Company, .....                 | 46,592    |
| Sunshine Coal and Coke Company, .....            | 42,100    |
| Youghiogheny and Ohio Coal Company, .....        | 40,908    |
| Magee Coke Company, .....                        | 37,980    |
| Brownfield-Connellsville Coke Company, .....     | 32,455    |
| Bessemer Coke Company, .....                     | 32,335    |
| Echard Coal and Coke Company, .....              | 31,773    |
| American Sheet and Tin Plate Company, .....      | 31,335    |
| Brush Run Coal and Coke Company, .....           | 26,410    |
| Peerless-Connellsville Coke Company, .....       | 22,156    |
| Kaine and Wilkey Coke Company, .....             | 15,175    |
| Marion Coke Company, .....                       | 13,737    |
| Perry Coke Company, .....                        | 12,248    |
| Connellsville Mutual Coke Company, .....         | 11,169    |
| Majestic Coke Company, .....                     | 7,140     |
| Total, .....                                     | 7,794,985 |

Production by Counties

|                     |           |
|---------------------|-----------|
| Westmoreland, ..... | 5,755,053 |
| Fayette, .....      | 2,039,932 |
| Total, .....        | 7,794,985 |

TABLE B.—Fatal and non-fatal accidents inside and outside of mines; number of tons of coal produced per accident; number of persons employed; number employed per accident

| Names of Operators                     | Fatal Accidents |         |       | Non-Fatal Accidents |         |       | Tons of coal produced per fatal accident inside | Tons of coal produced per non-fatal accident inside | Number of employees inside | Number of employees outside | Total number of employees | Number of employees inside per fatal accident | Number of employees outside per fatal accident | Number of employees inside per non-fatal accident | Number of employees outside per non-fatal accident |

|---------|-----------------------|-----------------|-------------------|----|---------------------------|---------------|----------------------------------------------------------------------------------------------------------------------------|
| Sept. 3 | Joseph Hahula,-----   | Slavonian,----- | Miner,-----       | 21 | M. Hecla No. 1,-----      | Westmoreland, | Leg injured. While pulling a piece of loose rock at face of pillar, it struck the pick and caused it to penetrate his leg. |
| 13      | Walter Warnsley,----- | English,-----   | Loader,-----      | 26 | M. Magee,-----            | Westmoreland, | Leg injured by machine bit while standing in the way of the machine runner at face of entry.                               |
| 13      | Joe Felka,-----       | Polish,-----    | Miner,-----       | 32 | M. Standard No. 2,-----   | Westmoreland, | Hand squeezed while coupling cars for driver on entry.                                                                     |
| 20      | W. T. Walls,-----     | American,-----  | Company man,----- | 32 | M. South West No. 4,----- | Westmoreland, | Head injured by fall of slate on entry while cleaning up a fall.                                                           |
| 27      | Frank Kantorik,-----  | Bohemian,-----  | Miner,-----       | 20 | S. Standard No. 2,-----   | Westmoreland, | Arm injured by mine car on entry.                                                                                          |
| 30      | Frank Ryas,-----      | Polish,-----    | Miner,-----       | 30 | M. Standard No. 2,-----   | Westmoreland, | Head cut by fall of slate at face of room.                                                                                 |
| Oct. 16 | Frank Stefl,-----     | Bohemian,-----  | Company man,----- | 23 | M. Standard Slope,-----   | Westmoreland, | Head cut. While riding on rear of loaded car on entry the drag struck an iron sheave and rebounding struck him on head.    |
| 19      | John Tote,-----       | Slavonian,----- | Loader,-----      | 25 | S. Osborne No. 1,-----    | Westmoreland, | Hand crushed between mine car and entry face.                                                                              |
| Nov. 2  | Joe Cardale,-----     | Italian,-----   | Miner,-----       | 39 | M. Standard No. 2,-----   | Westmoreland, | Head cut by mine car on entry.                                                                                             |
| 11      | Steve Pushcar,-----   | Slavonian,----- | Company man,----- | 30 | M. Marguerite,-----       | Westmoreland, | Hip dislocated. Squeezed between mine car at face of entry and entry pillar.                                               |
| 16      | Andy Tabin,-----      | Slavonian,----- | Loader,-----      | 33 | M. Magee,-----            | Westmoreland, | Leg broken by fall of slate at face of entry.                                                                              |
| Dec. 11 | Carl Ottenberg,-----  | American,-----  | Driver,-----      | 27 | S. Franklin,-----         | Fayette,----- | Chest and back injured by trip of mine cars on entry.                                                                      |
| 18      | John Chulka,-----     | Austrian,-----  | Miner,-----       | 31 | M. Hester,-----           | Westmoreland, | Ankle sprained by fall of coal at face of pillar.                                                                          |

## CONDITION OF MINES

## H. C. FRICK COKE COMPANY

All the mines of this company are in very good condition as to ventilation, drainage and general safety, with the exception of White and Marguerite, in which the ventilation was not satisfactory in parts. Steps are being taken, however, by the officials to overcome this condition.

The roadways are kept neat and clean and precaution taken to keep the dust moistened by the use of water car where necessary.

## WASHINGTON COAL AND COKE COMPANY

Washington Nos. 1, 2 and 3.—In No. 1 the ventilation was weak in two of the entries. Otherwise these mines were in excellent condition as to ventilation, drainage and safety.

The roadways are kept in a damp condition by the use of water cars and water pipes with hose connections.

## W. J. RAINEY

Acme, Grace and Union.—The ventilation in these mines on my last visit was good, but the drainage in parts of the Acme was in poor condition.

## WESTMORELAND COAL COMPANY

Magee.—A new mine, modern in construction and in very good condition as to ventilation, drainage and general condition.

## MOUNT PLEASANT COKE COMPANY

Boyer Nos. 1 and 2.—In good condition. No. 1 mine is nearly exhausted.

## MOUNT PLEASANT CONNELLSVILLE COKE COMPANY

Mount Pleasant.—In excellent condition.

## VETERAN COKE COMPANY

Veteran.—Ventilation good except in two entries, due to the breaking down of a door. Drainage good.

## CLARE COKE COMPANY

Clare.—In excellent condition.

## COCHRAN BROTHERS

Spring Grove.—Fairly well ventilated, but in some parts the air current was not strong enough at the face of the workings.

## B. F. KEISTER AND COMPANY

Franklin.—In good condition.

## SUNSHINE COAL AND COKE COMPANY

Hester.—In good condition.

## YOUGHIOGHENY AND OHIO COAL COMPANY

Osborne Nos. 1 and 2.—Ventilation was good except in No. 2 mine, where the air was not conducted to the face of some of the workings. Drainage good.

## MAGEE COKE COMPANY

Magee.—Ventilation was excellent, but the roadways in some places were wet and muddy.

## BROWNFIELD-CONNELLSVILLE COKE COMPANY

Myers.—Ventilation was not satisfactory. Drainage was good.

## BESSEMER COKE COMPANY

Humphreys.—In good condition.

## ECHARD COAL AND COKE COMPANY

Murphy.—In good condition.

## AMERICAN SHEET AND TIN PLATE COMPANY

Scottdale.—Ventilation was good, but the drainage was defective in some parts of the mine.

## BRUSH RUN COAL AND COKE COMPANY

Brush Run.—Ventilation and drainage excellent.

## PEERLESS-CONNELLSVILLE COKE COMPANY

Carolyn.—In fair condition. Ventilation in some parts of the mine needs to be improved.

## KAINE AND WILKEY COKE COMPANY

Anica.—In good condition, except that the miners were burning a poor grade of illuminating oil.

## MARION COKE COMPANY

Marion.—Ventilating currents at the face of the workings were weak. Drainage was good.

## PERRY COKE COMPANY

Martin.—Ventilation and drainage were in good condition. A new drift has been opened during the year.

## CONNELLSVILLE MUTUAL COKE COMPANY

Love.—In good condition.

## MAJESTIC COKE COMPANY

Bethney.—Ventilation is produced by natural means, and, consequently, the air current was weak around the face of the workings.

## IMPROVEMENTS

## H. C. FRICK COKE COMPANY

Buckeye.—One permanent overcast was constructed for the purpose of preventing persons from traveling on haulage.

Chambers.—One permanent overcast was built.

Hecla No. 1.—One stone and brick overcast and ten brick stoppings were constructed; concrete floor in pump room; 550 cubic yards of masonry and steel "I" beams were constructed at bottom of shaft. The ventilation was increased about 40,000 cubic feet per minute by taking out an old stairway and installing hoisting apparatus at the air shaft; a brick mine office was built inside the mine.

Hecla No. 2.—Fifty-one permanent stoppings and three permanent overcasts were built; 200 feet of wooden air bridge was replaced by masonry and the hoisting shaft was retimbered and lined. A rescue station, 20 x 30 feet, equipped with four Draeger rescuing apparatuses complete, was constructed for the training of men in the proper use of helmets.

Hecla No. 3.—Six brick stoppings and a brick and stone overcast were constructed.

Mammoth Shaft.—Four permanent overcasts and eight permanent stoppings were built; an additional air course from shaft bottom to No. 3 right heading. A 12-6 x 17-6 foot air shaft, 297 feet deep, with stairway, has been sunk at the back of the workings for ventilation and a means of egress. Haulage extended on No. 6 left entry 2,400 feet. One 150 horse-power boiler and two 80 horse-power boilers were installed; 5,200 feet of 8-inch and 10-inch water line was laid.

Mammoth Slope.—One overcast, two stoppings and a manway to No. 19 flat right entry were constructed; two 80 horse-power boilers and two 12 x 14 x 16 inch air compressors were installed; a 15-foot extension was built to brick boiler house.

Marguerite.—An increase power for pumping water was installed on surface to operate pumps with steam instead of air, which consists of four boilers and one 16-inch bore hole, 258 feet deep, used for live and exhaust steam; thirty permanent stoppings and one overcast were built.

Mutual.—One underground tail rope haulage, 11,400 feet long, with one 18 x 30 inch direct Vulcan engine was installed; new engine erected.

Painter.—One overcast and ten brick stoppings to enclose fire section were constructed.

Southwest "A."—Three overcasts and twenty brick stoppings were constructed; a brick mine office was built inside of mine.

Southwest King.—A 12-foot Johnston fan was installed.

Southwest No. 3.—A new Robinson fan, 3 feet 3 inches by 12 feet, and two 2-flue 45 horse-power boilers were installed.

Standard Shaft Nos. 2 and 3.—One permanent overhead bridge, four brick overcasts and 127 brick stoppings were built; haulage extended 6,800 feet.

United.—Seven permanent stoppings; one 150 horse-power tubular boiler installed, and a 24 x 48 feet addition to blacksmith and carpenter shop constructed.

## WESTMORELAND COAL COMPANY

Magee.—Eleven brick overcasts and sixty concrete stoppings were built.

## W. J. RAINEY

Acme.—Ten permanent stoppings were constructed.

## SUNSHINE COAL AND COKE COMPANY

Hester.—An air shaft, 7 x 8 x 16 feet, was sunk and area of furnace increased to improve ventilation.

## ECHARD COAL AND COKE COMPANY

Murphy.—A five million gallon reservoir with pumps and necessary buildings were constructed.

## PEERLESS-CONNELLSVILLE COKE COMPANY

Carolyn.—A tippie was erected and one Boyts and Porter deep well pump installed.

---

PROSECUTIONS FOR VIOLATIONS OF THE MINING LAWS

August 23, information was made against John Nicholas and Walter Betuary for burning impure illuminating oil in the Grace mine of W. J. Rainey. Defendants entered a plea of guilty and were ordered to pay costs of prosecution.

October 28, information was made against Marius Durieus, charged with taking matches and smoker's articles into the Mammoth Slope mine of the H. C. Frick Coke Company. Defendant entered a plea of guilty and was ordered to pay a fine of five dollars and costs.

November 29, information was made against Tony Cost, charged with carrying matches into the Standard Shaft mine of the H. C. Frick Coke Company. He was tried before a jury, who returned a verdict of guilty. The Court sentenced him to pay a fine of five dollars and costs.

December 7, information was made against Spanislaw Smider, charged with taking matches into the Standard Shaft mine of the H. C. Frick Coke Company. Defendant entered a plea of guilty and was sentenced to pay a fine of one dollar and be confined in jail for a period of two months and ten days.

December 10, information was made against Mike Shoals, Mike Galona and Ignace Deus, for taking matches into the Standard No. 2 mine of the H. C. Frick Coke Company. Shoals and Galona entered a plea of guilty. Shoals was ordered to pay a fine of one dollar and costs, and Galona to pay a fine of five dollars and costs. Deus is a fugitive from justice.

### MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the City Hall, Scottdale, April 6, 7, 8 and 9.

The Board of Examiners was composed of Alexander McCanch, Inspector, William Duncan, Superintendent, and P. P. Glenn, Mine Foreman. There were twenty-nine applicants examined, sixteen for certificates as Mine Foremen and thirteen for certificates as Fire Bosses. The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

#### First Grade

Robert W. Maher and Paul Klaas.

## ***TWELFTH DISTRICT***

---

INDIANA, JEFFERSON, ARMSTRONG AND CLEARFIELD COUNTIES

---

Punxsutawney, Pa., March 15, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I transmit herewith the annual report of the Twelfth Bituminous District for the year ending December 31, 1909.

Respectfully submitted,

ROGER HAMPSON,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 76        |
| Number of mines in operation, .....                                   | 76        |
| Number of tons of coal shipped to market, .....                       | 6,445,987 |
| Number of tons used at mines for steam and heat, .....                | 287,902   |
| Number of tons sold to local trade and used by employes, ..           | 33,565    |
| Number of tons used in the manufacture of coke, .....                 | 1,001,009 |
| Number of tons of coal produced, .....                                | 7,768,463 |
| Number of tons of coke produced, .....                                | 588,078   |
| Number of coke ovens, .....                                           | 2,357     |
| Number of coke ovens in operation, .....                              | 2,357     |
| Number of tons of coal produced by pick mining, .....                 | 1,742,079 |
| Number of tons produced by compressed air machines, ..                | 6,011,384 |
| Number of tons produced by electrical machines, .....                 | 15,000    |
| Number of persons employed inside of mines, .....                     | 8,615     |
| Number of persons employed outside, including coke<br>workers, .....  | 1,943     |
| Number of persons employed at manufacture of coke, ....               | 578       |
| Number of fatal accidents inside of mines, .....                      | 22        |
| Number of fatal accidents outside, .....                              | 1         |
| Number of non-fatal accidents inside of mines, .....                  | 78        |
| Number of non-fatal accidents outside, .....                          | 2         |
| Number of tons of coal produced per fatal accident inside, ..         | 353,112   |
| Number of persons employed per fatal accident inside, ...             | 392       |
| Number of persons employed per fatal accident outside, ..             | 1,943     |
| Number of persons employed per non-fatal accident inside, ..          | 110       |
| Number of persons employed per non-fatal accident out-<br>side, ..... | 971       |
| Number of wives made widows, .....                                    | 9         |
| Number of children made orphans, .....                                | 36        |
| Number of steam locomotives used inside of mines, ....                | —         |
| Number of steam locomotives used outside, .....                       | 9         |
| Number of compressed air locomotives used inside, .....               | —         |
| Number of compressed air locomotives used outside, ....               | —         |
| Number of electric motors used inside, .....                          | 135       |
| Number of electric motors used outside, .....                         | —         |
| Number of fans in use, .....                                          | 56        |
| Number of furnaces in use, .....                                      | 21        |
| Number of gaseous mines in operation, .....                           | 11        |
| Number of non-gaseous mines in operation, .....                       | 65        |
| Number of new mines opened, .....                                     | —         |
| Number of old mines abandoned, .....                                  | —         |

## TABLE A

## PRODUCTION OF COAL

| Names of Operators                                    | Tons      |
|-------------------------------------------------------|-----------|
| Rochester and Pittsburg Coal and Iron Company, .....  | 2,282,601 |
| Cowanshaunock Coal and Coke Company, .....            | 818,599   |
| Buffalo and Susquehanna Coal and Coke Company, .....  | 802,903   |
| Jefferson and Clearfield Coal and Iron Company, ..... | 794,951   |
| Clearfield Bituminous Coal Corporation, .....         | 489,056   |
| Pennsylvania Coal and Coke Company, .....             | 340,963   |
| Cascade Coal and Coke Company, .....                  | 283,196   |
| Ellsworth-Dunham Coal Company, .....                  | 190,898   |
| Berwind-White Coal Mining Company, .....              | 173,574   |
| Seneca Coal Mining Company, .....                     | 172,233   |
| Urey Ridge Coal Company, .....                        | 170,293   |
| Wharton Coal and Coke Company, .....                  | 138,245   |
| John McLeavy and Company, .....                       | 132,677   |
| Punxsutawney Coal Mining Company, .....               | 124,678   |
| Anita Coal Mining Company, .....                      | 120,848   |
| Summit Coal Company, .....                            | 103,000   |
| Glenwood Coal Company, .....                          | 92,865    |
| Indiana Coal Company, .....                           | 80,600    |
| Valier Coal Company, .....                            | 66,512    |
| Tearing Run Coal Company, .....                       | 58,691    |
| Bowersville Coal Company, .....                       | 55,296    |
| Bear Run Coal Company, .....                          | 54,421    |
| Madeira-Hill Coal Mining Company, .....               | 54,277    |
| Graceton Coke Company, .....                          | 53,931    |
| S. A. Rinn and Company, .....                         | 47,257    |
| Cortez Coal Company, .....                            | 32,225    |
| Hillsdale Coal and Coke Company, .....                | 24,506    |
| Chestnut Ridge Coal Company, .....                    | 5,077     |
| Clark Brothers Coal Mining Company, .....             | 4,070     |
| Total, .....                                          | 7,768,463 |

## Production by Counties

|                   |           |
|-------------------|-----------|
| Indiana, .....    | 3,588,861 |
| Jefferson, .....  | 3,203,726 |
| Armstrong, .....  | 921,599   |
| Clearfield, ..... | 54,277    |
| Total, .....      | 7,768,463 |

TABLE B.—Fatal and non-fatal accidents inside and outside of mines; number of tons of coal produced per accident; number of persons employed; number employed per accident

| Names of Operators                          | Fatal Accidents |         | Non-Fatal Accidents |       | Tons of coal produced per fatal accident inside | Tons of coal produced per non-fatal accident inside | Number of employees inside | Number of employees outside | Total number of employees | Number of employees inside per fatal accident | Number of employees outside per fatal accident | Number of employees inside per non-fatal accident | Number of employees outside per non-fatal accident |

TABLE 4.—Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person         | Nationality     | Occupation          | Age | Married or single | Number of widows | Number of orphans | Name of Mine            | County         | Nature and Cause of Accident in Brief                        |
|------------------|------------------------|-----------------|---------------------|-----|-------------------|------------------|-------------------|-------------------------|----------------|--------------------------------------------------------------|
| Feb. 3           | Nicholas Tomasina, --- | Italian, ---    | Driver, ---         | 28  | S                 | ---              | ---               | Ernest No. 5, ---       | Indiana, ---   | Killed by mine cars on heading.                              |
| March 2          | Joseph Poliski, ---    | Lithuanian, --- | Miner, ---          | 40  | S                 | 1                | 5                 | Sagamore No. 13, ---    | Armstrong, --- | Killed by fall of coal from a pillar.                        |
| April 9          | Clair Connor, ---      | American, ---   | Miner, ---          | 20  | S                 | ---              | ---               | Glenwood No. 11, ---    | Indiana, ---   | Fatally burned by explosion of can of powder.                |
| 23               | Ricardo Bovalsto, ---  | Italian, ---    | Miner, ---          | 24  | S                 | ---              | ---               | Yatesboro No. 3, ---    | Armstrong, --- | Killed by fall of roof at face of room.                      |
| June 29          | Thomas Lindsey, ---    | Scotch, ---     | Doorboy, ---        | 16  | S                 | ---              | ---               | Florence No. 1, ---     | Jefferson, --- | Killed by mine cars on slope.                                |
|                  | Maleposa Sabatino, --- | Italian, ---    | Miner, ---          | 34  | S                 | ---              | ---               | Wharton, ---            | Indiana, ---   | Killed by fall of top coal at face of his room.              |
| July 19          | Dominic Regino, ---    | Italian, ---    | Miner, ---          | 19  | S                 | ---              | ---               | Eleanora No. 2, ---     | Jefferson, --- | Killed by fall of coal from a stump.                         |
| Aug. 7           | Edward Siverling, ---  | American, ---   | Miner, ---          | 47  | M                 | 1                | 5                 | Cortez, ---             | Jefferson, --- | Killed by fall of roof at a pillar.                          |
| 16               | Mike Fatad, ---        | Slavonian, ---  | Miner, ---          | 26  | M                 | 1                | 1                 | Ernest No. 2, ---       | Indiana, ---   | Killed by fall of coal at face of heading.                   |
| 17               | Angelo Gallo, ---      | Italian, ---    | Miner, ---          | 31  | S                 | ---              | ---               | Ernest No. 1, ---       | Indiana, ---   | Killed by fall of coal from a pillar.                        |
| 24               | Joseph Urenus, ---     | Croatian, ---   | Miner, ---          | 23  | S                 | ---              | ---               | Wharton, ---            | Indiana, ---   | Killed by fall of top coal at face of room.                  |
| Sept. 14         | Tony Urko, ---         | Polish, ---     | Miner, ---          | 33  | M                 | 1                | 3                 | Eleanora No. 3, ---     | Jefferson, --- | Killed by fall of roof while pulling heading stumps.         |
|                  | W. A. Lewis, ---       | American, ---   | Company man, ---    | 21  | S                 | ---              | ---               | Yatesboro No. 2, ---    | Armstrong, --- | Killed by coming in contact with electric wire.              |
| 20               | Joseph Ban, ---        | Italian, ---    | Miner, ---          | 43  | M                 | 1                | 5                 | Indiana No. 5, ---      | Indiana, ---   | Killed by fall of roof near face of room.                    |
| 29               | John Yurko, ---        | Slavonian, ---  | Machine cutter, --- | 36  | M                 | 1                | 7                 | West Eureka No. 7, ---  | Jefferson, --- | Fatally burned by explosion of gas cutting through a pillar. |
| Nov. 6           | John H. Faith, ---     | American, ---   | Machine cutter, --- | 35  | M                 | 1                | 4                 | Graceton No. 3, ---     | Indiana, ---   | Killed by fall of roof while cutting at face of room.        |
| 18               | Roy Keller, ---        | Slavonian, ---  | Scrapper, ---       | 27  | M                 | 1                | ---               | Hillman, ---            | Jefferson, --- | Killed by mine cars on heading.                              |
| 19               | Bogomy Augurty, ---    | Polish, ---     | Driver, ---         | 16  | S                 | ---              | ---               | Canoee Ridge No. 4, --- | Indiana, ---   | Killed by mine car. Outside.                                 |
| 27               | Joseph Tanerack, ---   | Italian, ---    | Scrapper, ---       | 40  | S                 | 1                | 6                 | Eleanora Shaft, ---     | Jefferson, --- | Killed by mine timber falling, on heading.                   |
| Dec. 7           | Melvin Cessna, ---     | American, ---   | Miner, ---          | 25  | S                 | ---              | ---               | Yatesboro No. 2, ---    | Armstrong, --- | Killed by fall of roof at room face.                         |
| 15               | Rosea Josea, ---       | Austrian, ---   | Miner, ---          | 19  | S                 | ---              | ---               | Yatesboro No. 3, ---    | Armstrong, --- | Killed by fall of roof at room face.                         |
|                  | Frank Kuchok, ---      | Polish, ---     | Miner, ---          | 26  | S                 | ---              | ---               | Arcadia No. 40, ---     | Indiana, ---   | Killed by fall of coal at face of room.                      |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person         | Nationality   | Occupation      | Age | Married or single | Name of Mine                  | County     | Nature and Cause of Accident in Brief                                                       |
|------------------|------------------------|---------------|-----------------|-----|-------------------|-------------------------------|------------|---------------------------------------------------------------------------------------------|
| Jan. 4           | Tony Smelko, -----     | Polish, ----  | Loader, -----   | 35  | M                 | Eleanora Shaft, -----         | -----      | Pelvis fractured by being struck by fall of coal at face of room.                           |
| 6                | John Boldy, -----      | Slavonian, -- | Loader, -----   | 26  | M                 | Florence No. 1, -----         | -----      | Hip and thigh injured by fall of coal at face of room.                                      |
|                  | Evan Moline, -----     | Swedish, --   | Loader, -----   | 22  | S                 | Florence No. 1, -----         | -----      | Hip bruised and bone fractured by fall of bone coal at face of room.                        |
| 9                | George Cowie, -----    | Scotch, ----- | Employee, ----- | 30  | M                 | Eleanora No. 2, -----         | -----      | Collar bone broken by fall of coal at face of room.                                         |

| Dec. 22 | Thomas Lombard, ---   | Italia, ---   | Employe, ----- | 19 | S | Yatesboro No. 4,    | Armstrong, ----  | Leg broken. He was knocked off his motor on heading by electric shock. |
| 23      | Thomas Paressa, ----  | Italian, ---- | Miner, -----   | 45 | M | Walston No. 6, ---- | Jefferson, ----- | Leg broken by being caught between bumpers of mine car on heading.     |
| 31      | Godfrey Stifer, ----- | American, --  | Miner, -----   | 32 | M | Wharton, -----      | Indiana, -----   | Ankle sprained and hand cut by fall of coal in room.                   |

## CONDITION OF MINES

## ROCHESTER AND PITTSBURG COAL AND IRON COMPANY

This company still continues to lead in the production of coal and coke in the district. All of their mines worked during the year. The Adrian mine was visited at different intervals and was always found in good condition as regards ventilation and drainage; it is one of the company's largest producers.

Florence Nos. 1 and 2.—In good condition as regards ventilation and drainage.

Eleanora Nos. 1 and 2.—Drainage and ventilation were always up to the standard.

Eleanora Shaft is worked exclusively with locked safety lamps and the number of lamps in use runs from 150 to 170 per day; a few employes are at work on the night shift. They have put in a sprinkling system in the headings going to the west and north, and have the system partly installed on the east side of the shaft and in the shaft and the headings leading off these. They sprinkle the faces, sides, and slack coal in the rooms. There are also shot-firers employed to do the shooting and one of the permissible explosives, Coalite, is used, but so far as I can see there is no difference in the size of the coal blasted, as it is a question of gauging the proper amount of powder for each shot, which cannot always be done. The general condition of the mine was good, and everything was being done to keep the mine safe.

Walston No. 3.—Is almost exhausted and no solid work is being driven. Most of it is retreating work with the pillars and stumps. The mine is in good condition as a whole. They are opening another mine close to No. 8. These mines are located in Jefferson county. The company has started at Lucerne, Indiana county, a large operation, consisting of a shaft and two drifts, connected inside. A large area of work is opened up.

## COWANSHANNOCK COAL AND COKE COMPANY

Yatesboro Nos. 2, 3 and 4.—Drainage and ventilation were always good.

## BUFFALO AND SUSQUEHANNA COAL AND COKE COMPANY

At Sagamore, where the large operations of this company are located, the mines have worked reasonably well during the year. The ventilation was good. Each mine has a modern Clifford fan, run by electricity, and the fans are all run at the same speed. Drainage was also good.

At the B. and S. Shaft No. 3 the condition of the drainage and ventilation was good.

## JEFFERSON AND CLEARFIELD COAL AND IRON COMPANY

Ernest Nos. 1, 2, 3, 4 and 5.—In good condition as to ventilation and drainage. Nos. 1, 2, 3 and 4 mines are connected and the ventilation is produced by Capell, Robinson and Stine fans.

## CLEARFIELD BITUMINOUS COAL CORPORATION

Canoe Ridge Nos. 2, 3 and 4.—In good condition as to ventilation and drainage.

## PENNSYLVANIA COAL AND COKE COMPANY

Arcadia Nos. 40, 41, 42, 43 and 44.—These are drift mines. They were in very fair condition. The company is making an effort to improve the condition, so as to come fully up to the requirements of the law.

## BERWIND-WHITE COAL MINING COMPANY

West Eureka Nos. 6 and 7.—In good condition. The No. 6 mine did not ship any coal, but mined only enough to keep the compressors and steam engines going to keep the mines free from water.

The No. 7 mine has not driven any solid work during the year, but the work has been confined to the drawing of pillars and stumps and working some rooms.

## CASCADE COAL AND COKE COMPANY

Sykesville Shaft.—Drainage and ventilation good.

## ELLSWORTH-DUNHAM COAL COMPANY

Victor Nos. 11 and 14.—In good condition. Only a few men at work in the slope portion of the mine adjoining No. 11.

## SENECA COAL MINING COMPANY

Seneca.—Ventilation and drainage good. This is getting to be quite a large mine.

## JOHN McLEAVY AND COMPANY

Sholler.—In good condition.

## UREY RIDGE COAL COMPANY

Urey Ridge Nos. 1, 3 and 6.—In good condition as to ventilation and drainage.

## INDIANA COAL COMPANY

Indiana Nos. 3, 4, 5, 7 and 8.—Some of the mines of this company worked during the year and some were idle. As a rule they were found in good condition as to ventilation and drainage.

## GLENWOOD COAL COMPANY

Glenwood Nos. 3, 9 and 11.—Nos. 3 and 9 mines are nearly worked out. They are working the upper vein and are also going to start up some of the old mines. The general condition of the mines was good.

## ANITA COAL MINING COMPANY

Anita No. 1.—Ventilation and drainage good.

## PUNXSUTAWNEY COAL MINING COMPANY

Francis.—Ventilation and drainage good. They have driven a great deal of heading at this mine and have increased their haulage capacity, and are now shipping a large amount of coal.

## BOWERSVILLE COAL COMPANY

Hillman.—Ventilation and drainage good.

## S. A. RINN AND COMPANY

Walston No. 1.—This mine is now on the retreat in both the slope and the drift. Drainage and ventilation good.

Adrain No. 2.—This mine has been reopened after having been closed for a number of years. They are taking out the pillars and the solid coal that was left. The mine was in good condition when visited.

## BEAR RUN COAL COMPANY

Bear Run.—Ventilation and drainage good. They have cut into the old mine at upper end of the workings.

## SUMMIT COAL COMPANY

Summit.—The general condition was good.

## CORTEZ COAL COMPANY

Cortez.—Ventilation fair. Drainage was poor on account of the old workings that they cut into so often.

## CHESTNUT RIDGE COAL COMPANY

Indiana No. 6.—This mine worked during only the latter part of the year.

## VALIER COAL COMPANY

Valier.—Ventilation and drainage very fair. There is not much solid work now in the mine, as the fault seems to be cutting them off.

## MADEIRA-HILL COAL MINING COMPANY

Clover Run Nos. 1 and 2.—In good condition as to ventilation and drainage.

## HILLSDALE COAL AND COKE COMPANY

Hillsdale Nos. 2 and 3.—No. 2 mine worked the greater part of the year and was in good condition. It is now being pulled back. No. 3 mine was in fair condition.

## CLARK BROTHERS COAL MINING COMPANY

Falcon Nos. 5, 7 and 8.—These mines did not come under the law and were not visited.

## WHARTON COAL AND COKE COMPANY

Wharton.—Drainage and ventilation were always found up to the standard at the different visits. Most of the coal mined here is made into coke, and they have a very complete coking plant.

## GRACETON COKE COMPANY

Graceton Nos. 2 and 3.—There are two mines here, but one was idle the greater portion of the year. The general condition of the mines was good. They have a complete coking plant and washery, and most of the coal is coked.

## TEARING RUN COAL COMPANY

Tearing Run.—This is a slope mine on the adjoining property to Graceton. Condition of the mine was good.

## IMPROVEMENTS

## ROCHESTER AND PITTSBURG COAL AND IRON COMPANY

At the Lucerne operation they have put in a big hoisting plant at the shaft and equipped the shaft with cages that hold two large cars, tandem, at one time; and near the foot of the shaft they have installed a large Scranton pump, as they will ultimately have to handle a large volume of water at this point, it being the drainage point for a large territory of coal. They have also started work on a large steel tippie, located midway between the shaft and the drifts. All the coal will be brought to this central tippie and it is expected to be one of the largest operations in the State.

Between the shaft and the drifts they have installed a large and most complete Clifford fan, capable of producing a large volume of air, and at the foot of the shaft the current is split, so that one portion goes to the shaft and the other to the drifts. The fan will be capable of furnishing ventilation for a good many years.

## COWANSHANNOCK COAL AND COKE COMPANY

Yatesboro Nos. 2, 3 and 4.—Have started work on a large slope that will ultimately cut across the face of the workings of No. 4 mine, and a large hoisting plant and fan will be erected there. The railway has been built up to this point, and this operation will soon be completed.

## CASCADE COAL AND COKE COMPANY

Sykesville Shaft.—A shaft, 12 x 12 feet area and 200 feet deep, has been sunk near the face of the mine workings, and equipped with stairs so that men can go out, if necessary.

## BOWERSVILLE COAL COMPANY

Hillman.—A new tippie has been built and the haulage system changed to meet the new conditions.

## TEARING RUN COAL COMPANY

Tearing Run.—A large compressor has been installed, and this will give power for pumping and allow the pushing down of the main slope toward the basin.

## MADEIRA-HILL COAL MINING COMPANY

Clover Run Nos. 1 and 2.—They have put in an electrical power plant for hauling and have also installed a 12-foot diameter Stine fan.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of candidates for certificates of qualification as Mine Foremen and Fire Bosses was held in Punxsutawney April 6 and 7.

The Board of Examiners was composed of Roger Hampson, Mine Inspector; John Reed, Superintendent, and James Wood, Mine Foreman.

The following candidates passed a successful examination and were granted certificates:

## Mine Foremen—First Grade

Robert Maloney, DeLancey; E. E. Hewitt, DeLancey; John Hammond, Eleanora; Wilfred Johnson, Sagamore; John J. Ganley, Punxsutawney; Evan Morgan, Lucerne; James N. Patterson, Ernest; Richard Joseph, Horatio.

## Mine Foremen—Second Grade

George Armstrong, Iselin; William P. Jones, Iselin; John F. Noble, Onondaga; Thomas Madden, Eleanora; John Aikman, Stockdale; Bernard J. Ganley, Punxsutawney; James McLeavey, Punxsutawney; William Lewis, Horatio; E. M. Scott, Sagamore.

## Fire Bosses

P. F. Costello, Anita; William Garland, DeLancey; R. C. Patterson, DeLancey; Andrew Watson, Indiana; J. W. Larson, Punxsutawney; P. Flannagan, Eleanora; H. J. Clark, Eleanora; John Lundstrom, Ernest; John P. Anderson, Yatesboro.

## ***THIRTEENTH DISTRICT***

---

ALLEGHENY, WESTMORELAND AND FAYETTE COUNTIES

---

Dravosburg, Pa., February 21, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: In compliance with the Bituminous Mining Laws, I have the honor to transmit herewith my annual report of the Thirteenth Bituminous District for the year ending December 31, 1909.

Respectfully submitted,

JOHN F. BELL,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 36        |
| Number of mines in operation, .....                                   | 32        |
| Number of tons of coal shipped to market, .....                       | 6,105,687 |
| Number of tons used at mines for steam and heat, .....                | 108,188   |
| Number of tons sold to local trade and used by employes, .....        | 19,400    |
| Number of tons used in the manufacture of coke, .....                 | 83,130    |
| Number of tons of coal produced, .....                                | 6,316,405 |
| Number of tons of coke produced, .....                                | 49,153    |
| Number of coke ovens, .....                                           | 233       |
| Number of coke ovens in operation, .....                              | 233       |
| Number of tons of coal produced by pick mining, .....                 | 1,640,054 |
| Number of tons produced by compressed air machines, ..                | 175,466   |
| Number of tons produced by electrical machines, .....                 | 4,500,885 |
| Number of persons employed inside of mines, .....                     | 6,996     |
| Number of persons employed outside, including coke<br>workers, .....  | 992       |
| Number of persons employed at manufacture of coke, ..                 | 83        |
| Number of fatal accidents inside of mines, .....                      | 20        |
| Number of fatal accidents outside, .....                              | 4         |
| Number of non-fatal accidents inside of mines, .....                  | 55        |
| Number of non-fatal accidents outside, .....                          | 3         |
| Number of tons of coal produced per fatal accident inside, ..         | 315,820   |
| Number of persons employed per fatal accident inside, ..              | 350       |
| Number of persons employed per fatal accident outside, ..             | 248       |
| Number of persons employed per non-fatal accident inside, ..          | 127       |
| Number of persons employed per non-fatal accident out-<br>side, ..... | 331       |
| Number of wives made widows, .....                                    | 14        |
| Number of children made orphans, .....                                | 27        |
| Number of steam locomotives used inside of mines, ....                | 5         |
| Number of steam locomotives used outside, .....                       |           |
| Number of compressed air locomotives used inside, ....                |           |
| Number of compressed air locomotives used outside, ....               |           |
| Number of electric motors used inside, .....                          | 54        |
| Number of electric motors used outside, .....                         |           |
| Number of fans in use, .....                                          | 36        |
| Number of furnaces in use, .....                                      | 4         |
| Number of gaseous mines in operation, .....                           | 24        |
| Number of non-gaseous mines in operation, .....                       | 8         |
| Number of new mines opened, .....                                     |           |
| Number of old mines abandoned, .....                                  | 1         |

TABLE A

## PRODUCTION OF COAL

| Names of Operators                                          | Tons      |
|-------------------------------------------------------------|-----------|
| Pittsburg Coal Company, .....                               | 3,365,110 |
| Monongahela River Consolidated Coal and Coke Company, ..... | 1,363,948 |
| Penn Gas Coal Company, .....                                | 528,868   |
| Blaine Coal Company, .....                                  | 480,140   |
| United Coal Company, .....                                  | 348,234   |
| Youghiogheny and Ohio Coal Company, .....                   | 86,236    |
| Lake Shore Gas Coal Company, .....                          | 46,586    |
| Clair and Rockwell Coal Company, .....                      | 38,550    |
| Belle Bridge Mining Company, .....                          | 30,852    |
| Bowman Brothers Company, .....                              | 16,325    |
| Smithdale Coal Company, .....                               | 6,305     |
| Myers Coal Company, .....                                   | 5,251     |
| Total, .....                                                | 6,316,405 |

## Production by Counties

|                     |           |
|---------------------|-----------|
| Allegheny, .....    | 3,434,084 |
| Westmoreland, ..... | 1,960,191 |
| Fayette, .....      | 922,130   |
| Total, .....        | 6,316,405 |

TABLE C.—Classification of Fatal Accidents Inside and Outside of Mines

|                                        | Months  |          |       |       |     |      |      |        |           |         |          |          |        |             |
|----------------------------------------|---------|----------|-------|-------|-----|------|------|--------|-----------|---------|----------|----------|--------|-------------|
|                                        | January | February | March | April | May | June | July | August | September | October | November | December | Totals | Percentages |
| Causes of Accidents Inside             |         |          |       |       |     |      |      |        |           |         |          |          |        |             |
| Falls of slate, -----                  | 1       | 3        |       |       | 1   | 2    | 1    |        | 1         | 2       |          | 2        | 13     | 65.00       |
| Falls of roof, -----                   |         |          |       | 1     | 1   |      |      |        |           |         |          |          | 2      | 10.00       |
| Mine cars, -----                       |         |          | 1     | 1     | 1   |      |      |        |           |         |          |          | 3      | 15.00       |
| Electricity, -----                     |         |          |       |       |     |      |      | 2      |           |         |          |          | 2      | 10.00       |
| Totals, -----                          | 1       | 3        | 1     | 2     | 3   | 2    | 1    | 2      | 1         | 2       |          | 2        | 20     | 100.00      |
| Causes of Accidents Outside            |         |          |       |       |     |      |      |        |           |         |          |          |        |             |
| Cars, -----                            |         |          |       |       | 2   |      |      |        |           |         |          |          | 2      | 50.00       |
| Miscellaneous, -----                   |         |          |       |       |     |      |      |        | 1         |         |          | 1        | 2      | 50.00       |
| Totals, -----                          |         |          |       |       | 2   |      |      |        | 1         |         |          | 1        | 4      | 100.00      |

| Dec. | 9  | John Lukoch, ----- | Hungarian, Loader, -----      | 38 | M. | 1     | 3     | Forest Hill, ----- | Allegheny, -----    | Fatally injured by fall of slate at face of room.                                                                                                                                                                                                                                                                                                                                                                                                                      |
|      | 20 | John Gregof, ----- | Russian, ---                  | 53 | M. | 1     | ----- | West Newton, ----- | Westmoreland, ----- | Fatally injured by fall of slate on pillar work.                                                                                                                                                                                                                                                                                                                                                                                                                       |
|      | 30 | Melle Tinko, ----- | Slavonian, Car trimmer, ----- | 27 | S. | ----- | ----- | Blaine, -----      | Allegheny, -----    | Fatally injured by being struck with a wire rope. Tinko and three other persons were pulling two loaded cars from the tippie with an engine and a wire rope passing through two movable blocks. When they reached a point where Tinko had to uncouple the rope, they failed to get the engine stopped. The block was simply hooked to a guard rail, and as the cars went on became unhooked, and the tension on the rope caused it to fly up and strike Tinko. Outside |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person         | Nationality    | Occupation      | Age | Married or single | Name of Mine           | County              | Nature and Cause of Accident in Brief                                                                        |

| 23               | Albert Kumisky, ----   | Polish, --    | Loader, --          | 34  | M.                | Ocean No. 5, ----     | Allegheny, ---- | Leg broken by fall of slate at face of room.                                                              |
| 29               | James Devits, ----     | Italian, --   | Miner, --           | 31  | M.                | Ocean No. 2, ----     | Allegheny, ---- | Hip injured by fall of slate on pillar work.                                                              |

## CONDITION OF MINES

## PITTSBURG COAL COMPANY

Banning No. 1.—Ventilation and drainage good. Improved water-cars are used to water the mine. Permissible explosives used exclusively in the mine. Ninety safety lamps in use.

Banning No. 2.—Ventilation good. Drainage as a whole good. Improved water-cars are used to water the mine. Permissible explosives are used in parts of the mine, and I recommended that these explosives be used exclusively. One hundred and seventy-five safety lamps in use.

Euclid.—Ventilation and drainage good. Improved water-cars are used to lay the dust; the exhaust steam from a pump is also turned into the intakes. Permissible explosives used in parts of the mine, and I recommended that these explosives be used exclusively. Fifty safety lamps in use.

Eureka.—Ventilation good. Drainage good, except in the slope section.

Forest Hill.—Ventilation and drainage good. Shelter holes are required on haulage roads. Improved water-car is used. Sixty-one safety lamps are in use, and I recommended that permissible explosives be used for blasting.

A serious mine fire occurred on the afternoon of May 2. Two roadmen were on their way out of the mine when they discovered the fire on No. 8 face at 13 west entries, where an electric pump was located. A trap door, about three feet from the pump, was burning when discovered, and the brisk air current passing over the fire soon had it beyond control. They notified the mine officials, and several attempts were made to reach the fire, but failed. The stables were located on the return at No. 7 west, and an effort was made to save the stock, but the smoke from the fire had reached the stable and fifteen mules were suffocated.

The superintendent and several others were on No. 8 face at some distance from the fire, when an explosion occurred, which spent its force towards the main entrance. They all retreated by way of the air-shaft located near the face of the main entries. It was decided to seal off the west side of the mine with brick stoppings. The entries from No. 1 west to No. 15 west entries were sealed up and a vent pipe was placed in the stopping at 13 west parallel. This work was completed on May 6. The fire evidently originated at the electric pump and communicated itself to the trap-door.

Guffey.—Ventilation and drainage good. Twenty-four safety lamps in use. Recommended the use of permissible explosives.

Ocean No. 1.—Ventilation reasonably good. Drainage good. Improved water-cars used to water the mine. Eighty-six safety lamps in use. Recommended that permissible explosives be used for blasting.

Ocean No. 2.—Ventilation and drainage good. Improved water-cars used to water the mine. Eighty-four safety lamps in use. Recommended that permissible explosives be used for blasting.

Ocean Nos. 3 and 4.—In fairly good condition as to ventilation and drainage. Thirty-four safety lamps in use. Recommended the use of permissible explosives.

Ocean No. 5.—The ventilation is very good throughout the mine. Drainage reasonably good. Improved water-cars used to water the mine. Ninety safety lamps in use. Recommended the use of permissible explosives.

Painter and Sarah.—In fairly good condition. Recommended the use of permissible explosives. Thirty-five safety lamps in use in Sarah mine.

Shaner.—Ventilation good. Drainage fairly good. Sixty-four safety lamps in use. Recommended the use of permissible explosives.

Waverly.—Ventilation good. Drainage reasonably good. Twelve safety lamps in use. Improved water-car used to water the mine. Permissible explosives used in parts of the mine and I recommended the exclusive use of these explosives.

Wick Haven.—Ventilation and drainage good. Improved water-cars used to water the mine; also exhaust steam in intake airway. Permissible explosives used in parts of mine and I recommended the exclusive use of these explosives. One hundred and six safety lamps in use.

West Newton.—Condition of mine as to ventilation and drainage reasonably good. Improved water-car used to water the mine. Eighty-four safety lamps in use. Recommended that permissible explosives be used.

Darr and Yough Slope.—Idle.

#### MONONGAHELA RIVER CONSOLIDATED COAL AND COKE COMPANY

Bunola.—In fair condition as to ventilation and drainage. A new drift opening 7 x 10 feet was made near the face of workings and an 8-foot fan installed, which improved the ventilation. Recommended the use of permissible explosives for blasting.

Camden.—The ventilation on last inspection was not satisfactory in parts of the mine. Drainage fairly good. Recommended that the ventilation be improved.

Lovedale.—The ventilation was good, except in the workings of S 1-2 tunnel, where the air current was too weak for efficient ventilation. Drainage fairly good. Thirty-seven safety lamps in use. Recommended that an improved system of watering be provided, and that permissible explosives be used for blasting.

Risher.—Ventilation not satisfactory. Preparations are being made to install a fan near the face of the workings to improve the ventilation. Drainage poor in places. Permissible explosives used in part of the mine.

Rock Run.—In fair condition.

Walton No. 2.—Conditions fair. The ventilation in parts of the mine was not satisfactory. Improvements are being made to increase the ventilation at the face of the workings. Recommended the use of permissible explosives.

Yough No. 2.—The ventilation was fairly good, except in several butt entries, where the air-current was rather weak. Improvements are being made to increase the ventilation in the workings. Drainage good. Improved water-car used and the exhaust steam from the fan turned into the mine. Fifty safety lamps in use. Recommended the use of permissible explosives.

## PENN GAS COAL COMPANY

Penn Gas No. 3.—Ventilation and drainage very good. Main haulage roads neat and clean. Improved water-cars used. Permissible explosives used exclusively, and 100 safety lamps in use.

A fire occurred in this mine on the evening of May 24. Two machine men, who were at work in 22 butt upper mains, discovered that something was wrong with the electric power and went to investigate. On 21 butt they found that a fall had broken down the electric wires and a fire had started. They notified the mine officials, who, on their arrival, found a brisk fire burning. They fought the fire with water until the following day, when it was decided to seal off the two butt entries with brick stoppings. This work was completed on the 26th, and a vent pipe was placed in one of the stoppings. September 11 the sealed section was opened and the fire was found to be extinguished.

## BLAINE COAL COMPANY

Blaine.—Sanitary conditions good. The ventilation in the major portion of the mine was reasonably good, but too sluggish in other parts. Drainage, with a few exceptions, fairly good. The exhaust steam from the fan is turned into the mine, and there are twenty-seven water sprays located in different sections of the mine to saturate the air. Recommended that permissible explosives be used for blasting.

## UNITED COAL COMPANY

Patterson No. 2.—Ventilation and drainage as a whole reasonably good. Improved water-car in use. Permissible explosives used exclusively; 35 safety lamps in use.

## YOUGHIOGHENY AND OHIO COAL COMPANY

Howe.—Ventilation and drainage good. This mine will soon be exhausted.

## LAKE SHORE GAS COAL COMPANY

Ayers Hollow.—Ventilation fairly good, except at the face of the workings. Recommended that the ventilation be improved. Drainage reasonably good. Recommended that permissible explosives be used for blasting.

Dravo.—Idle.

## CLAIR AND ROCKWELL COAL COMPANY

Dilworth.—Conditions fair. The workings are mainly along the crop.

## BELLE BRIDGE MINING COMPANY

Belle Bridge.—Sanitary condition good. Pick mining; no blasting. Leased from the Monongahela River Consolidated Coal and Coke Company.

## BOWMAN BROTHERS COMPANY

Bowman.—General conditions good.

## SMITHDALE COAL COMPANY

Guiler.—Abandoned in April.

## MYERS COAL COMPANY

Osceola.—Not under the law.

The improved water-cars in use in the district sprinkle the sides, roof and floor of entries, and are mainly used on the haulage ways. The success of this system of watering the haulageways depends upon the regular and systematic manner in which it is applied.

## IMPROVEMENTS

## PITTSBURG COAL COMPANY

Banning No. 1.—With a few exceptions all wooden stoppings have been replaced with brick, also jambs of all main doors are built of brick. Five air-locks established in different parts of the mine to maintain a continuous air-current when one of the doors are opened. Cleaned return airways. Drove a rock tunnel through the swamp on the north return airway to prevent the water from blocking the return. Enlarged bottom of airshaft. Installed four improved water-car sprinklers. Made 125 shelter holes on main haulage roads. Built two brick pump houses, enclosing electric pumps. Outside: Frame repair shop built.

Banning No. 2.—Fifteen brick overcasts and two fireproof undercasts, one hundred and fifty brick stoppings, four fireproof pump-houses enclosing electric pumps, and two fireproof griper's shanties built. Additional airway, 4,500 feet long, and traveling way from the old Whitsett entrance. Motor road extended 8,000 feet. One improved enclosed electric mining machine installed.

Euclid.—The ventilation has been improved by building six brick overcasts and twenty-seven brick stoppings, also additional return airways to air shaft. Motor haulage extended 2,000 feet. One 15-ton Jeffery motor installed.

Outside.—One 75 K. W. General Electric generator, driven by a 150 horse-power McEwen engine, with a No. 3 Stillwell and Bierce heater, installed; also one 1,200 barrel supply tank. Head frame plumbed and new guides, size  $5\frac{3}{4}$  x  $6\frac{3}{4}$  inches, placed in the shaft.

Eureka.—One overcast and eighteen brick stoppings built. Installed one pump. Outside.—Engine and sand house built.

Forest Hill.—Thirty-three brick stoppings and five fireproof pump houses, enclosing electric pumps, built. Motor road extended 1,200 feet.

Ocean No. 1.—Fifty brick stoppings and three brick overcasts built; also additional return airway on the right of King tunnel.

Ocean No. 2.—Built ten brick stoppings and one brick overcast; also stable in new section.

Ocean No. 5.—Built forty-five brick stoppings and four brick pump houses enclosing electric pumps.

Sarah.—Two brick stoppings and one concrete pump-house built.

Waverly.—Sixteen brick stoppings built. Motor road extended 1,400 feet. Outside.—Lamp house built.

Wick Haven.—One hundred and forty-five brick stoppings, six brick overcasts and one fireproof pump-house built. Motor road extended 1,000 feet. Additional airway, 2,400 feet long. Outside.—Lamp house built.

West Newton.—Sixteen brick stoppings, one brick overcast, and brick walls built at pumps, dilly engine and safety lamp station. One drilling machine and one 7½ horse power centrifugal pump installed.

#### MONONGAHELA RIVER CONSOLIDATED COAL AND COKE COMPANY

Bunola.—Twenty permanent stoppings and five permanent overcasts built. An 8-foot Stine fan installed.

Lovedale.—Built three concrete overcasts and replaced a number of wooden stoppings with concrete. Outside.—Lamp house built.

Risher.—A drift opening 7 x 10 feet made near face of workings. Additional pump with an 8-inch suction and 6-inch discharge installed. Motor road extended 1,500 feet.

Walton No. 2.—Three permanent overcasts and eight concrete stoppings built. Motor road extended 1,800 feet; 1,200 feet of main return airway cleaned. Sunk a shaft 8 x 8 feet and 34 feet in depth.

Outside.—Installed one stationary engine at the tippie.

Yough No. 2.—Built three brick overcasts and replaced a number of wooden stoppings with concrete.

#### PENN GAS COAL COMPANY

Penn Gas No. 3.—Sixty-two permanent stoppings and fourteen brick overcasts built; also replaced a number of wooden stoppings with brick. Motor road extended 800 feet.

#### BLAINE COAL COMPANY

Blaine.—Six permanent stoppings and one overcast built.

#### UNITED COAL COMPANY

Patterson No. 2.—Forty-one permanent stoppings and four overcasts built. One bore hole 226 feet deep put down for pumping. Additional pump, 10 x 12 inch with an 8-inch suction and 7-inch discharge. Sixteen ton motor and two mining machines installed.

#### BOWMAN BROTHERS COMPANY

Bowman.—A 4-foot American Blower fan installed.

### PROSECUTIONS FOR VIOLATION OF THE MINING LAWS

On information received, Albert West, a miner employed at the Ella mine of the United Coal Company, was arrested, charged with passing a danger signal in said mine. He waived a hearing. A true bill was found March 10. The defendant entered a plea of guilty and the Court sentenced him to thirty days in jail and to pay the costs.

Frank Bane, a loader employed in the Penn Gas No. 3 mine, was charged with carrying black powder into the mine in a sock February 14. He entered a plea of guilty, and was sentenced to pay a fine of twenty dollars and the costs.

John Sesnak, employed at the Sunnyside mine of the Monongahela River Consolidated Coal and Coke Company, was charged with pass-

ing the permanent danger signal on the morning of March 31. He entered a plea of guilty and the Court sentenced him to thirty days in jail and to pay the costs of prosecution.

Angelo Sascini, employed in Ocean No. 1 mine of the Pittsburg Coal Company, was arrested, charged with passing a danger signal. Defendant had a hearing August 21 and was held for court. September 13 the case came on for trial, but the defendant did not appear. The case was tried in his absence and he was found guilty. His recognition was forfeited.

James Cannon, mine foreman at Ocean No. 1 mine, of the Pittsburg Coal Company, was charged with failure to require the workmen in said mine to use locked safety lamps in pillar workings, also to provide shelter holes on part of the motor road. He waived a hearing. November 9 he entered a plea of "nolo contendere" and was sentenced by the Court to pay a fine of six and one-fourth cents and the costs.

On information received, Charles Horwatt, employed at Banning No. 1 mine of the Pittsburg Coal Company, was arrested, charged with passing a danger signal. The defendant had a hearing before Justice of the Peace D. M. Bierer, of Uniontown, and was discharged on the ground that he could not read English, and had only been employed in the mine a short time, and had no instructions as to what a danger signal meant.

### MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the Empire Hall, McKeesport, April 6, 7 and 8.

The Board of Examiners was composed of John F. Bell, Inspector; James Henderson, Superintendent, and William Lauder, Mine Foreman.

There were seventy applicants examined, eighteen for certificates as Mine Foremen and fifty-two for certificates as Fire Bosses. The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

#### First Grade

James Richardson, Albert Hoenshel, John D. Robertson, Robert Daugherty, Edward H. Miller, J. E. O'Hara and William T. Duff.

#### Second Grade

P. B. Schubert.

## ***FOURTEENTH DISTRICT***

---

ALLEGHENY, INDIANA, WESTMORELAND, ARMSTRONG AND BUTLER  
COUNTIES

---

Freeport, Pa., March 12, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I herewith transmit my annual report for the Fourteenth Bituminous District for the year ending December 31, 1909.

I was transferred to this district July 1, 1909, from the Sixteenth District.

The report contains the usual statistics and tables, a brief description of the accidents, the most important improvements made during the year, a report of the annual examination of applicants for mine foremen's certificates, and a report of the legal proceedings.

Respectfully submitted,

DAVID YOUNG,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 77        |
| Number of mines in operation, .....                                   | 66        |
| Number of tons of coal shipped to market, .....                       | 5,441,979 |
| Number of tons used at mines for steam and heat, .....                | 138,164   |
| Number of tons sold to local trade and used by employes, .....        | 94,467    |
| Number of tons used in the manufacture of coke, .....                 | 1,884     |
| Number of tons of coal produced, .....                                | 5,676,494 |
| Number of tons of coke produced, .....                                | 1,095     |
| Number of coke ovens, .....                                           | 60        |
| Number of coke ovens in operation, .....                              | 8         |
| Number of tons of coal produced by pick mining, .....                 | 2,005,988 |
| Number of tons produced by compressed air machines, ..                | 2,380,908 |
| Number of tons produced by electrical machines, .....                 | 1,289,598 |
| Number of persons employed inside of mines, .....                     | 6,174     |
| Number of persons employed outside including coke<br>workers, .....   | 932       |
| Number of persons employed at manufacture of coke, ....               | 1         |
| Number of fatal accidents inside of mines, .....                      | 15        |
| Number of fatal accidents outside, .....                              | 1         |
| Number of non-fatal accidents inside of mines, .....                  | 23        |
| Number of non-fatal accidents outside, .....                          |           |
| Number of tons of coal produced per fatal accident inside, ..         | 378,433   |
| Number of persons employed per fatal accident inside, ..              | 412       |
| Number of persons employed per fatal accident outside, ..             | 931       |
| Number of persons employed per non-fatal accident inside, ..          | 268       |
| Number of persons employed per non-fatal accident out-<br>side, ..... |           |
| Number of wives made widows, .....                                    | 8         |
| Number of children made orphans, .....                                | 13        |
| Number of steam locomotives used inside of mines, .....               |           |
| Number of steam locomotives used outside, .....                       | 2         |
| Number of compressed air locomotives used inside, ....                |           |
| Number of compressed air locomotives used outside, ....               |           |
| Number of electric motors used inside, .....                          | 36        |
| Number of electric motors used outside, .....                         |           |
| Number of fans in use, .....                                          | 50        |
| Number of furnaces in use, .....                                      | 12        |
| Number of gaseous mines in operation, .....                           | 16        |
| Number of non-gaseous mines in operation, .....                       | 50        |
| Number of new mines opened, .....                                     | 4         |
| Number of old mines abandoned, .....                                  | 1         |

## TABLE A

## PRODUCTION OF COAL

| Names of Operators                                | Tons      |
|---------------------------------------------------|-----------|
| Pittsburg Gas Coal Company, .....                 | 1,132,627 |
| New York and Cleveland Gas Coal Company, .....    | 457,070   |
| Allegheny Coal Company, .....                     | 317,143   |
| Bessemer Coal and Coke Company, .....             | 309,702   |
| Saltsburg Coal Company, .....                     | 238,799   |
| Cornell Coal Company, .....                       | 237,099   |
| Pittsburg Plate Glass Company, .....              | 230,016   |
| Pennsylvania Salt Manufacturing Company, .....    | 154,668   |
| Cochran Coal Company, .....                       | 136,113   |
| Howard Gas Coal Company, .....                    | 114,174   |
| Avonmore Coal and Coke Company, .....             | 113,574   |
| Joseph G. Beale and Company, .....                | 111,284   |
| McKean Coal Company, .....                        | 106,787   |
| Pine Run Company, .....                           | 105,775   |
| Graff Coal Company, .....                         | 98,814    |
| Valley Camp Coal Company, .....                   | 98,477    |
| Allegheny Coal and Coke Company, .....            | 84,448    |
| McFetridge Brothers, .....                        | 83,794    |
| Conemaugh Coal Company, .....                     | 83,588    |
| United States Sewer Pipe Company, .....           | 69,865    |
| Apollo Coal Company, .....                        | 69,300    |
| Leechburg Coal and Coke Company, .....            | 67,919    |
| Mitchell-Watson Coal Company, .....               | 56,487    |
| Lucesco Coal Company, .....                       | 53,819    |
| Kiskiminetas Coal Company, .....                  | 52,210    |
| Edri Coal Company, .....                          | 52,190    |
| West Penn Coal Mining Company, .....              | 49,996    |
| Smith Coal Company, .....                         | 49,758    |
| Bowman Coal Company, .....                        | 49,678    |
| Paulton Coal Mining Company, .....                | 48,000    |
| Ben Franklin Coal Company, .....                  | 48,000    |
| Gilpin Coal Company, .....                        | 47,992    |
| Thomas Maher, .....                               | 46,173    |
| Kerr Coal Company, .....                          | 46,110    |
| Valley Coal Company, .....                        | 45,877    |
| Raridan Coal Company, .....                       | 45,588    |
| Butler Junction Coal Company, .....               | 44,181    |
| Haddon Coal Company, .....                        | 43,349    |
| Bagdad Coal and Coke Company, .....               | 42,313    |
| Keystone Coal Company, .....                      | 42,176    |
| Lewis Coal Company, .....                         | 38,087    |
| Pine Run Coal and Coke Company, .....             | 37,597    |
| Boyd Brothers Coal Company, .....                 | 35,337    |
| Maher Coal and Coke Company, .....                | 34,537    |
| West Leechburg Steel and Tin Plate Company, ..... | 33,525    |

|                                             |           |
|---------------------------------------------|-----------|
| American Sheet and Tin Plate Company, ..... | 30,670    |
| Logansport Coal Company, .....              | 30,082    |
| Hamilton Coal Mining Company, .....         | 29,481    |
| West Penn Mining Company, .....             | 28,655    |
| Dalliba Coal Company, .....                 | 23,088    |
| Provident Coke and Mining Company, .....    | 17,345    |
| Braeburn Steel Company, .....               | 17,096    |
| Kier Fire Brick Company, .....              | 13,490    |
| Ford Collieries Company, .....              | 6,496     |
| Superior Fuel Company, .....                | 6,493     |
| John Peterman, .....                        | 4,700     |
| Vandergrift Coal Company, .....             | 2,663     |
| George E. Boyd, .....                       | 2,219     |
| <hr/>                                       |           |
| Total, .....                                | 5,676,494 |

#### Production by Counties

|                     |           |
|---------------------|-----------|
| Allegheny, .....    | 2,042,597 |
| Indiana, .....      | 1,814,151 |
| Westmoreland, ..... | 1,137,041 |
| Armstrong, .....    | 636,595   |
| Butler, .....       | 46,110    |
| <hr/>               |           |
| Total, .....        | 5,676,494 |

TABLE B.—Fatal and non-fatal accidents inside and outside of mines; number of tons of coal produced per accident; number of persons employed; number employed per accident

| Names of Operators                   | Fatal Accidents |         | Non-Fatal Accidents |         | Tons of coal produced per fatal accident inside | Tons of coal produced per non-fatal accident inside | Number of employees inside | Number of employees outside | Total number of employees | Number of employees inside per fatal accident | Number of employees outside per fatal accident | Number of employees inside per non-fatal accident | Number of employees outside per non-fatal accident |
|--------------------------------------|-----------------|---------|---------------------|---------|-------------------------------------------------|-----------------------------------------------------|----------------------------|-----------------------------|---------------------------|-----------------------------------------------|------------------------------------------------|---------------------------------------------------|----------------------------------------------------|
|                                      | Fatal Accidents |         | Non-Fatal Accidents |         |                                                 |                                                     |                            |                             |                           |                                               |                                                |                                                   |                                                    |

| 14               | Steve Koskie.       | Slavonian.  | Miner.          | 40  | S                 | ---              | ---               | Iselin No. 2.    | Indiana.      | Killed by fall of slate at face of heading.                                                                                                             |
| Aug. 24          | Guy Richard.        | American.   | Machine helper. | 20  | S                 | ---              | ---               | Natrona No. 1.   | Allegheny.    | Instantly killed by electricity. While laying machine cable it broke in his hands. He was shocked and fell on steel rail and the cable fell across him. |
| 31               | William J. Seibert. | American.   | Miner.          | 56  | M                 | 1                | ---               | Cornell.         | Allegheny.    | Fatally injured by fall of slate while working on grading slope. He received scalp wounds and bruises on body. Died six weeks later.                    |
| Nov. 12          | Vick Peranich.      | Hungarian.  | Miner.          | 35  | M                 | 1                | 1                 | Harwick.         | Allegheny.    | Instantly killed by fall of roof rock while standing against face of rib.                                                                               |

|         |                       |               |                |    |   |       |                     |                  |                                                                                                                                                    |
|---------|-----------------------|---------------|----------------|----|---|-------|---------------------|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Dec. 14 | John Skibinsky, ----- | Polish, ----  | Driver, -----  | 20 | S | ----- | Bessemer No. 1, --  | Allegheny, ----- | Fatally injured by car. He was going down grade on main entry with his trip and in some unknown manner was run over. Died four hours later.        |
| 15      | Atsevo Meranga, ----- | Italian, ---- | Laborer, ----- | 23 | M | 1     | 2 Cochran No. 1, -- | Westmoreland,    | Fatally injured by being caught between car and rib. He died on the way out of the mine.                                                           |
| 30      | Benjamin La Veda, --  | Italian, ---- | Snapper, ----- | 20 | S | ----- | Johnetta No. 2, --  | Armstrong, ---   | Fatally injured. He fell from front end of trip on first right face of main entry and was crushed across the chest by car. Died a few hours later. |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person        | Nationality   | Occupation            | Age | Married or single | Name of Mine         | County           | Nature and Cause of Accident in Brief                                                                             |
|------------------|-----------------------|---------------|-----------------------|-----|-------------------|----------------------|------------------|-------------------------------------------------------------------------------------------------------------------|
| Feb. 11          | Charles Vanoski, ---- | Polish, ----  | Driver, ----          | 17  | S                 | Bessemer No. 1, ---- | Allegheny, ----  | Leg broken by mine car. The car broke loose from another trip, ran down entry and struck him.                     |
| 16               | Steve Woonski, ----   | Polish, ----  | Loader, ----          | 26  | S                 | Harwick, ----        | Allegheny, ----  | Both legs broken by fall of slate at face of room.                                                                |
| 17               | Jno. Casagrande, ---  | Italian, ---- | Machine scraper, ---- | 20  | S                 | Karidan, ----        | Armstrong, ----  | Leg broken by fall of slate while lifting a loaded car on track in his room.                                      |
| March 8          | John Barnes, ----     | English, ---- | Motorman, ----        | 40  | M                 | Valley Camp, ----    | Westmoreland, -- | Leg broken by running into an empty car standing in entry, with his trip.                                         |
| June 18          | Ben Tarari, ----      | Italian, ---- | Miner, ----           | 32  | M                 | Foster No. 2, ----   | Indiana, ----    | Leg broken by fall of slate in his room while preparing a post to set under the slate.                            |
| July 20          | Joe Nosenice, ----    | Italian, ---- | Miner, ----           | 19  | S                 | Lucesco, ----        | Westmoreland, -- | Leg broken by fall of slate while loading car at face of his room.                                                |
| 26               | Lee Smith, ----       | Polish, ----  | Driver, ----          | 21  | S                 | Cornell, ----        | Allegheny, ----  | Ankle bone broken by a car becoming derailed while taking a trip up the entry.                                    |
| 28               | Valentine Coanage, -- | Slavonian, -- | Loader, ----          | 37  | M                 | Harwick, ----        | Allegheny, ----  | Leg broken in two places. While walking on dilly road he was struck by front car of a moving trip.                |
| Aug. 7           | Martin Peterson, ---- | Swedish, ---  | Miner, ----           | 25  | S                 | Johnetta No. 2, ---- | Armstrong, ----  | Leg broken. A car jumped the track in No. 31 room on No. 3 entry, slid round and caught his leg under the bumper. |
| 21               | Frank Wagner, ----    | American, --  | Helper, ----          | 19  | S                 | Valley Camp, ----    | Westmoreland, -- | Leg broken by being caught between a loaded and an empty trip of cars on the siding.                              |
| Sept. 10         | John Ferrance, ----   | Slavonian, -- | Loader, ----          | 30  | M                 | Creighton, ----      | Allegheny, ----  | Burned on face and hands by a blown-out shot. He secretly carried dynamite into the mine.                         |
| Oct. 21          | John Dopeke, ----     | Slavonian, -- | Miner, ----           | 25  | S                 | Mt. Gray, ----       | Westmoreland, -- | Leg broken by fall of slate at face of his room.                                                                  |

|      |    |                 |            |          |    |   |               |               |                                                                                                                                                                         |
|------|----|-----------------|------------|----------|----|---|---------------|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Nov. | 2  | George Grunden, | American,  | Miner,   | 42 | M | Avenue,       | Allegheeny,   | Leg broken while switching a car into the siding, his head touched an electric wire and he was thrown with such force as to break his leg.                              |
|      | 4  | Joe Willoniskl, | Polish,    | Miner,   | 20 | S | Isdin No. 1,  | Indiana,      | Both legs broken by fall of slate from the face of his room.                                                                                                            |
|      | 5  | George Lugzey,  | Slavonian, | Loader,  | 45 | M | Creighton,    | Allegheny,    | Rib broken by a fall of roof coal while loading a car at the face of his room.                                                                                          |
|      | 9  | A. R. Caldwell, | Scotch,    | Miner,   | 43 | M | Kirkpatrick,  | Armstrong,    | Face and hands burned by the explosion of three pound can of powder. While stooping to take a drink out of dinner pail a spark from lamp on his cap ignited the powder. |
|      | 15 | Steve Schriner, | German,    | Loader,  | 20 | S | Peterson,     | Allegheny,    | Leg broken. Struck by a sprag in a passing car as he stepped off track to let car pass into the room.                                                                   |
|      | 16 | Joe Turner,     | Hungarian, | Driver,  | 20 | S | Harwick,      | Allegheny,    | Crushed across thighs. Caught between car and rib as he jumped off the loaded trip, on third left main, to run ahead to hurry the mule.                                 |
| Dec. | 3  | Pat Antinotch,  | Italian,   | Roadman, | 27 | M | Foster No. 2, | Indiana,      | Leg broken by fall of slate while emptying a car of ashes on entry side track.                                                                                          |
|      | 7  | Joe Gates,      | Slavonian, | Driver,  | 25 | M | Valley Camp,  | Westmoreland, | Collar bone and four ribs broken. He jumped off car on narrow side to pull out sprag and was caught between car and rib.                                                |
|      | 9  | M. C. Cunrad,   | American,  | Loader,  | 20 | S | Mt. Gray,     | Westmoreland, | Leg broken by fall of slate in his room. Squeezed about the body. Caught between car and rib.                                                                           |
|      | 17 | John Dubeck,    | German,    | Loader,  | 30 | M | Creighton,    | Allegheny,    | Arm broken. He jumped from front end of motor and when the motor took the frog on main haulage road he fell with his arm across the rail, and motor passed over it.     |
|      | 28 | Martin Valch,   | Slavonian, | Snapper, | 27 | M | Creighton,    | Allegheny,    |                                                                                                                                                                         |

## CONDITION OF MINES

## PITTSBURG GAS COAL COMPANY

Iselin Nos. 1, 2 and 3.—General conditions good.

## NEW YORK AND CLEVELAND GAS COAL COMPANY

Plum Creek and Sandy Creek.—In good sanitary condition.

## ALLEGHENY COAL COMPANY

Harwick.—Ventilation, drainage and general conditions good.

## BESSEMER COAL AND COKE COMPANY

Bessemer No. 1.—In very good condition.

## SALTSBURG COAL COMPANY

Foster Nos. 1, 2 and 3.—In good condition.

## CORNELL COAL COMPANY

Cornell.—In fairly good condition. The ventilation will be much improved when the mine is connected with the shaft already down and another opening made to the surface.

## PITTSBURG PLATE GLASS COMPANY

Creighton.—General conditions good.

## PENNSYLVANIA SALT MANUFACTURING COMPANY

Natrona No. 1.—In excellent condition.

## COCHRAN COAL COMPANY

Cochran No. 1.—Condition fair.

## HOWARD GAS COAL COMPANY

Mt. Gray.—In excellent condition.

## AVONMORE COAL AND COKE COMPANY

Avonmore.—In fair condition.

## JOSEPH G. BEALE AND COMPANY

Beale.—General conditions fair.

Aladdin.—Ventilation a little sluggish at the working face. Drainage good.

## McKEAN COAL COMPANY

Peterson.—In very good condition.

## PINE RUN COMPANY

Lewis.—In good condition.

## GRAFF COAL COMPANY

Black Lick.—In very good condition.

## VALLEY CAMP COAL COMPANY

Valley Camp.—Ventilation sluggish at the working faces on my last visit. The fan that was installed about a year ago is not doing efficient work on account of its location. The greater part of the air is lost in passing through old workings before it reaches the working faces. Recommended a shaft near the face of workings.

## ALLEGHENY COAL AND COKE COMPANY

Avenue.—In good condition.

## McFETRIDGE BROTHERS

Hite.—In very good condition.

## CONEMAUGH COAL COMPANY

Conemaugh.—Ventilation and drainage good.

## UNITED STATES SEWER PIPE COMPANY

Johnetta No. 2.—Condition fair. A large fan has been installed, which, when put in operation, will produce ample ventilation and put the mine in good condition.

## APOLLO COAL COMPANY

Northwest.—Condition fair.

## LEECHBURG COAL AND COKE COMPANY

Riverview and Hill.—Condition fair. Both mines ventilated by the same fan.

## MITCHELL-WATSON COAL COMPANY

Mitchell-Watson.—In very good condition.

## LUCESCO COAL COMPANY

Lucesco.—Ventilation, drainage and general conditions good.

## KISKIMINETAS COAL COMPANY

Tunnelton.—In fair condition.

## EDRI COAL COMPANY

Edri.—In good condition.

## WEST PENN COAL MINING COMPANY

West Penn No. 1.—In fair condition.

## SMITH COAL COMPANY

Smith.—In good condition.

## BOWMAN COAL COMPANY

Bowman.—In very good condition.

## PAULTON COAL MINING COMPANY

Paulton.—In good condition.

## BEN FRANKLIN COAL COMPANY

Metcalf.—Ventilation a little sluggish at the working faces on my last visit.

## GILPIN COAL COMPANY

Gilpin.—In very good condition.

## THOMAS MAHER

Thomas Maher.—In good condition.

## KERR COAL COMPANY

Kerr No. 8.—In very good condition.

## VALLEY COAL COMPANY

Valley.—In fair condition.

## RARIDAN COAL COMPANY

Raridan.—In good condition.

## BUTLER JUNCTION COAL COMPANY

Butler Junction.—In good condition.

## HADDON COAL COMPANY

Haddon.—In satisfactory condition.

## BAGDAD COAL AND COKE COMPANY

Bagdad.—In good sanitary condition.

## KEYSTONE COAL COMPANY

Mooween.—Ventilation sluggish at the working faces. The fan is too small.

## LEWIS COAL COMPANY

Blackstone.—In satisfactory condition.

## PINE RUN COAL AND COKE COMPANY

Pine Run No. 1.—In fairly good condition.

Pine Run No. 2.—Idle.

## BOYD BROTHERS COAL COMPANY

Boyd.—In good condition.

## MAHER COAL AND COKE COMPANY

Maher No. 4.—In good condition.

## WEST LEECHBURG STEEL AND TIN PLATE COMPANY

West Leechburg.—In very good condition.

## AMERICAN SHEET AND TIN PLATE COMPANY

Kirkpatrick.—In good condition.

## LOGANSPORT COAL COMPANY

Bethel.—In fair condition.

## HAMILTON COAL MINING COMPANY

Crag Dell.—Condition not satisfactory. There is no system in this mine.

## WEST PENN MINING COMPANY

West Penn.—In good condition.

## DALLIBA COAL COMPANY

Dalliba.—Condition fair. Have just installed a new Brazil fan, diameter 12 feet.

## PROVIDENT COKE AND MINING COMPANY

Provident No. 1.—Idle since July 1.

## BRAEBURN STEEL COMPANY

Braeburn.—In very good condition.

## KIER FIRE BRICK COMPANY

Kier.—In good condition. Not under the law.

## FORD COLLIERIES COMPANY

Benjamin and Francis.—Two new shafts, 10 x 16 feet and about 200 feet deep, just down to the coal. Condition good.

## SUPERIOR FUEL COMPANY

Superior No. 1.—A new shaft, 9 x 21 feet and about 200 feet deep, just down to the coal. Condition good.

## JOHN PETERMAN

John Peterman.—A custom mine in good condition.

## VANDERGRIFF COAL COMPANY

Vandergrift.—In good condition.

## GEORGE E. BOYD

Elizabeth.—In good condition.

## IMPROVEMENTS

## BESSEMER COAL AND COKE COMPANY

Bessemer No. 1.—Conveying apparatus and fueling station for Bessemer and Lake Erie Railroad at an approximate cost of \$10,000. Installed electric light plant, cost \$2,500; and Parsens hot blast blowing system for six 150 horse-power boilers, cost \$2,500; also one new 12 x 16 inch double drum haulage engine with 3000 feet of extension rope haulage, one new 12 x 16 inch Worthington duplex pump, cost \$1,000; and 22 houses with electric light.

## CORNELL COAL COMPANY

Cornell.—Grade on slope has been improved by taking down about 1,000 feet of roof and reducing the grade. Replaced all bare wires with rubber covered and insulated cable and wire in the mine, as a guard against danger and accidents. Improved the traveling way nearly the entire length. Built a new machine shop, and displaced the steam engine at the elevator with 20 horse-power Westinghouse motor.

## PITTSBURG PLATE GLASS COMPANY

Creighton.—Extended 70 pound iron along main haulage road to C face entry, a distance of 6,800 feet from tippie. Installed one electric pump; purchased one 10-ton Jeffrey electric locomotive and installed a complete outfit of Draeger's rescue apparatus, including: (a) three smoke helmets with duplex cylinders; (b) one Draeger high pressure refilling pump; (c) two oxygen storage cylinders; capacity, 100 cubic feet each; (d) three electric miners' safety lamps.

In connection with this apparatus they contemplate organizing rescue parties. An entry (entirely separate from the mine) will be made and actual practice of rescue work will be carried on by the rescue party in this entry. Purchased two chemical fire engines, 60-gallon tanks.

## PENNSYLVANIA SALT MANUFACTURING COMPANY

Natrona No. 1.—Installed Sullivan long wall mining machine.

## HOWARD GAS COAL COMPANY

Mt. Gray.—Installed a telephone system in the mine, an electric haulage, automatic doors; all compressed air lines suspended from the roof; endless rope haulage and arc lights in and about the buildings.

## McKEAN COAL COMPANY

Peterson.—Extended the side track 800 feet. A permissible explosive is used exclusively.

## VALLEY CAMP COAL COMPANY

Valley Camp.—Installed a Jeffrey fan, 8 feet, driven by a 50 horse-power electric motor. Built a brick building for fan and motor, a new haulage road 1,700 feet long, twenty-four concrete stoppings and twenty-seven stoppings faced with cement. The tippie has been rebuilt and siding extended 600 feet.

## UNITED STATES SEWER PIPE COMPANY

Johnetta No. 2.—Installed a large fan—Pittsburg Stoker—diameter, 10 feet.

## APOLLO COAL COMPANY

Northwest.—Grades and drainage improved.

## LEECHBURG COAL AND COKE COMPANY

Hill and Riverview.—Installed motor haulage and electric mining machines.

## MITCHELL-WATSON COAL COMPANY

Mitchell-Watson.—Built a large brick motor house.

## KISKIMINETAS COAL COMPANY

Tunnelton.—Installed motor haulage.

## WEST PENN COAL MINING COMPANY

West Penn No. 1.—Traveling way improved; main entries cleaned along sides; loose roof taken down and airway cleaned up.

## KERR COAL COMPANY

Kerr No. 8.—Installed a new fan, electric haulage and electric mining machine.

## DALLIBA COAL COMPANY

Dalliba.—Installed a Brazil fan, diameter 12 feet.

## BRAEBURN STEEL COMPANY

Braeburn.—Installed an electric pump.

## FORD COLLIERIES COMPANY

Francis and Benjamin.—The erection of these plants began last April. The hoist shafts and slopes were sunk and manways driven and tipples and many outside buildings have been erected. These shafts have all modern improvements. Shafts, 10 x 16 feet; slopes, 6 x 16, and air shafts, 10 x 10 feet.

## SUPERIOR FUEL COMPANY

Superior No. 1.—A new shaft down to the coal under development. They have all modern improvements. Hoisting shaft, 9 x 21 feet, and air shaft, 9 x 18 feet, about 200 feet deep.

## PROSECUTIONS FOR VIOLATIONS OF THE MINING LAWS

In January, information was made against Staney Jacat, Joseph Waleski and W. Baeden, miners, employed by Bessemer Coal and Coke Company at Bessemer mine, in which locked safety lamps are used exclusively, charging them with the violation of Article 21, section 1 of the mining law, in carrying matches and smoking articles into the mine. The men spent about three weeks in Allegheny county jail. They were tried at No. 70 January term of court. The jury returned a verdict of guilty against Staney Jacat and he was sentenced to thirty days in the workhouse.

December 2, information was made against Joseph Marco and Peter Listello, before Justice of the Peace McMasters for violation of Article 20, Rules 4 and 14. Joseph Marco waived a hearing and carried the case to Allegheny county court. Peter Listello is a fugitive from justice.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in Morehead Hall, Pittsburg, April 6, 7, 8 and 9. The Board of Examiners was com-

posed of F. W. Cunningham, Mine Inspector; E. A. Watters, Superintendent, and Alexander McCanch, Sr., Mine Foreman. There were thirty-eight applicants examined, twenty-three for certificates as Mine Foremen and fifteen for certificates as Fire Bosses.

The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

#### First Grade

J. E. Milson, Clyde E. Balliet, John W. Donaldson, J. C. Williams and John Ferrell.

## ***FIFTEENTH DISTRICT***

---

CAMBRIA, INDIANA AND CLEARFIELD COUNTIES

---

Patton, Pa., February 24, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: In compliance with the Bituminous Mining Laws, I have the honor to transmit herewith my annual report of the Fifteenth Bituminous District for the year ending December 31, 1909.

Respectfully submitted,

ALEXANDER MONTEITH,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 112       |
| Number of mines in operation, .....                                   | 105       |
| Number of tons of coal shipped to market, .....                       | 6,788,075 |
| Number of tons used at mines for steam and heat, .....                | 151,049   |
| Number of tons sold to local trade and used by employes, ..           | 48,515    |
| Number of tons used in the manufacture of coke, .....                 | 285,348   |
| Number of tons of coal produced, .....                                | 7,272,987 |
| Number of tons of coke produced, .....                                | 182,878   |
| Number of coke ovens, .....                                           | 482       |
| Number of coke ovens in operation, .....                              | 482       |
| Number of tons of coal produced by pick mining, .....                 | 5,139,788 |
| Number of tons produced by compressed air machines, ....              | 1,680,962 |
| Number of tons produced by electrical machines, .....                 | 452,237   |
| Number of persons employed inside of mines, .....                     | 10,348    |
| Number of persons employed outside, including coke<br>workers, .....  | 998       |
| Number of persons employed at manufacture of coke, ....               | 139       |
| Number of fatal accidents inside of mines, .....                      | 20        |
| Number of fatal accidents outside, .....                              | 37        |
| Number of non-fatal accidents inside of mines, .....                  | 2         |
| Number of non-fatal accidents outside, .....                          | 363,649   |
| Number of tons of coal produced per fatal accident inside, ..         | 517       |
| Number of persons employed per fatal accident outside, ..             | 280       |
| Number of persons employed per non-fatal accident inside, ..          | 499       |
| Number of persons employed per non-fatal accident out-<br>side, ..... | 13        |
| Number of wives made widows, .....                                    | 27        |
| Number of children made orphans, .....                                | 90        |
| Number of steam locomotives used inside of mines, .....               | 69        |
| Number of steam locomotives used outside, .....                       | 32        |
| Number of compressed air locomotives used inside, ....                | 3         |
| Number of compressed air locomotives used outside, .....              | 102       |
| Number of electric motors used inside, .....                          | 4         |
| Number of electric motors used outside, .....                         | 7         |
| Number of fans in use, .....                                          |           |
| Number of furnaces in use, .....                                      |           |
| Number of gaseous mines in operation, .....                           |           |
| Number of non-gaseous mines in operation, .....                       |           |
| Number of new mines opened, .....                                     |           |
| Number of old mines abandoned, .....                                  |           |
| Number of mines idle during the year, .....                           |           |

## TABLE A

## PRODUCTION OF COAL

| Names of Operators                                                  | Tons      |
|---------------------------------------------------------------------|-----------|
| Pennsylvania Coal and Coke Company (T. H. Watkins, Receiver), ..... | 1,528,980 |
| Penn Mary Coal Company, .....                                       | 888,059   |
| Russell Coal Company, .....                                         | 454,922   |
| Barnes and Tucker, .....                                            | 426,420   |
| Carrolltown Coal Company, .....                                     | 379,618   |
| Empire Coal Mining Company, .....                                   | 337,873   |
| Clearfield Bituminous Coal Corporation, .....                       | 336,955   |

TABLE 4.—Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person         | Nationality    | Occupation  | Age           | Married or single | Number of widows | Number of orphans | Name of Mine            | County        | Nature and Cause of Accident in Brief                                                                                     |
|------------------|------------------------|----------------|-------------|---------------|-------------------|------------------|-------------------|-------------------------|---------------|---------------------------------------------------------------------------------------------------------------------------|
| Jan. 6           | George Repko, -----    | Polish, ----   | Miner, ---- | 17 S. -----   |                   |                  |                   | Pennsylvania No. 22,    | Cambria, --   | Killed by fall of roof on heading while taking loaded car from his working place to heading.                              |
| 7                | Joseph Kuropinski, --- | Hungarian, --- | Miner, ---- | 43 M. 1 ----- |                   |                  |                   | Olanta No. 1, -----     | Clearfield,-- | Fatally burned by explosion of powder in his room.                                                                        |
| 18               | David McNair, -----    | Scotch,-----   | Miner, ---- | 70 M. -----   |                   |                  |                   | Pennsylvania No. 28,    | Cambria, --   | Fatally injured by fall of slate in his room near face. After firing shot he returned to the face without examining roof. |
| Feb. 18          | Robert Barclay, -----  | American,--    | Runner, --- | 18 S. -----   |                   |                  |                   | Lancashire No. 12, ---- | Cambria, --   | Killed by mine cars on eighth left heading while gathering trip.                                                          |
| March 1          | Richard Partington,--  | English,----   | Miner, ---- | 57 M. 1 ----- |                   | 4                |                   | Lancashire No. 12, ---- | Cambria, --   | Killed by fall of roof at face of pillar work. He failed to support the roof.                                             |
| April 9          | Jaunce Bauman, -----   | American,--    | Miner, ---- | 29 M. 1 ----- |                   | 2                |                   | Olanta No. 1, -----     | Clearfield,-- | Killed by fall of roof at face in room-neck.                                                                              |
| 23               | Ralph Leech, -----     | German, ---    | Miner, ---- | 43 M. 1 ----- |                   | 1                |                   | Victor No. 25, -----    | Indiana, ---  | Killed by fall of roof at face while taking out stump.                                                                    |
| May 13           | Edward Booth, -----    | American,--    | Miner, ---- | 28 -----      |                   |                  |                   | West Branch, -----      | Cambria, --   | Killed by fall of roof in pillar working near face.                                                                       |
| 20               | Joseph Catanes,-----   | Italian, ----  | Miner, ---- | 37 M. 1 ----- |                   | 4                |                   | Spangler No. 2, -----   | Cambria, --   | Killed by fall of roof while undermining in room at face. He failed to prop coal.                                         |
| June 18          | Andy Petne, -----      | Slavonian, --- | Miner, ---- | 28 M. 1 ----- |                   | 3                |                   | Emeigh Run No. 1, --    | Cambria, --   | Killed by fall of roof at room face while undermining.                                                                    |
| July 8           | Joseph Catanise, ----- | Italian, ----  | Miner, ---- | 29 -----      |                   |                  |                   | Spangler No. 2, -----   | Cambria, --   | Killed by fall of roof in his working place while placing props in pillar working.                                        |
| 8                | John Muddry, -----     | Austrian, --   | Miner, ---- | 38 M. 1 ----- |                   | 4                |                   | Pennsylvania No. 21,    | Cambria, --   | Killed by fall of slate while repairing truck fifty feet back from the face. He failed to prop the slate.                 |
| Sept. 3          | John Matchneck, -----  | Austrian, --   | Miner, ---- | 47 M. 1 ----- |                   | 3                |                   | Penn Mary No. 1, ....   | Indiana, ---  | Killed by fall of roof in his room, No. 8, on fifth right heading. He failed to prop coal.                                |

|          |                        |                  |                |    |          |                        |              |                                                                                                                   |
|----------|------------------------|------------------|----------------|----|----------|------------------------|--------------|-------------------------------------------------------------------------------------------------------------------|
| Sept. 15 | John Simco, -----      | Slavonian, ----- | Scraper, ----- | 30 | S. ----- | Pennsylvania No. 28,   | Cambria, --  | Killed by fall of roof while cutting coal in No. 11 room, third main heading.                                     |
| 16       | Andrew Chordas, -----  | Hungarian, ----- | Miner, -----   | 50 | M. 1     | Empire A, -----        | Cambria, --  | Killed by fall of roof in room, sixth right heading, while loading car. He failed to prop roof.                   |
| 23       | Danko Rodiek, -----    | Slavonian, ----- | Miner, -----   | 35 | M. 1     | Penn Mary No. 2, ----- | Indiana, --- | Killed by fall of roof at face of room. No. 1, on tenth left heading.                                             |
| Oct. 18  | Joseph Dereatas, ----- | Italian, -----   | Loader, -----  | 36 | M. 1     | Pennsylvania No. 21,   | Cambria, --  | Killed by fall of roof in room while loading car. He failed to prop roof.                                         |
| Nov. 15  | Mike Cruchensky, ----- | Hungarian, ----- | Miner, -----   | 27 | M. 1     | Greenwich No. 2, ----- | Indiana, --- | Killed by fall of roof in his room while undermining. He failed to prop roof.                                     |
| Dec. 10  | John Bobronko, -----   | Hungarian, ----- | Miner, -----   | 16 | -----    | Pennsylvania No. 22,   | Cambria, --  | Fatally burned by powder while making up a shot in his room. A spark from the lamp on his cap ignited the powder. |
| 24       | Mike Topatko, -----    | Polish, -----    | Miner, -----   | 32 | M. 1     | Victor No. 6, -----    | Cambria, --  | Killed by fall of roof in No. 4 room, eleventh right heading, while undermining.                                  |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person         | Nationality   | Occupation      | Age | Married or single | Name of Mine            | County           | Nature and Cause of Accident in Brief                                                                             |
|------------------|------------------------|---------------|-----------------|-----|-------------------|-------------------------|------------------|-------------------------------------------------------------------------------------------------------------------|
| Jan. 6           | John Talbosh, -----    | Greek,-----   | Miner, -----    | 23  | S.                | Pennsylvania No. 22,    | Cambria, -----   | Pelvis bone broken by fall of roof on heading while lifting car on track 100 feet from face at air course switch. |
| 7                | George Barrese, -----  | Italian,----- | Miner, -----    | 28  | S.                | Spangler No. 3½,        | Cambria, -----   | Hip fractured by fall of roof while underrunning at room face.                                                    |
| 13               | Wassil Mish, -----     | Austrian,--   | Miner, -----    | 23  | S.                | Penn Mary No. 4, -----  | Indiana, -----   | Arm broken by fall of slate while drawing out rail on pillar work near face.                                      |
| 22               | George Chernich, ----- | Polish, ----- | Loader, -----   | 45  | M.                | Sample Run, -----       | Indiana, -----   | Leg broken by fall of coal at face of his room while loading car.                                                 |
| 25               | Edward Ross, -----     | American,--   | Door-boy, ----- | 17  | S.                | Penn Mary No. 1, -----  | Indiana, -----   | Leg broken by motor. He stepped off rear end and fell and was caught by motor following. Outside.                 |
| Feb. 1           | Joseph Koval, -----    | Polish, ----- | Miner, -----    | 28  | M.                | Hines No. 2, -----      | Indiana, -----   | Rib fractured and ankle sprained by mine car in room while bringing car to heading.                               |
| 6                | John W. Jenkins, ----- | Welsh, -----  | Company man, -- | 46  | M.                | West Branch, -----      | Cambria, -----   | Finger blown off while handling detonating cap, in 17 tunnel.                                                     |
| 8                | Pete Yolnge, -----     | Russian,---   | Miner, -----    | 40  | M.                | Penn Mary No. 1, -----  | Indiana, -----   | Collar bone broken and arm fractured by fall of coal while underrunning in room.                                  |
| March 3          | M. B. Croyle, -----    | American,--   | Miner, -----    | 22  | M.                | Dixon No. 1, -----      | Indiana, -----   | Two fingers cut off by rail falling upon them while loading rails.                                                |
| 9                | Frank Raffele, -----   | Austrian,--   | Miner, -----    | 42  | S.                | Blubaker No. 13, -----  | Cambria, -----   | Collar bone broken by fall of coal while underrunning in room.                                                    |
| 16               | Mike Lesky, -----      | Hungarian,    | Oilier, -----   | 26  | M.                | Penn Mary No. 2, -----  | Indiana, -----   | Leg broken. Caught between mine cars on tipples. Outside.                                                         |
| 19               | James Tubbs, -----     | American,--   | Miner, -----    | 50  | M.                | Berwindale No. 1, ----- | Clearfield,----- | Head cut and back bruised by fall of roof in room while bringing car down to heading.                             |
| April 7          | James Burchell, -----  | Irish,-----   | Miner, -----    | 56  | M.                | Delta, -----            | Cambria, -----   | Leg broken by fall of coal in room while loading car at face.                                                     |

|          |                   |            |              |    |                      |             |                                                                                                      |
|----------|-------------------|------------|--------------|----|----------------------|-------------|------------------------------------------------------------------------------------------------------|
| April 14 | Walter McConnell, | American,  | Miner,       | 15 | Pennsylvania No. 33, | Cambria,    | Arm badly crushed by mine cars on heading, necessitating amputation.                                 |
| 15       | Michael Peightal, | American,  | Miner,       | 16 | Dixon No. 1,         | Indiana,    | Leg broken by mine car while shifting car in room, 150 feet from face.                               |
| 27       | John Kerrs,       | Scotch,    | Miner,       | 25 | Pennsylvania No. 30, | Cambria,    | Leg broken by mine cars on heading. Cars jumped the track.                                           |
| May 4    | Jess Adams,       | American,  | Runner,      | 27 | Penn Mary No. 2,     | Indiana,    | Leg broken by mine cars on heading, number seven room.                                               |
| 17       | Charles Payne,    | American,  | Runner,      | 22 | Glen Richey No. 5,   | Clearfield, | Face cut and shoulder bruised by mine cars being wrecked on main heading near one right switch.      |
| June 1   | John Joseph,      | American,  | Miner,       | 41 | West Branch,         | Cambria,    | Leg and hand badly cut and bruised by fall of roof while undermining in room.                        |
| 25       | Joseph Cubie,     | Polish,    | Miner,       | 38 | Greenwich No. 8,     | Indiana,    | Two ribs broken and back sprained by mine cars in room while taking car to heading.                  |
| 29       | William Brown,    | Scotch,    | Company man, | 69 | Glen Richey No. 5,   | Clearfield, | Small bone in leg broken on heading by mine cars jumping track.                                      |
| 30       | Earl Snedden,     | Scotch,    | Miner,       | 22 | Glen Richey No. 5,   | Clearfield, | Point of finger taken off by latch and car wheel on heading.                                         |
| July 1   | Joseph Lazoopta,  | Polish,    | Miner,       | 30 | Victor No. 3,        | Cambria,    | Back injured by fall of roof in his working place while drilling hole.                               |
| 20       | Toney Grico,      | Italian,   | Miner,       | 18 | Penn Mary No. 5,     | Indiana,    | Cut about head and face by fall of coal while undermining in room face.                              |
| Oct. 3   | George Barko,     | Slavonian, | Miner,       | 27 | Penn Mary No. 1,     | Indiana,    | Leg crushed while handling loaded car on heading. Amputation was necessary.                          |
| 6        | John Beaverage,   | Scotch,    | Runner,      | 26 | Victor No. 2,        | Cambria,    | Leg splintered by mine cars on heading. Cars became derailed and caught him.                         |
| 12       | A. B. Gressley,   | English,   | Miner,       | 47 | Hines No. 1,         | Indiana,    | Leg broken by fall of roof in his working place turning off heading.                                 |
| 26       | Frank Vety,       | Italian,   | Miner,       | 36 | Penn Mary No. 5,     | Indiana,    | Leg broken by fall of coal while undermining at room face.                                           |
| Nov. 3   | Jobe Rolls,       | American,  | Miner,       | 35 | Glen Richey No. 4,   | Clearfield, | Finger crushed by bumper of car while lifting it on track at room switch. Amputation was necessary.  |
| 5        | Robert Ward,      | Scotch,    | Driver,      | 17 | Glen Richey No. 4,   | Clearfield, | Body bruised and face cut, between car and side of heading while bringing trip from 2 right heading. |
| 10       | Andrew Halick,    | American,  | Door-boy,    | 16 | Lancashire No. 3,    | Cambria,    | Leg broken by haulage rope on side track. The rope jerked on starting.                               |
| 16       | William Cann,     | American,  | Miner,       | 21 | Rich Hill No. 2,     | Cambria,    | Collar bone broken and scap wounded by fall of coal while undermining in room.                       |
| Dec. 2   | Stefe Myers,      | American,  | Runner,      | 28 | Barr,                | Indiana,    | Leg broken by rope jerking over sheave wheel on haulage road.                                        |
| 9        | Cinderela Delhea, | Italian,   | Miner,       | 37 | Penn Mary No. 1,     | Indiana,    | Four fingers crushed by mine cars while handling them on heading. Amputation was necessary.          |

TABLE 5.—Continued

| Date of accident | Name of Person         | Nationality   | (Occupation)    | Age      | Married or single | Name of Mine          | County            | Nature and Cause of Accident in Brief                                                                                                                                                          |
|------------------|------------------------|---------------|-----------------|----------|-------------------|-----------------------|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Dec. 17          | Frank Hadgo, -----     | Austrian, --  | Miner, -----    | 30 ----- | M.                | Pennsylvania No. 12.  | Cambria, -----    | Both legs broken by mine cars on heading near mouth of his room. While running car out of room another car was dropped from the room above and he was caught between the bumpers of both cars. |
| 18               | John Arlia, -----      | Italian, ---- | Miner, -----    | 22 ----- | S.                | Penn Mary No. 5, ---  | Indiana, -----    | Skull fractured by fall of roof at room neck while putting car on heading.                                                                                                                     |
| 20               | Thomas Sloppy, -----   | American, --  | Miner, -----    | 37 ----- | M.                | Glen Richey No. 3, -- | Clearfield, ----- | Collar bone broken by fall of coal while undermining in room.                                                                                                                                  |
| 20               | Joseph Barnosky, ----- | Hungarian, -- | Miner, -----    | 39 ----- | M.                | West Branch, -----    | Cambria, -----    | Leg broken in room by fall of coal while loading car at face.                                                                                                                                  |
| 27               | Philip Gray, -----     | American, --  | Door-boy, ----- | 14 ----- | S.                | Pennsylvania No. 11,  | Cambria, -----    | Arm crushed by motor. Amputation was necessary. He was running by motor to open door when he fell and the motor passed over his arm.                                                           |

## CONDITION OF MINES

## PENNSYLVANIA COAL AND COKE COMPANY

(T. H. Watkins, Receiver)

Pennsylvania Nos. 11, 12, 13 and 20.—Located near Hastings, were in a very satisfactory condition, except No. 12, where the ventilation was weak on my last inspection, due to some changes that were being made in the air courses. Nos. 11, 12 and 13 were idle from March 1 to September 1.

Pennsylvania Nos. 21 and 22.—Located at Moss Creek, were in good condition.

Pennsylvania No. 25.—In fair condition. The main heading has been in fault for over a year. Idle from March 1 to September 1.

Pennsylvania No. 26.—Was in fair condition during the latter part of the year. Sometime prior their main air course had fallen in and cut off the ventilation to such an extent that the black damp from the old workings came down to the working faces.

Pennsylvania No. 27.—The condition of this mine was not satisfactory on the upper section. The ventilation was weak, due to breaks in bottom to the lower mine, but the number of men in this section is being reduced.

Pennsylvania No. 29.—Located at St. Boniface; was in fair condition, except that the ventilation was a little weak on east section. On the evening of November 21 a fire occurred at this mine, which burned the power house and destroyed the haulage engines, air compressor and boiler connections. Operation was suspended for the balance of the year.

Pennsylvania No. 28.—In very satisfactory condition.

Pennsylvania No. 30.—Was in very satisfactory condition during the year, except on my last inspection. They had cut through to old Columbia mine and there was a little black damp from the old workings. The men were withdrawn from this section until it could be sufficiently ventilated.

Pennsylvania No. 31.—In very satisfactory condition. This mine is troubled with faults and has done very little during the year.

Pennsylvania No. 32.—In very fair condition. It is nearly exhausted.

Pennsylvania No. 33.—In good condition.

Pennsylvania No. 37.—In good condition. This mine is operated through No. 33 at the present time. A new tippie and sidings have been completed and a rope haulage is being installed; and when these improvements are made the mine will be separated from No. 33.

Pennsylvania No. 34.—In very satisfactory condition.

Pennsylvania No. 35.—In fair condition. In fault. Worked very little.

Pennsylvania No. 39.—A new mine being developed. Did not come under the law.

## PENN MARY COAL COMPANY

Penn Mary No. 1 (No. 1 Works).—In very satisfactory condition.

Penn Mary Nos. 2, 3, 4 and 5 (No. 2 Works).—In satisfactory condition during the year, except that on my last inspection of No. 5 the ventilation was a little weak on the left section.

## RUSSELL COAL COMPANY

Victor Nos. 24 and 25.—Located near Clymer, were in very fair condition. Main heading on No. 24 has been in fault for sometime. No. 25 is bothered considerably with rolls.

Victor No. 26.—In very satisfactory condition. Only nine men were employed during the latter part of the year. The mine is practically abandoned owing to faults and rolls. The haulage plant has been removed.

Victor No. 27.—Was in fair condition on last inspection, except on second right heading, where the ventilation was a little weak.

Victor No. 29.—In very satisfactory condition, with the exception of the roof, which is full of glazed slips for several feet above the coal. Idle from April to December.

## BARNES AND TUCKER

Lancashire No. 3.—In very satisfactory condition, except that the drainage on main haulage between second and fourth left heading is defective.

Lancashire No. 6 and 7 were in fair condition. Drainage on main haulage road in No. 7 was defective. Only ribs and stumps are being worked at these mines.

Lancashire No. 10.—This mine was not in satisfactory condition on my last inspection, due to defective airways. A new slope is being made to cut off this mine.

Lancashire No. 12.—In fair condition, except on my last inspection, when the fan shaft was partly closed with ice. The fan was made reversible and this remedied the defect. The mine is now in very fair condition.

## CARROLLTOWN COAL COMPANY

Victor No. 1.—Not in satisfactory condition on my last inspection and has been idle since May.

Victor Nos. 2 and 3.—In very fair condition on my last inspection.

Victor No. 4.—In very satisfactory condition.

Victor No. 6.—In fair condition on my last inspection. Prior to that the ventilation was weak at face of mine.

Victor Nos. 9 and 10.—In very fair condition on my last inspection. No. 9 has been drowned out from April to December.

## EMPIRE COAL MINING COMPANY

Empire A.—Located near Barnesboro; in very fair condition on my last inspection. Prior to that the ventilation was a little weak in some parts near face of mine.

Empire P, Empire M and Empire R.—In very good condition.

## CLEARFIELD BITUMINOUS COAL CORPORATION

Gazzam.—In very satisfactory condition. The fan and fan house were destroyed by fire August 16 and were replaced as soon as possible. On August 22 the tippie was burned; a temporary tippie was erected and a permanent one built later.

West Branch.—In very satisfactory condition.

Sample Run and Barr.—In good condition.

## GREENWICH COAL AND COKE COMPANY

Greenwich Nos. 2 and 3.—Located at Greenwich; were in very fair condition.

Greenwich No. 4.—On my last inspection was in fair condition. Prior to that the ventilation was a little weak on face of second right section.

Greenwich No. 5.—This mine was not in satisfactory condition on my last inspection. The trolley wire had been put up the night before and the doors would not close, so the ventilation was not normal. Men were instructed to fix the doors at once.

Greenwich No. 8.—This mine is in fair condition for the number of men employed. On my last inspection the ventilating power was very limited.

#### STERLING COAL COMPANY

Sterling No. 1.—In fair condition, with few exceptions on left side of mine, where ventilation was a little weak at face.

Sterling No. 3.—Not in satisfactory condition on my last inspection. Ventilation was a little weak on pillar workings. Idle until June.

Sterling No. 5.—In fair condition. Idle until the latter part of June.

#### MADEIRA-HILL COAL MINING COMPANY

Spangler No. 1.—In fair condition, except that the drainage on haulage roads was defective, especially in wet weather.

Spangler No. 2.—This mine was not in very satisfactory condition. The drainage on haulage roads was very poor in wet weather.

Spangler Nos. 3 and 3½.—In very fair condition with few exceptions. The drainage is defective on some parts of haulage roads, especially in wet weather, due to water coming through from surface.

Spangler No. 4.—In fair condition. The development of this mine is much retarded by a fault in the main heading. Idle from April to October.

#### PEALE, PEACOCK AND KERR, INCORPORATED

Glen Richey Nos. 3, 4 and 5.—In very fair condition. Nos. 3 and 4 were idle from January to October.

Bloomington No. 19 A.—In good condition.

#### DIXON COAL COMPANY

Dixon No. 1.—In good condition.

#### CHERRY TREE COAL COMPANY

Emeigh Run No. 1.—Ventilation was a little weak on right section. New stoppings are being constructed and overcasts built. The left side of mine was in good condition.

Emeigh Run No. 3.—In good condition. Idle since last February.

#### DUNCAN AND SPANGLER COAL COMPANY

Delta.—Not in satisfactory condition on my last inspection. Ventilation was a little weak on left section near face.

Blubaker No. 13.—In fair condition. This mine is troubled by fault on face of main heading.

#### CYMBRIA COAL COMPANY

Cymbria Nos. 1 and 2.—In fair condition.

Cymbria No. 3.—In good condition, except on second right, where ventilation was weak at face.

## HINES COAL COMPANY

Hines Nos. 1 and 2.—In fair condition on my last inspection. On previous inspection ventilation was weak near face.

## ALLPORT COAL COMPANY

Allport No. 1.—In fair condition.

## OAK RIDGE COAL AND COKE COMPANY

Oak Ridge No. 1.—In fair condition.

Oak Ridge No. 2.—Not in satisfactory condition. Ventilation was weak near face of main headings.

## NANT Y GLO COAL MINING COMPANY

Nant Y Glo No. 2.—In fair condition, except on my last inspection the drainage was defective, due to recent heavy rains.

## RICH HILL COAL COMPANY

Rich Hill Nos. 1 and 2.—In very fair condition, except in some parts of No. 2, where ventilation was a little weak on my last inspection.

## WOODLAND COAL AND COKE COMPANY

Woodland Nos. 1 and 2. —In fair condition during the year, except on fourth right in No. 2 mine, where ventilation was a little weak on my last inspection.

## POTTS RUN LAND COMPANY

Potts Run Nos. 2 and 3.—In fair condition on my last inspection, except that in some parts of No. 2 ventilation was a little weak. These mines were idle from April to October.

## LOGAN COAL COMPANY

Logan No. 5.—In fair condition, except that on right side of mine ventilation was a little defective.

## PEERLESS COAL MINING COMPANY

Peerless No. 1.—Not in satisfactory condition on my last inspection. Ventilation was weak on face of main heading.

## HASTINGS COAL AND COKE COMPANY

Kinport No. 1.—In good condition.

## CLEARFIELD AND CAMBRIA COAL AND COKE COMPANY

Lee Run No. 1 (Clearfield colliery).—In good condition.

## OLANTA COAL MINING COMPANY

Olanda No. 1.—In good condition.

## RANDOLPH AND DIXONVILLE COAL COMPANY

Randolph No. 2.—In good condition.

## MORRISDALE COAL MINING COMPANY

Patton No. 1.—Was in poor condition, but they are fixing it up and making drainage. Did not come under the law.

Patton No. 2.—In fair condition. Did not come under the law.

## PATTON CLAY MANUFACTURING COMPANY

Patton Clay No. 3.—In fair condition, except that the drainage in wet weather was a little defective.

## MILLER RUN COAL COMPANY

Miller Run.—In very fair condition.

## REED COLLIERY COMPANY

Berwindale No. 1.—In fair condition, except that the drainage on haulage is defective.

## RED TOP COAL COMPANY

Red Top No. 1.—In fair condition on my last inspection. Did not come under the law during the greater part of the year.

## LITTLE CREEK COAL AND COKE COMPANY

Oshanter No. 3.—Was in fair condition on my last inspection, except that the drainage on haulage road was defective in some parts.

## VICTOR COAL COMPANY

Empire G.—In fair condition, except that on third left heading the ventilation was weak. Idle the first six months in the year.

## M. J. KELLY AND COMPANY, INCORPORATED

Burnadette.—In good condition.

## CHESTON COAL COMPANY

Cheston No. 1.—In fair condition. Did not come under the law until the latter part of the year.

## MOSIER AND JOSE

Wilson Run.—In good condition. Idle the greater part of the year and did not come under the law while in operation.

## BELLMORE COAL COMPANY

Klondike.—This mine was idle and worked only eighteen days in the latter part of December. No inspection was made during the year.

## IMPROVEMENTS

## PENNSYLVANIA COAL AND COKE COMPANY

(T. H. Watkins, Receiver)

Pennsylvania No. 22.—A new air shaft, 8 x 10 feet and 40 feet deep, was put down, and a 12 x 5 foot Stine fan placed thereon for ventilation.

Pennsylvania No. 28.—A new drift was put in near the face of second right main heading for traveling way to keep the employes off the haulage road.

Pennsylvania No. 29.—A new power house, haulage engine and compressor were installed to replace those destroyed by fire on the evening of November 21.

#### RUSSELL COAL COMPANY

Victor No. 24.—A new drift opening,  $7\frac{1}{2}$  x 6 x 200 feet long, was made for a traveling way to keep employes off haulage roads.

#### BARNES AND TUCKER

Lancashire No. 12.—A new shaft, 8 x 8 feet and 110 feet deep, was put down at face of mine for ventilation, and a 16 foot Brazil fan placed thereon, driven by a 35-horse-power electric motor, General Electric type. A new slope is being driven to cut off No. 10 mine and to get in ahead of fault.

#### CARROLLTOWN COAL COMPANY

Victor No. 2.—Installed one Ingersoll compressor, 28 x 32, and one Erie boiler, 80 horse-power, and two Erie boilers, 150 horse-power each.

Victor Nos. 2 and 3.—A new fan drift,  $7\frac{1}{2}$  x 6 x 250 feet long, was made and a 20-foot Pollock fan installed to ventilate these mines.

#### CLEARFIELD BITUMINOUS COAL CORPORATION

Gazzam.—A new fan house and tipple built to replace those destroyed by fire on August 16 and 26.

West Branch.—A new slope opening, 6 x 9 feet and 500 feet deep, has been made near face of mine for ventilation and traveling way. This will be a great improvement to the mine, as the other openings are two miles from this point.

#### MADEIRA-HILL COAL MINING COMPANY

Spangler No. 4.—A haulage plant was installed during July and August, which consists of two seven-ton motors, one Ball engine, one K. W. generator and two 115 horse-power and one 150 horse-power Phoenix boilers.

#### GREENWICH COAL AND COKE COMPANY

Greenwich No. 3.—Installed endless rope haulage plant to displace motor haulage.

Greenwich No. 5.—Installed two motors to displace mule haulage. Power taken from No. 8 plant.

#### PEALE, PEACOCK AND KERR, INCORPORATED

Glen Richey No. 5.—A 20-foot Brazil fan is being installed to displace a 10-foot Stine and will be completed early in 1910.

#### CYMBRIA COAL COMPANY

Cymbria Nos. 1 and 2.—One 150 horse-power Erie boiler was installed.

Cymbria No. 3.—One new Sirocco fan, 7 x 6, was installed.

## REED COLLIERY COMPANY

Berwindale.—Installed one 80 horse-power boiler and one 7-foot Stine fan.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the Miners Hall, Patton, Pa., April 6, 7, 8 and 9.

The Examining Board was composed of Alexander Monteith, Mine Inspector; T. A. Estep, Superintendent, and Timothy McCarthy, Mine Foreman.

There were forty-two applicants, thirty-eight for certificates as Mine Foremen, and four for certificates as Fire Bosses. The following persons passed a satisfactory examination and were granted certificates:

## Mine Foremen—First Grade

Richard A. Morgan, William Brown.

## Mine Foremen—Second Grade

Edward W. Walsh, H. L. Williams, Frederick Vinton, H. F. Dorr, Charles L. Davies.

## Fire Bosses

Martin Narin, W. H. Davies.

## ***SIXTEENTH DISTRICT***

---

FAYETTE, WASHINGTON AND GREENE COUNTIES

---

Brownsville, Pa., February 19, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I have the honor to transmit herewith my annual report as Inspector of Mines for the Sixteenth Bituminous District, for the year ending December 31, 1909, in compliance with the Acts of Assembly, approved May 15, 1893, and April 14, 1903.

I was transferred to this district July 1, 1909, from the First District.

The report contains the usual statistical information.

Respectfully submitted,

W. H. HOWARTH,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                  |           |
|------------------------------------------------------------------|-----------|
| Number of mines, .....                                           | 51        |
| Number of mines in operation, .....                              | 46        |
| Number of tons of coal shipped to market, .....                  | 1,210,215 |
| Number of tons used at mines for steam and heat, .....           | 179,326   |
| Number of tons sold to local trade and used by employees, .....  | 51,399    |
| Number of tons used in the manufacture of coke, .....            | 5,641,107 |
| Number of tons of coal produced, .....                           | 7,082,047 |
| Number of tons of coke produced, .....                           | 3,835,918 |
| Number of coke ovens, .....                                      | 8,345     |
| Number of coke ovens in operation, .....                         | 7,784     |
| Number of tons of coal produced by pick mining, .....            | 5,054,513 |
| Number of tons produced by compressed air machines, ...          | 1,430,727 |
| Number of tons produced by electrical machines, .....            | 596,807   |
| Number of persons employed inside of mines, .....                | 6,585     |
| Number of persons employed outside including coke workers, ..... | 3,459     |
| Number of persons employed at manufacture of coke, .....         | 1,983     |
| Number of fatal accidents inside of mines, .....                 | 29        |
| Number of fatal accidents outside, .....                         | 4         |
| Number of non-fatal accidents inside of mines, .....             | 53        |
| Number of non-fatal accidents outside, .....                     |           |
| Number of tons of coal produced per fatal accident inside, ..... | 244,208   |
| Number of persons employed per fatal accident inside, ..         | 227       |
| Number of persons employed per fatal accident outside, ..        | 865       |
| Number of persons employed per non-fatal accident inside, .....  | 124       |
| Number of persons employed per non-fatal accident outside, ..... |           |
| Number of wives made widows, .....                               | 18        |
| Number of children made orphans, .....                           | 46        |
| Number of steam locomotives used inside of mines, .....          |           |
| Number of steam locomotives used outside, .....                  | 9         |
| Number of compressed air locomotives used inside, .....          | 26        |
| Number of compressed air locomotives used outside, .....         |           |
| Number of electric motors used inside, .....                     | 30        |
| Number of electric motors used outside, .....                    | 7         |
| Number of fans in use, .....                                     | 44        |
| Number of furnaces in use, .....                                 | 1         |
| Number of gaseous mines in operation, .....                      | 36        |
| Number of non-gaseous mines in operation, .....                  | 10        |
| Number of new mines opened, .....                                | 8         |
| Number of old mines abandoned, .....                             |           |

TABLE A  
PRODUCTION OF COAL

| Names of Operators                                               | Tons      |
|------------------------------------------------------------------|-----------|
| H. C. Frick Coke Company, .....                                  | 2,802,007 |
| Consolidated Connellsville Coke Company, .....                   | 449,992   |
| Brier Hill Coke Company, .....                                   | 406,377   |
| Taylor Coal and Coke Company, .....                              | 377,950   |
| Orient Coke Company, .....                                       | 356,874   |
| Tower Hill Connellsville Coke Company, .....                     | 355,152   |
| Connellsville Central Coke Company, .....                        | 344,452   |
| Thompson Connellsville Coke Company, .....                       | 320,240   |
| Republic Iron and Steel Company, .....                           | 190,727   |
| Sunshine Coal and Coke Company, .....                            | 171,740   |

TABLE 4.—Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person      | Nationality | Occupation    | Age | Married or single | Number of widows | Number of orphans | Name of Mine    | County      | Nature and Cause of Accident in Brief                                                                                                                                       |
|------------------|---------------------|-------------|---------------|-----|-------------------|------------------|-------------------|-----------------|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jan. 19          | Alexander Dunitzki, | Hungarian,  | Miner,        | 29  | S.                | 0                | 0                 | Thompson No. 2, | Fayette,    | Instantly killed by fall of roof slate at face of his room.                                                                                                                 |
| Feb. 12          | James Crum,         | American    | Mine foreman, | 30  | M.                | 1                | 6                 | Buffington,     | Fayette,    | Fatally injured by being caught between haulage ropes on a curve on main haulage. Died in hospital March 3.                                                                 |
| 20               | Mike Cuche,         | Hungarian,  | Helper,       | 23  | S.                | 0                | 0                 | Bridgeport,     | Fayette,    | Fatally injured by fall of slate in his room. Died next day.                                                                                                                |
| 23               | Andy Layo,          | Polish,     | Driver,       | 28  | M.                | 1                | 1                 | Buffington,     | Fayette,    | Instantly killed by being caught between car and rib. He was dead when found so it could not be ascertained why he got off his trip on narrow side of the cutty.            |
| March 5          | George Sharpnuck,   | American,   | Laborer,      | 47  | M.                | 1                | 2                 | Ronco,          | Fayette,    | Fatally injured by being caught between corner of rib and ear that jumped the track while cleaning the track at mouth of room on No. 1 main heading. Died five hours later. |
| 10               | Steve Pilk,         | Slavonian,  | Miner,        | 38  | S.                | 0                | 0                 | Struthers,      | Fayette,    | Fatally injured by fall of slate at face of his room. He dug all the coal from under a piece of slate and neglected to set posts. Died 24 hours later.                      |
| April 8          | Andy Dolik,         | Slavonian,  | Miner,        | 20  | S.                | 0                | 0                 | Searight,       | Fayette,    | Instantly killed by fall of roof coal while drawing pillar. He was cutting a post to make it fall and was caught.                                                           |
| 23               | Frank Hardnock,     | Slavonian,  | Miner,        | 33  | M.                | 1                | 4                 | Millsboro,      | Washington, | Instantly killed by fall of slate at face of his room while loading a car of coal.                                                                                          |
| 24               | Mike Milar,         | Hungarian,  | Miner,        | 52  | M.                | 1                | 0                 | Teresa,         | Fayette,    | Instantly killed by fall of slate at face of his room. He knocked out the posts so that the slate would fall and was caught while finishing loading a car of coal.          |

TABLE 4.—Continued

| Date of accident | Name of Person        | Nationality    | Occupation        | Age | Married or single | Number of widows | Number of orphans | Name of Mine      | County         | Nature and Cause of Accident in Brief                                                                                                                                                                                                                   |
|------------------|-----------------------|----------------|-------------------|-----|-------------------|------------------|-------------------|-------------------|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| May 18           | George Menish, -----  | Hungarian, --- | Coke employe, --- | 26  | M.                | 1                | 4                 | Bridgeport, ----- | Fayette, ----- | Instantly killed by ram for coke ovens which caught his head against the oven door as he was looking into the oven. Outside.                                                                                                                            |
| June 4           | Harry Cruse, -----    | American, ---  | Laborer, ---      | 23  | S.                | 0                | 0                 | Garwood, -----    | Fayette, ----- | Fatally injured. He was standing on the edge of a wall 8 feet high, and in lifting a piece of timber 6 inches by 6 inches by 18 feet, one end of the timber slipped, causing him to fall backwards. He died a few hours later in the hospital. Outside. |
| 25               | Henry Gensbaur, ---   | German, ---    | Laborer, -----    | 47  | M.                | 1                | 5                 | Orient, -----     | Fayette, ----- | Fatally injured. As he was opening a trap door on the entry for a driver his leg was caught by cars that had become uncoupled. Blood poisoning set in after the leg was amputated and he died June 29.                                                  |
| July 2           | John Pekola, -----    | Polish, ---    | Miner, -----      | 27  | S.                | 0                | 0                 | Bridgeport, ----- | Fayette, ----- | Fatally injured by fall of slate while drawing pillars. He was knocking out a post in his working place when the slate fell against the post, causing it to strike him on the chest. He died July 3.                                                    |
| 14               | Paul Sabo, -----      | Slavonian, --- | Miner, -----      | 37  | M.                | 1                | 2                 | Edenborn, -----   | Fayette, ----- | Killed instantly by fall of slate at face of his room. He neglected to set post.                                                                                                                                                                        |
| 20               | Toney Rose, -----     | Italian, ---   | Miner, -----      | 28  | S.                | 0                | 0                 | Bridgeport, ----- | Fayette, ----- | Fatally injured. He fell in front of the motor while assisting the motorman to make up a trip of cars on main entry. He died August 2.                                                                                                                  |
| 22               | Dallas Gregory, ----- | American, ---  | Driver, -----     | 25  | M.                | 1                | 1                 | Brier Hill, ----- | Fayette, ----- | Instantly killed by fall of slate while hauling a loaded car along the entry.                                                                                                                                                                           |

|       |    |                     |            |               |    |    |   |   |                 |             |                                                                                                                                                                                                                                                                                                                                                      |
|-------|----|---------------------|------------|---------------|----|----|---|---|-----------------|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aug   | 10 | John Hovan,         | Slavonian, | Laborer,      | 60 | M. | 1 | 2 | Edenborn,       | Fayette,    | Instantly killed by falling down the shaft. He was assisting the top man in putting a loaded car of material on the cage at the top of the shaft. While the cage was coming up the shaft Hovan opened the safety gates, turned back the safety blocks, and helped the top man to push the car forward. He fell with the car onto the ascending cage. |
|       | 23 | John V. O'Laughlin, | Irish,     | Driver,       | 21 | S. | 0 | 0 | Thompson No. 1, | Fayette,    | Instantly killed by being run over by cars. He fell off loaded trip while attempting to set a brake as his trip was nearing the shaft bottom.                                                                                                                                                                                                        |
| Sept. | 1  | Nick Covoich,       | Slavonian, | Haulage-man,  | 39 | M. | 1 | 2 | Republic,       | Fayette,    | Instantly killed by cars on butt entry. After cleaning up a fall of slate he started a trip of cars and was caught between the cars and crushed.                                                                                                                                                                                                     |
|       | 3  | John Shimko,        | American,  | Hitcher,      | 17 | S. | 0 | 0 | Lambert,        | Fayette,    | Instantly killed in a wreck on main entry while riding on a motor after his day's work was done.                                                                                                                                                                                                                                                     |
| Oct.  | 8  | Elmer Buders,       | American,  | Miner,        | 42 | M. | 1 | 1 | Century,        | Fayette,    | Instantly killed by fall of roof slate in his working place while knocking out a post to make a fall on the pillar.                                                                                                                                                                                                                                  |
|       | 12 | Mike Novark,        | Austrian,  | Mucker,       | 22 | S. | 0 | 0 | Gates No. 1,    | Fayette,    | Instantly killed in new air shaft that was being sunk for Gates mine. A blast had been fired and the sides had been examined as usual and found all right, but two hours later a large piece of rock fell from the side of the shaft and killed Novark.                                                                                              |
|       | 16 | James Hines,        | American,  | Coke employe, | 24 | M. | 1 | 0 | Donald No. 2,   | Fayette,    | Fatally injured in collision of larries on coke ovens. Outside.                                                                                                                                                                                                                                                                                      |
|       | 22 | John Manning,       | American,  | Miner,        | 18 | S. | 0 | 0 | Millsboro,      | Washington, | Fatally injured by fall of slate at face of room. They were cutting coal by puncher machine when the slate fell. The fire boss and the boy's father had examined the slate a few minutes before it fell and thought it safe. Died in the hospital.                                                                                                   |
| Nov.  | 1  | Peter Urovic,       | Croatian,  | Bratticeman,  | 44 | M. | 1 | 4 | Republic,       | Fayette,    | Killed by fall of slate while removing the frame of an old trap door on No. 7 butt haulage way.                                                                                                                                                                                                                                                      |
|       | 2  | Mike Duretza,       | Slavonian, | Laborer,      | 22 | S. | 0 | 0 | Buffington,     | Fayette,    | Killed by fall of roof slate on roadway leading to pillar workings, 1st section, while he and another workman were cleaning away a fall of slate.                                                                                                                                                                                                    |

| Nov. 5           | Albert Clinear, ..... | Polish, ....  | Laborer, .... | 30  | M. 1              | 5                | Thompson No. 1,   | Fayette, .....    |        | Fatally injured by cars. He was caught and knocked down by the cars while turning a switch on the main haulage way.                                                                                                  |
| 9                | Frank Rusage, .....   | Polish, ....  | Miner, .....  | 21  | S. 0              | 0                | Millsboro, .....  | Washington, ..... |        | Fatally injured. He was caught between the cars and side of roadway while riding on a loaded trip of cars on main entry. He was leaning the road as he was to become driver.                                         |
| 11               | Robert Laurie, .....  | American, ..  | Cager, .....  | 16  | S. 0              | 0                | Palmer, .....     | Fayette, .....    |        | Instantly killed by fall of slate. He walked back from the cage about 200 feet to watch the men cutting the coal with the machine.                                                                                   |
| 22               | Stanley Washnock, ..  | Polish, ....  | Miner, .....  | 36  | M. 1              | 2                | Thompson No. 2,   | Fayette, .....    |        | Instantly killed by falling down the shaft. He with three other miners was being hoisted up the shaft. When they had been raised about 40 feet, Washnock was seen to stoop and immediately disappear down the shaft. |
| 29               | Paul Bearish, .....   | Slavonian, .. | Driver, ..... | 19  | S. 0              | 0                | Sterling, .....   | Fayette, .....    |        | Fatally injured by being caught between car and side of entry. For some reason he got off his empty trip. Died in the hospital.                                                                                      |
| Dec. 21          | Robert C. Ross, ..... | American, ..  | Foreman, ...  | 42  | M. 1              | 5                | Virginia, .....   | Fayette, .....    |        | Fatally injured. His coat was caught by a revolving shaft of the coal washer, about 1.30 P. M. He died in the hospital the same day. Outside.                                                                        |
| 29               | Adam Gadenwitch, ..   | Austrian, ... | Miner, .....  | 52  | M. 1              | 0                | Century, .....    | Fayette, .....    |        | Instantly killed by fall of roof while digging out a stump of coal at face of rib in order to "make a fall." He had been warned not to do so.                                                                        |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person           | Nationality   | Occupation      | Age | Married or single | Name of Mine            | County            | Nature and Cause of Accident in Brief                                                   |
|------------------|--------------------------|---------------|-----------------|-----|-------------------|-------------------------|-------------------|-----------------------------------------------------------------------------------------|
| Jan. 1           | Alexander Simons, --     | Hungarian, -- | Miner, --       | 28  | M.                | LaBelle, -----          | Fayette, -----    | Ankle bone fractured by fall of draw slate at face of his room.                         |
| 6                | Steve Sezh, -----        | Slavonian, -- | Miner, --       | 24  | S.                | Ruffington, -----       | Fayette, -----    | Hip fractured by being squeezed between car and rib.                                    |
| 13               | Walter Rowan, -----      | American, --  | Cager, --       | 46  | M.                | Herbert, -----          | Fayette, -----    | Leg broken. Caught between two cars at shaft bottom.                                    |
| Feb. 10          | Joe Bennett, -----       | American, --  | Miner, --       | 17  | S.                | Millsboro, -----        | Washington, ----- | Leg fractured. He was caught in the haulage chain on main slope.                        |
| 12               | William Horsecamp, ----- | American, --  | Rope tender, -- | 26  | M.                | Ruffington, -----       | Fayette, -----    | Hip injured by being caught by haulage rope on main entry.                              |
| 23               | Mike Kovash, -----       | Slavonian, -- | Miner, --       | 23  | M.                | Low Phos No. 1, -----   | Fayette, -----    | Leg broken by fall of slate.                                                            |
| March 2          | Steve Howatis, -----     | Slavonian, -- | Driver, --      | 36  | M.                | Brier Hill, -----       | Fayette, -----    | Leg broken by fall of slate.                                                            |
|                  | Charles Kobash, -----    | Russian, --   | Miner, --       | 60  | M.                | Brier Hill, -----       | Fayette, -----    | Two ribs broken. Caught between car and rib in his room by horse pulling car off track. |
| 3                | Press Paur, -----        | American, --  | Helper, --      | 19  | S.                | Ronco, -----            | Fayette, -----    | Leg and breast bruised by running down track into a car on the empty track.             |
| 11               | Andy Wettergrow, --      | Polish, --    | Miner, --       | 29  | S.                | Bridgeport, -----       | Fayette, -----    | Leg broken by fall of slate at face of butt entry.                                      |
| 13               | Steve Middle, -----      | Slavonian, -- | Loader, --      | 23  | S.                | Clyde, -----            | Washington, ----- | Compound fracture of leg by fall of slate. Neglected to set post.                       |
| 17               | John Minjock, -----      | Slavonian, -- | Miner, --       | 23  | S.                | Vesta No. 5, -----      | Washington, ----- | Leg broken in two places by fall of slate from unseen slip in main entry.               |
|                  | Joe Kokles, -----        | Slavonian, -- | Miner, --       | 27  | M.                | Vesta No. 5, -----      | Washington, ----- | Ankle bone broken by fall of slate in main entry.                                       |
| 25               | George Younger, -----    | Slavonian, -- | Driver, --      | 21  | S.                | Tower Hill No. 2, ----- | Fayette, -----    | Badly squeezed between cars on curve.                                                   |
| April 1          | Andy Smith, -----        | Italian, --   | Miner, --       | 36  | M.                | Crowthers, -----        | Fayette, -----    | Thigh bone broken by fall of slate at face of his room.                                 |
| 10               | Paul Marcovitz, -----    | Hungarian, -- | Greaser, --     | 18  | S.                | Republic, -----         | Fayette, -----    | Leg crushed. Caught between bumpers of two steel cars in mine near shaft bottom.        |
| 19               | Valentine Tenori, -----  | Italian, --   | Driver, --      | 20  | M.                | Clyde, -----            | Washington, ----- | Head badly cut by mule kicking him.                                                     |

| 30      | Pete Tomori, -----         | Hungarian, ----- | Loader, -----        | 20 | S. | LaBelle, -----          | Fayette, ----- | Leg broken by fall of coal in his place at face of his room.                                             |
| Nov. 20 | Joseph Urechtwachtz, ----- | Slavonian, ----- | Miner, -----         | 25 | S. | Donald, -----           | Fayette, ----- | Rupture of urethra. Caught by fall of slate at face of his room.                                         |
| 28      | John Swistock, -----       | Slavonian, ----- | Driver, -----        | 26 | M. | Struthers, -----        | Fayette, ----- | Leg broken. Caught between cars while riding on trip on main entry.                                      |
| Dec. 2  | John Bushock, -----        | Slavonian, ----- | Miner, -----         | 35 | M. | Lambert, -----          | Fayette, ----- | Spine broken by fall of roof while knocking out posts at face of rib, 17 entry.                          |
| 9       | Joe Tussau, -----          | Slavonian, ----- | Laborer, -----       | 23 | S. | Lambert, -----          | Fayette, ----- | Leg broken. Caught between the front car of trip and the horse on entry.                                 |
| 11      | Mike Popovitch, -----      | Slavonian, ----- | Miner, -----         | 27 | M. | Champion, -----         | Fayette, ----- | Skull fractured by fall of slate while knocking out a post at face of rib No. 1 entry.                   |
| 13      | Lawrence Delphine, -----   | Italian, -----   | Shot firer, -----    | 35 | M. | Tower Hill No. 2, ----- | Fayette, ----- | Face and neck burned by blast that had previously missed fire.                                           |
|         | Charles Foot, -----        | Italian, -----   | Miner, -----         | 25 | S. | Lambert, -----          | Fayette, ----- | Squeezed across hips by cars on B right entry while riding out on driver's trip.                         |
| 17      | Mike Trepeck, -----        | Slavonian, ----- | Miner, -----         | 33 | M. | Lambert, -----          | Fayette, ----- | Rib broken while riding on trip of cars on main entry. His head struck a timber and he was knocked down. |
|         | Andy Tressa, -----         | Slavonian, ----- | Driver, -----        | 21 | S. | Brier Hill, -----       | Fayette, ----- | Hip dislocated. He was knocked down by air motor on C left entry.                                        |
| 18      | Mike Masaka, -----         | Slavonian, ----- | Snapper, -----       | 21 | S. | Brier Hill, -----       | Fayette, ----- |                                                                                                          |

## CONDITION OF MINES

## H. C. FRICK COKE COMPANY

Buffington, Bridgeport, Dearth Nos. 1 and 2, Edenborn, Filbert Nos. 1 and 2, Gates Nos. 1 and 2, Lambert, Palmer Ronco and Ralph.—Ventilation, drainage and general conditions very good. Only permissible explosives are used, and all blasts are fired by shot firers employed especially for that purpose.

Effective watering system—water pipes and water-cars—are provided and used to dampen the roadways. Locked safety lamps are used exclusively in all these mines except in Dearth Nos. 1 and 2, which are non-gaseous.

In Bridgeport mine locked safety lamps are used on pillar work only. Competent men are employed as "fall bosses" to look after the safety of miners withdrawing pillars.

## CONSOLIDATED CONNELLSVILLE COKE COMPANY

Donald Nos. 1 and 2, Sterling and Virginia.—Ventilation and drainage good. Permissible explosives only are used, and shot firers are employed to do all blasting. Water cars are used when necessary to water the roads. Sterling and Virginia are worked by the exclusive use of locked safety lamps.

## BRIER HILL COKE COMPANY

Brier Hill.—General conditions, ventilation and drainage very good. No blasting permitted. Water pipe system and water cars used to dampen roadways. Locked safety lamps used exclusively.

## TAYLOR COAL AND COKE COMPANY

Searight.—Ventilation and drainage good. The mine is naturally damp. Only permissible explosives used. The blasting is all done by shot firers. Locked safety lamps used exclusively.

## ORIENT COKE COMPANY

Orient.—Ventilation and drainage good. Permissible explosives only are used, and shot firers are employed to do all blasting. Roadways dampened by use of water pipes and water cars. Locked safety lamps used exclusively.

## TOWER HILL CONNELLSVILLE COKE COMPANY

Tower Hill Nos. 1 and 2.—Ventilation and drainage good. Only permissible explosives used. Shot firers are employed. Roads dampened by compressed air water tanks. Safety lamps used exclusively.

## CONNELLSVILLE CENTRAL COKE COMPANY

Low Phos Nos. 1 and 2, and Herbert.—Ventilation and drainage very good. Only permissible explosives used, and all blasts are fired by shot firers. Water car and water pipes used to water roadways. Safety lamps used in Herbert mine exclusively.

## THOMPSON CONNELLSVILLE COKE COMPANY

Thompson Nos. 1 and 2.—Ventilation and drainage good. Only permissible explosives used. Shots are fired by shot firers. Roads dampened by compressed air water tanks. Safety lamps used exclusively.

## REPUBLIC IRON AND STEEL COMPANY

Republic.—Ventilation and drainage very good. Permissible explosives are used and shot firers are employed. Compressed air water tanks are used to dampen roadways. Safety lamps used exclusively.

## SUNSHINE COAL AND COKE COMPANY

Teresa and Eleanor.—Ventilation and drainage good. The mines are damp. Only permissible explosives used. All blasting is done by shot firers.

## CENTURY COKE COMPANY

Century.—Ventilation and drainage very good. Only permissible explosives are used. All blasts are fired by shot firers. Water pipes and water car are used to dampen roadways. Locked safety lamps used exclusively.

## STRUTHERS COAL AND COKE COMPANY

Struthers.—Ventilation and drainage very good. Only permissible explosives are used for blasting coal. Shot firers are employed to fire all blasts. Water pipes and water cars are used to keep roadways damp. Safety lamps used exclusively.

## WOODSIDE COKE COMPANY

Martin.—Drainage good. Ventilation not satisfactory on account of the air being allowed to escape through surface breaks to the outside near the fan. This matter is being remedied by the construction of overcasts. The mine is naturally damp. On December 26, the fan caught fire from electric wires and was destroyed. The fire spread into the mine and the coal is burning near the outcrop. Only permissible explosives are used to blast coal and all shots are fired by shot firers.

## McKEEFREY COAL COMPANY

McKeefrey.—Ventilation, drainage and general conditions very good. Only permissible explosives are used, and shot firers are employed to fire all blasts at night. Roadways are kept scrupulously clean and damp.

## MONONGAHELA RIVER CONSOLIDATED COAL AND COKE COMPANY

Crowthers.—Ventilation and drainage good. Only permissible explosives used. Roadways are dampened by exhaust steam in the air current and by the use of water car.

## DILWORTH COAL COMPANY

Dilworth.—Ventilation and drainage good. Only permissible explosives used for blasting. Water car used to dampen roadways.

## BESSEMER COKE COMPANY

Millsboro.—Ventilation and drainage good. The mine is naturally very damp. Only permissible explosives are used, and shot firers are employed to fire all blasts. Safety lamps used exclusively.

## CLYDE COAL COMPANY

Clyde.—Ventilation and drainage good. Only permissible explosives used. The humidity of the air currents is kept in an excellent condition by eleven water sprays and roadways dampened by water pipes with hose connections.

## PROSPECT COAL AND COKE COMPANY

Solon.—Ventilation and drainage good. Only permissible explosives are used to blast coal. The mine is naturally damp.

## LA BELLE COKE COMPANY

LaBelle.—Ventilation and drainage good. Permissible explosives are used to blast coal. Water car is used to dampen roadways.

## VESTA COAL COMPANY

Vesta No. 5.—Ventilation and drainage good. The mine is naturally damp. Only permissible explosives are used to blast the coal.

## HUSTEAD-SEMANS COAL AND COKE COMPANY

Hustead.—Ventilation and drainage good. The mine is naturally damp. Only permissible explosives are used to blast the coal.

## JACOBS CREEK COAL AND COKE COMPANY

Jacobs Creek.—Drainage good. Ventilation not satisfactory, and a new fan is being installed in place of the furnace. The mine is naturally damp. Only permissible explosives used.

## BROWNSVILLE COKE COMPANY

Ganns.—Ventilation and drainage fair. The mine is damp. Permissible explosives are used and shot firers employed to blast coal at night.

## UNION CONNELLSVILLE COKE COMPANY

Elizabeth.—Ventilation and drainage very good. The mine is naturally damp. Permissible explosives are used and all blasts are fired by shot firers. Safety lamps used exclusively.

## DUNLAP CONNELLSVILLE COKE COMPANY

Garwood.—Ventilation and drainage very good. The mine is damp. Only permissible explosives are used and all blasts are fired by shot firers. Locked safety lamps used exclusively.

## CHAMPION CONNELLSVILLE COKE COMPANY

Champion.—Ventilation and drainage good. The mine is damp. Permissible explosives used. Blasts are fired by shot firer.

W. HARRY BROWN

Alicia.—A new mine, not yet completed.

## IMPROVEMENTS

## H. C. FRICK COKE COMPANY

Buffington.—Installed a rescue station equipped with four oxygen helmets, 2000 liters of oxygen and one resuscitator. Built seventeen permanent stoppings.

Bridgeport.—Built thirteen permanent stoppings, four overcasts and a brick safety lamp house.

Dearth No. 1.—Installed one 7-ton electric locomotive, and built twenty-three permanent stoppings and one overcast.

Dearth No. 2.—Built thirteen permanent stoppings and one overcast.

Edenborn.—Built sixty-two permanent stoppings and three overcasts.

Filbert Nos. 1 and 2.—This is a new plant. No. 1 shaft is 550 feet deep and No. 2 is 581 feet. Both shafts are concrete lined, equipped with steel head frames, storage bins, large hoisting engines, low and high pressure air compressors for coal cutting machines and haulage. At No. 2 shaft a Capell type reversible fan, size 7 x 26 feet, has been installed, but is not yet in operation.

Gates Nos. 1 and 2.—Built fifty-seven permanent stoppings and one overcast. Installed a Norwalk low pressure air compressor and extended haulage one-half mile.

Lambert.—Built thirty-five permanent stoppings and one overcast.

Ronco.—Installed one compressed air haulage locomotive.

Ralph.—This is a new plant, with all modern improvements, machinery, buildings, etc.

## CONSOLIDATED CONNELLSVILLE COKE COMPANY

Donald Nos. 1 and 2.—Built twenty permanent stoppings and a brick stable. Installed one Duplex double plunger pump and one Compound duplex double plunger pump for fresh water pumping station.

Sterling.—Built a brick safety lamp house and twenty permanent stoppings.

Virginia.—Installed a Foust concentrator and coal washer, the first of its kind in the bituminous coal region.

## BRIER HILL COKE COMPANY

Brier Hill.—Built three permanent stoppings, extended haulage road 4000 feet, and added 2000 feet to water pipe sprinkling system.

## TAYLOR COAL AND COKE COMPANY

Searight.—Built thirty-four permanent stoppings and two overcasts. Excavated inside engine room size 25 x 32 feet, lined with brick and concrete. Installed haulage engines size 24 x 36 inches.

## ORIENT COKE COMPANY

Orient.—Built one permanent overcast, forty-seven permanent stoppings, a stone safety lamp house and ten two-room houses. Installed a five-ton compressed air locomotive.

## TOWER HILL CONNELLSVILLE COKE COMPANY

Tower Hill No. 1.—Built thirty-two permanent stoppings and one hundred and forty coke ovens. Installed a 200 K. W. electric generator.

Tower Hill No. 2.—Built one hundred and sixty-eight coke ovens, six permanent stoppings, two overcasts and ten six-room houses. Completed concrete lining at shaft bottom 440 feet. Installed a 200 K. W. electric generator.

## CONNELLSVILLE CENTRAL COKE COMPANY

Herbert.—Built twelve concrete stoppings, one concrete overcast, 110 rectangular coke ovens and 25 blocks of eight-room houses. Installed one Yough pump, a second motion hoisting engine, and 50 forty-bushel mine cars.

## REPUBLIC IRON AND STEEL COMPANY

Republic.—Built sixteen concrete stoppings, three concrete overcasts, and completed concrete arch at shaft bottom. Installed two compressed air locomotives and one chemical mine fire engine. Enlarged power house fifty feet.

## STRUTHERS COAL AND COKE COMPANY

Struthers.—Built twenty-three permanent stoppings.

## WOODSIDE COKE COMPANY

Martin.—Built five permanent overcasts and two permanent stoppings; relaid main haulage road with 60-pound steel rail, built new steel trestle over "Fast Hollow," reconstructed old coke ovens; erected one new motor house. Installed a Jeffrey belt conveyor.

## McKEEFREY COAL COMPANY

McKeefrey.—Built two permanent overcasts and twelve permanent stoppings.

## MONONGAHELA RIVER CONSOLIDATED COAL AND COKE COMPANY

Crowthers.—Built fifteen permanent stoppings; extended haulage 1500 feet; erected building for storing carbonite, a building for motor house; tipple raised 6 feet, and new cross over dump installed. Also installed one haulage engine and one Erie steam boiler.

## BESSEMER COKE COMPANY

Millsboro.—Installed at Masontown a rescue station equipped with oxygen helmets; built 157 beehive coke ovens, one kiln at brick yard; constructed a large water reservoir, capacity 30,000,000 gallons. Increased capacity of washed-coal bin by 225 tons. Installed one 400 horse power tubular boiler, one Ingersoll Rand air compressor, twelve mining machines and one coal conveyor and bin.

## LA BELLE COKE COMPANY

LaBelle.—Built six permanent stoppings and installed one 6-ton electric gathering locomotive and one Dewing 6-inch pump.

## VESTA COAL COMPANY

Vesta No. 5.—Built thirty permanent stoppings.

## JACOBS CREEK COAL AND COKE COMPANY

Jacobs Creek.—Two new openings to the surface have been made for drainage and ventilation.

## UNION CONNELLSVILLE COKE COMPANY

Elizabeth.—This is a new plant equipped with modern machinery and necessary buildings.

## PROSECUTIONS FOR VIOLATIONS OF THE MINING LAWS

January 11, information was made against Andrew Marshall and John Quinn, charging them with violation of Article 20, Rule 63, of the mining law. Andrew Marshall was held for March term of court. March 11, he entered a plea of guilty and the court sentenced him to pay a fine of one hundred dollars and serve six months in jail.

John Quinn was not apprehended until after Andrew Marshall had been sentenced. He was tried and the case was dismissed as Andrew Marshall had entered a plea of guilty to the charge.

February 26, information was made against Dominic Jordon, charging him with passing a danger signal and entering the mine and kindling a fire. After the hearing he was bound over to appear in court. March 11, he entered a plea of guilty to both charges and the court sentenced him to pay a fine of twenty-five dollars and costs.

July 7, information was made against Joe Repka, charging him with crossing a danger signal and entering a working place that had been fenced off by the fire boss of Tower Hill mine.

After the hearing he was bound over to appear in court. He entered a plea of guilty and was sentenced to pay twenty-five dollars and costs.

October 18, information was made against H. M. Wilson, superintendent of the Martin mine, of the Woodside Coke Company, charging him with operating the mine without a fire boss and making false entries in the mine foreman's and fire bosses' record books. December 6, the Grand Jury found a true bill against him. The case has not yet been disposed of.

December 1, information was made against Joe Gartly, fire boss, charging him with neglect of duty and making false entries in fire bosses record book. He is a fugitive from justice.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held April 6, 7, 8 and 9.

The Board of Examiners was composed of Harry Drum, Superintendent; William Seddon, Mine Foreman, and David Young, Mine In-

spector. There were ninety-one applicants examined, twenty-six for certificates as Mine Foremen, and sixty-five for certificates as Fire Bosses. The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

#### First Grade

James R. Black, Anson B. Nedrow, Robert McKenna, Thomas J. Kane, James C. Smith, John Shultz, Robert M. Charlton, Thomas Skillcorn and James A. Conway.

## **SEVENTEENTH DISTRICT**

---

ALLEGHENY AND WASHINGTON COUNTIES

---

Pittsburg, Pa., February 14, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I have the honor to transmit herewith my report as Inspector of Mines of the Seventeenth Bituminous District for the year ending December 31, 1909, in compliance with the Acts of Assembly of May 15, 1893, and April 14, 1903.

I was transferred to this District July 1, 1909, from the Seventh District.

The report contains the usual tables and statistics, a brief description of the mines and the most important improvements made during the year, a report of the annual examinations of applicants for mine foremen's certificates and a report of the number of safety lamps in use, and the legal proceedings instituted.

Respectfully submitted,

John I. Pratt,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                   |                 |
|-------------------------------------------------------------------|-----------------|
| Number of mines, .....                                            | 60              |
| Number of mines in operation, .....                               | 36              |

| Number of tons of coal produced, .....                            | <hr/> 3,056,876 |
| Number of tons of coke produced, .....                            | <hr/>           |
| Number of coke ovens, .....                                       | <hr/>           |
| Number of coke ovens in operation, .....                          | <hr/>           |
| Number of tons of coal produced by pick mining, .....             | 1,622,971       |
| Number of tons produced by compressed air machines, ....          | 1,326,164       |
| Number of tons produced by electrical machines, .....             | 3,056,876       |
| Number of persons employed inside of mines, .....                 | 8,089           |
| Number of persons employed outside, including coke workers, ..... | 974             |
| Number of persons employed at manufacture of coke, ...            | <hr/>           |
| Number of fatal accidents inside of mines, .....                  | 26              |
| Number of fatal accidents outside, .....                          | 1               |
| Number of non-fatal accidents inside of mines, .....              | 39              |
| Number of non-fatal accidents outside, .....                      | 1               |
| Number of tons of coal produced per fatal accident inside, ..     | 231,000         |
| Number of persons employed per fatal accident inside, ..          | 311             |
| Number of persons employed per fatal accident outside, ..         | 974             |
| Number of persons employed per non-fatal accident inside, ..      | 207             |
| Number of persons employed per non-fatal accident outside, ..     | 974             |
| Number of wives made widows, .....                                | 14              |
| Number of children made orphans, .....                            | 28              |
| Number of steam locomotives used inside of mines, .....           | <hr/>           |
| Number of steam locomotives used outside, .....                   | 6               |
| Number of compressed air locomotives used inside, .....           | 3               |
| Number of compressed air locomotives used outside, .....          | <hr/>           |
| Number of electric motors used inside, .....                      | 62              |
| Number of electric motors used outside, .....                     | <hr/>           |
| Number of fans in use, .....                                      | 50              |
| Number of furnaces in use, .....                                  | 10              |
| Number of gaseous mines in operation, .....                       | 20              |
| Number of non-gaseous mines in operation, .....                   | 16              |
| Number of new mines opened, .....                                 | <hr/>           |
| Number of old mines abandoned, .....                              | 5               |

TABLE A  
PRODUCTION OF COAL

| Names of Operators                                               | Tons      |
|------------------------------------------------------------------|-----------|
| Pittsburg Coal Company, .....                                    | 2,441,350 |
| Pittsburg-Buffalo Company, .....                                 | 770,689   |
| Pittsburg Terminal Railroad and Coal Company, .....              | 716,930   |
| Youghiogheny and Ohio Coal Company, .....                        | 588,555   |
| Crescent Coal Company, .....                                     | 357,590   |
| United Coal Company, .....                                       | 344,269   |
| Monongahela River Consolidated Coal and Coke Com-<br>pany, ..... | 230,214   |
| Mifflin Coal Company, .....                                      | 204,160   |
| Meadow Lands Coal Company, .....                                 | 192,129   |
| Ollett Brothers, .....                                           | 73,148    |
| J. M. Greek and Company, .....                                   | 39,703    |
| E. R. Wise, .....                                                | 32,928    |
| W. S. B. Hays, .....                                             | 11,305    |
| Paul Coal Company, .....                                         | 3,041     |
| Total, .....                                                     | 6,006,011 |

Production by Counties

|                   |           |
|-------------------|-----------|
| Allegheny, .....  | 3,424,846 |
| Washington, ..... | 2,581,165 |
| Total, .....      | 6,006,011 |

TABLE B.—Fatal and non-fatal accidents inside and outside of mines; number of tons of coal produced per accident; number of persons employed; number employed per accident

| Names of Operators                        | Fatal Accidents |         |       | Non-Fatal Accidents |         |       | Tons of coal produced per fatal accident inside | Tons of coal produced per non-fatal accident inside | Number of employees inside | Number of employees outside | Total number of employees | Number of employees inside per fatal accident | Number of employees outside per fatal accident | Number of employees inside per non-fatal accident | Number of employees outside per non-fatal accident |
|-------------------------------------------|-----------------|---------|-------|---------------------|---------|-------|-------------------------------------------------|-----------------------------------------------------|----------------------------|-----------------------------|---------------------------|-----------------------------------------------|------------------------------------------------|---------------------------------------------------|----------------------------------------------------|
|                                           | Inside          | Outside | Total | Inside              | Outside | Total |                                                 |                                                     |                            |                             |                           |                                               |                                                |                                                   |                                                    |

| Nov. 22 | John Kobosky, -----     | Slavonian, ----- | Loader, ----- | 36 | S. ----- | Rich Hill, -----  | Washington, ----- | Instantly killed by fall of slate while loading car at face of room.                     |
| Dec. 8  | Charles Marshall, ----- | American, --     | Company man   | 19 | S. ----- | Hazel, -----      | Washington, --    | Fatally injured by fall of rock roof while digging a hole in the rib for set of timbers. |
| 11      | Dominic Flair, -----    | Italian, ----    | Loader, ----- | 26 | S. ----- | G or No. 7, ----- | Allegheny, ---    | Fatally injured by fall of slate at face of working place while knocking coal.           |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person          | Nationality       | Occupation          | Age | Married or single | Name of Mine              | County            | Nature and Cause of Accident in Brief                                                        |
|------------------|-------------------------|-------------------|---------------------|-----|-------------------|---------------------------|-------------------|----------------------------------------------------------------------------------------------|
| Feb. 4           | Jno. Geakea, -----      | Lithuanian, ----- | Loader, -----       | 22  | S.                | Manifold No. 2, -----     | Washington, ----- | Toes smashed by fall of slate at face of room.                                               |
| 10               | St. Clawson, -----      | Slavonian, -----  | Driver, -----       | 23  | S.                | Bertha, -----             | Allegheny, ---    | Leg broken above ankle. Run over by mine car near butt entry.                                |
| 15               | George Peale, -----     | Slavonian, -----  | Loader, -----       | 34  | M.                | Peters Creek No. 2, ---   | Allegheny, ---    | Hip crushed and leg broken by fall of slate at face of room.                                 |
| 16               | Louis Banoty, -----     | Hungarian, -----  | Loader, -----       | 36  | M.                | Bertha, -----             | Allegheny, ---    | Both legs broken by fall of slate at face of room.                                           |
| March 19         | Andy Franko, -----      | Slavonian, -----  | Machine-runner, --- | 27  | M.                | Bertha, -----             | Allegheny, ---    | Left ankle broken by fall of roof coal at face of room.                                      |
| 30               | Jos. Chesv, -----       | Hungarian, -----  | Loader, -----       | 31  | M.                | Bertha, -----             | Allegheny, ---    | Collar bone broken by being caught between mine car and coal pillar, in room, 15 butt entry. |
| April 14         | L. Venture, -----       | Italian, -----    | Driver, -----       | 25  | M.                | Rich Hill, -----          | Washington, ---   | Heel injured by being caught by mine car at face of room.                                    |
| 23               | Louis Rupinsky, -----   | Polish, -----     | Miner, -----        | 43  | M.                | Harrison, -----           | Allegheny, ---    | Back and right leg injured by fall of slate at face of room.                                 |
| 27               | Mike Petrio, -----      | Greek, -----      | Miner, -----        | 22  | S.                | Hazel, -----              | Washington, ---   | Leg broken and injured internally by fall of slate at face of room.                          |
| May 3            | David Jacobs, -----     | American, -----   | Machine-runner, --- | 38  | M.                | Hazel, -----              | Washington, ---   | Head injured. Struck by machine bar at face of room.                                         |
| 5                | Itnatz Uschowski, ----- | Polish, -----     | Loader, -----       | 32  | M.                | Peters Creek No. 1, ----- | Allegheny, ---    | Leg broken above the ankle by fall of coal at face of room.                                  |
| 10               | August Cerflia, -----   | Italian, -----    | Miner, -----        | 27  | S.                | Manifold No. 2, -----     | Washington, ---   | Arm broken and body bruised by fall of slate while robbing pillar.                           |
| 11               | Nick Daydoek, -----     | Greek, -----      | Miner, -----        | 26  | M.                | Hazel, -----              | Washington, ---   | Head bruised and back injured by fall of slate between 32 and 33 butt entries.               |
| 12               | Jno. Brokenbaugh, ----- | American, -----   | Machine-runner, --- | 43  | S.                | Nottingham, -----         | Allegheny, ---    | Leg bruised between mine car and door frame on E. face entry.                                |
|                  | Jno. Bullock, -----     | Polish, -----     | Loader, -----       | 29  | S.                | Bertha, -----             | Allegheny, ---    | Fracture of pelvis by fall of horse-back roof at face of room.                               |

|       |    |                        |                 |                    |    |                                     |                |                                                                                                                                           |
|-------|----|------------------------|-----------------|--------------------|----|-------------------------------------|----------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| May   | 14 | Mike Gingham, -----    | Polish, ----    | Loader, -----      | 24 | M. Bertha, -----                    | Allegheny, --- | Head bruised and hip dislocated by fall of slate at face of room.                                                                         |
|       | 22 | Alex. Merman, -----    | Hungarian, ---  | Miner, -----       | 45 | M. Nottingham, -----                | Allegheny, --- | Right foot crushed by fall of slate while robbing pillar. Amputation was necessary.                                                       |
|       | 29 | Frank Seday, -----     | Grinish, --     | Machine-runner, -- | 28 | S. First Pool No. 3, -----          | Allegheny, --- | Arm broken by fall of roof coal at face of room.                                                                                          |
| June  | 12 | Mat Kawyella, -----    | Hungarian, ---  | Machine-runner, -- | 22 | S. Harrison, -----                  | Allegheny, --- | Finger smashed by being caught in ratchet of machine at face of room.                                                                     |
|       | 19 | Frank Yovishe, -----   | Lithuanian, --- | Loader, -----      | 32 | S. Manifold No. 2, -----            | Washington, -- | Leg broken by fall of slate at face of room.                                                                                              |
| July  | 27 | William Varga, -----   | Hungarian, ---  | Loader, -----      | 19 | S. Bertha, -----                    | Allegheny, --- | Leg broken by fall of slate at face of room.                                                                                              |
| Aug.  | 4  | Andrew Yourish, -----  | Lithuanian, --- | Loader, -----      | 23 | S. Pittsburg Terminal, No. 2, ----- | Allegheny, --- | Leg broken by being caught between mine car and road post, in room on left entry.                                                         |
|       | 6  | Martin Ozannish, ----- | Grinish, --     | Loader, -----      | 51 | M. Harrison, -----                  | Allegheny, --- | Left knee smashed between two mine cars at No. 7 room, No. 29 entry.                                                                      |
|       | 19 | Louis Bretholt, -----  | German, ---     | Miner, -----       | 51 | S. Thompson, -----                  | Allegheny, --- | Skull fractured and back injured by fall of slate at face of room.                                                                        |
| Aug.  | 25 | Henry Rosevelt, -----  | American, --    | Miner, -----       | 48 | M. Harrison, -----                  | Allegheny, --- | Three ribs broken by fall of slate while robbing pillar.                                                                                  |
| Sept. | 15 | Frank Obeslaski, ----- | Polish, ----    | Miner, -----       | 28 | M. Sumner Hill, -----               | Allegheny, --- | Left hand smashed by being caught between post and rib, and second toe on right foot cut off by ear wheel dropping on it, at No. 17 room. |
|       | 16 | Joe Gordish, -----     | Grinish, --     | Loader, -----      | 25 | S. Pittsburg Terminal, No. 6, ----- | Allegheny, --- | Leg broken by fall of coal at face of room.                                                                                               |
|       | 24 | John Rock, -----       | Italian, ----   | Loader, -----      | 28 | M. Meadow Lands No. 2, -----        | Washington, -- | Small bone broken in left leg by fall of coal at face of entry.                                                                           |
| Oct.  | 1  | Albert Helmer, -----   | German, ---     | Driver, -----      | 22 | S. Meadow Lands No. 2, -----        | Washington, -- | Back injured by being caught between mine car and rib in butt entry.                                                                      |
|       | 15 | George Hall, -----     | American, --    | Driver, -----      | 22 | S. Pittsburg Terminal, No. 3, ----- | Allegheny, --- | Body bruised by being caught between mine car and rib in room.                                                                            |
|       | 19 | John Metsic, -----     | Polish, ----    | Laborer, -----     | 32 | M. Hazel, -----                     | Washington, -- | Scalp wounded, back bruised and right leg smashed by being run over by car at crosscut, main entry. Leg had to be amputated.              |
|       | 30 | Andy Lelforas, -----   | Italian, ----   | Driver, -----      | 27 | S. Thompson, -----                  | Allegheny, --- | Jaw bone broken. Kicked by a mule; at right face entry.                                                                                   |
| Nov.  | 1  | Thomas Costelli, ----- | Italian, ----   | Miner, -----       | 44 | M. Pittsburg Terminal, No. 7, ----- | Allegheny, --- | Arm and leg broken by fall of slate at face of room.                                                                                      |
|       | 6  | Charles Marcus, -----  | American, --    | Driver, -----      | 20 | S. Pittsburg Terminal, No. 3, ----- | Allegheny, --- | Leg fractured. Caught by mining car at room, butt entry.                                                                                  |
|       | 7  | Stephen Pratt, -----   | American, --    | Fireman, -----     | 33 | S. Pittsburg Terminal, No. 6, ----- | Allegheny, --- | Foot scalded by stepping in pool of hot water, in boiler house. Injured.                                                                  |
| Dec.  | 2  | Lewis Ulyeze, -----    | Hungarian, ---  | Miner, -----       | 26 | S. Manifold No. 1, -----            | Washington, -- | Hands, face and leg injured. While tamping his shot the cap exploded, at face of room.                                                    |

## CONDITION OF MINES

## PITTSBURG COAL COMPANY

Allison.—Ventilation, drainage and general condition reasonably good.

Fair Haven.—Ventilation, drainage and other conditions satisfactory.

First Pool Nos. 1 and 3.—Ventilation, drainage, travelingway and second opening, in excellent condition.

First Pool No. 2.—Ventilation, drainage and general conditions require improvement.

Harrison.—Ventilation a little sluggish at face of workings, travelingway and second means of egress a little wet and muddy.

Lick Run.—General condition of mine very good. It was a little dusty along the main tunnel, and the dust was being saturated with water by water car and removed from the mine.

Midland Nos. 1 and 3.—Ventilation weak at face of workings due to improper distribution of the air. Drainage and other conditions fair.

Nottingham.—General conditions and ventilation satisfactory.

Oak.—Ventilation and drainage reasonably good.

Summer Hill.—Ventilation, drainage, travelingway and second means of egress, very good.

## PITTSBURG-BUFFALO COMPANY

Bertha.—General conditions satisfactory.

\*Hazel.—Ventilation and drainage good. The roads were a little dry and dusty in parts. Water pipes are used in the main intake airways for spraying the water into the atmosphere and also condensed steam and water cars are used for sprinkling, and the dust is removed from the mine. Permissible explosives have been installed and shot firers employed to do the blasting.

## PITTSBURG TERMINAL RAILROAD AND COAL COMPANY

B or No. 2 Mine.—Ventilation, drainage and general conditions, reasonably good.

C or No. 3 Mine.—Ventilation a little sluggish at face of live workings. Drainage and other conditions good.

F or No. 6 Mine.—Ventilation weak at face of workings. Drainage good. Travelingway a little muddy and wet in places.

G or No. 7 Mine.—The volume of air at face of workings was not sufficient for thorough ventilation. Drainage good. Travelingway requires improvement.

## YOUGHIOGHENY AND OHIO COAL COMPANY

Manifold Nos. 1 and 2.—Ventilation and drainage good. The mines were a little dusty in parts. The water wagon is used for sprinkling, and the dust is removed from the mine.

Reilly No. 2.—Idle most of the year.

Thompson.—General conditions good.

## CRESCENT COAL COMPANY

Peters Creek Nos. 1, 2 and 3.—Condition reasonably good in Nos. 2 and 3. In No. 1, the volume of air was not sufficient for good ventilation.

## UNITED COAL COMPANY

Rich Hill.—In good condition.

## MONONGAHELA RIVER CONSOLIDATED COAL AND COKE COMPANY

Becks Run.—Ventilation at face of No. 1 split very weak; the other sections of mine fair. Drainage good. Parts of mine were a little dusty. Water car is used for sprinkling, and the dust is removed from mine.

## MIFFLIN COAL COMPANY

Mifflin Nos. 1 and 2.—General conditions fair.

## MEADOW LANDS COAL COMPANY

Meadow Lands No. 1.—Ventilation weak at face of workings. Drainage fair.

Meadow Lands No. 2.—Ventilation defective. Side of haulage-ways was obstructed with debris. The travelingway on the north side was obstructed with falls of roof, slate and water, and was not in condition for travel. Drainage defective.

## OLLETT BROTHERS

Essen No. 1.—The air currents sluggish at face of live workings.

## J. M. GREEK AND COMPANY

Dandy.—Conditions good.

Sallie.—Idle during the year.

## E. R. WISE

Germania.—Condition of mine good.

## W. S. B. HAYS

Calhoun.—General conditions fair. Not under the law.

## PAUL COAL COMPANY

Paul.—Ventilation at face of working a little weak. Not under the law.

## IMPROVEMENTS

## PITTSBURG COAL COMPANY

Fair Haven.—Air compressor has been installed for air lift. Built twenty brick stoppings on main intake airway. Airway and side of roads have been cleaned to the extent of about 2000 feet. Manholes have been made along the main haulage-way.

Lick Run.—A boiler of 150 horse power installed outside and one hundred brick stoppings built during the year.

Nottingham.—Installed a double inlet Clifford Capell fan, 12.6 x 6 feet, and built a brick fan house. Laid 7200 feet of three-inch pipe line for boiler water supply. A new addition was also made to the barn

outside. Built fifty brick stoppings inside, two dams and two overcasts. Added one centrifiged pump to the equipment inside and also 1600 feet, 6-inch pipe lines.

Summer Hill.—Built sixty brick stoppings, three overcasts, and all door jams built with brick.

#### UNITED COAL COMPANY

Rich Hill.—All stoppings are now being made of concrete. Two overcasts have been built. The air course has been cleaned and is being made larger where necessary. All dust and dirt are thoroughly sprinkled and removed from mine. No black powder is used in this mine for blasting purposes; No. 3 carbonite has taken its place. A No. 1, oil is used for illuminating purposes.

#### PROSECUTIONS FOR VIOLATIONS OF THE MINING LAWS

Information was made against J. H. Davis on September 29, for working with an open light in the Manifold mine of the Youghiogheny and Ohio Coal Company at Manifold. The defendant waived a hearing and gave bail for court. The case was nolle prossed on payment of the costs by the defendant.

Mat. Kowchit and Frank Elkovich, who are employed at the Rich Hill mine of the United Coal Company, were arrested for passing a danger signal at the entrance of the said mine. The cases were adjusted by the defendants paying the costs of the proceedings.

Information was made against Joseph Magill, of the Arden mine No. 2 of the Meadow Lands Coal Company, charging him with allowing open lights to be used when explosive gas was being generated in such quantities as to be detected by the ordinary safety lamp, and with allowing the night shift in said mine to go to work without previously having the mine examined by the fire-boss. The defendant waived a hearing and gave bail for court. The court sentenced him to pay a fine of \$1.00 and costs.

August 19, Mine Inspectors C. B. Ross, Thomas K. Adams, Elias Phillips and John I. Pratt made an inspection of Manifold mines Nos. 1 and 2 of the Youghiogheny and Ohio Coal Company, and reported to the company that explosive gas was found in dangerous quantities in the said mines and that open lights were being used and unsafe explosives used in blasting down the coal; and therefore demanded that the open lights be discontinued and that locked safety lamps be used and only those explosives used that were on the permissible list of the United States Government. From this decision the Youghiogheny and Ohio Coal Company took an appeal to the Court of Quarter Sessions of Washington County, and the said court appointed Benjamin Feriday, Jesse K. Johnston and James Blick a commission to make an inspection of the said mines and report their findings to the court. After the said commission had made an inspection of the mines, the case was amicably adjusted on the grounds that safety lamps should be used in all parts of the mines, except on a small portion of one of the mines near the outcrop, and that the safest explosives should be used for blasting purposes.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in Morehead Hall, Pittsburg April 6, 7, 8 and 9.

The Board of Examiners was composed of Charles P. McGregor, Mine Inspector; James J. Boyle, Superintendent, and S. P. McCaffrey, Mine Foreman.

There were ninety applicants examined, 34 for Mine Foremen's certificates and 56 for Fire Bosses' certificates.

The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

## First Grade

James W. Stoffer, John J. Delaney, Jesse Wessel, Edwin Wardle, Arthur Feehan, F. T. Fitzharris, John Lukasavitch, David Osburn, Joseph T. Gallagher, Thomas Locke, John Lamb.

## ***EIGHTEENTH DISTRICT***

---

CLEARFIELD, BEDFORD, HUNTINGDON AND CENTRE COUNTIES

---

Tyrone, Pa., February 23, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: In compliance with the Bituminous Mining Law, I transmit herewith my annual report as Inspector of Mines for the Eighteenth Bituminous District for the year ending December 31, 1909.

I was transferred to this District July 1, 1909, from the Twentieth District.

The report contains the usual statistical information, a brief description of the condition of the mines and the most important improvements made during the year, and a report of the annual examination of applicants for mine foremen's certificates. There was an increase in the production of coal of 199,530 tons as compared with the year 1908, a decrease of 4 fatal accidents, and an increase of 4 non-fatal accidents.

Respectfully submitted,

THOMAS S. LOWTHER,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                       |           |
|-----------------------------------------------------------------------|-----------|
| Number of mines, .....                                                | 123       |
| Number of mines in operation, .....                                   | 118       |

## CONDITION OF MINES

## BERWIND-WHITE COAL MINING COMPANY

Eureka No. 7.—A large volume of air is produced by the fan, but on account of leakage the greater portion of it is lost before it reaches the working faces. However, the mine was in a sanitary condition on my last visit. Drainage had also been improved, but was still defective in some sections.

Eureka No. 16.—Ventilation was weak at working faces, but atmosphere of mine was clear and healthy when last inspected. Drainage defective in some sections.

Eureka No. 22.—Ventilation and drainage in fair condition.

Eureka No. 27.—General condition of mine was good.

Eureka No. 28.—Ventilation was very well conducted around the working faces, and drainage was very satisfactory when last inspected.

## CORONA COAL AND COKE COMPANY

Bucher.—Ventilation very fair, drainage good.

Corona.—Ventilation good in both drifts; drainage not satisfactory in the old drift.

Davis.—Ventilation fair, drainage good.

White Oak.—Ventilation was weak at working faces on right side entries and drainage defective on part of the haulage roads. Traveling way has been improved.

Hegarty.—Idle greater portion of the year.

Shoff No. 3.—Ventilation and drainage were fair when last inspected.

Royal.—Idle the entire year.

## CARBON COAL AND COKE COMPANY

Cambria No. 3, Ocean Nos. 2 and 4 were in very satisfactory condition when last inspected. The ventilation in Ocean No. 3 and Carbon Nos. 1 and 4, was very weak at the working faces. Drainage good in all these mines.

## H. B. SWOOPE AND COMPANY

Sylvania.—The furnace of this mine is not adequate to furnish ventilation for more than seventy-five persons, which limit has been fixed until the ventilating power is increased. Drainage was very fair.

Morgan Run.—Ventilation was very weak at working faces when last inspected. Drainage was good.

No. 18 Colliery.—Ventilation and drainage very defective in old drift. Conditions very fair in the new drift.

King.—Ventilation fair; drainage good.

Beccaria.—Not under the law.

## ROCKHILL IRON AND COAL COMPANY

Robertsdale Slope.—New airways have been driven and ventilation very much improved. Drainage good.

Woodvale Shaft.—General condition very fair. Ventilation well conducted around the workings.

## GRAMPIAN COAL MINING COMPANY

Penn No. 4.—Ventilation was not satisfactory when last inspected, and improvement was requested. Drainage was fair.

Penn No. 5.—Ventilation very fair and drainage defective in some portions of the mine.

## BULAH SHAFT COAL COMPANY

Bulah Shaft No. 1.—Ventilation and general condition very good.

## S. J. MOUNTZ AND COMPANY

Viola.—Ventilation was very well conducted around the working faces. Drainage good.

Whiteside No. 1.—Ventilation and drainage fair.

## JOHN LANGDON

Cambria No. 1.—Was almost exhausted when last inspected.

Chevington No. 2.—Ventilation and drainage good when inspected.

Glendale Nos. 1 and 2.—General condition fair.

Duval Slope.—Ventilation very weak at working faces, and drainage only fair.

## COLONIAL IRON COMPANY

Judith.—General condition was very satisfactory.

## CLARK BROTHERS COAL MINING COMPANY

Falcon No. 1.—Ventilation good; drainage defective.

Falcon No. 2.—General condition good.

Falcon No. 4.—Ventilation and drainage was very satisfactory.

## JOSEPH E. THROPP

Kearney Slope.—Ventilation was very weak at working faces when mine was inspected. Drainage was good.

Kearney Barnett, Melrose Nos. 1, 2 and 3 and Gordon mines were idle the greater portion of the year.

Kearney Plane.—Idle the entire year.

## BULAH COAL COMPANY

Webster No. 4.—General condition very satisfactory except in the old drift, where the ventilation was very weak when last inspected.

## WHITNEY AND KEMMERER

Whitney No. 1.—Ventilation and drainage good. Shelter holes have been provided on rope haulage road.

## BETZ COAL MINING COMPANY

Betz No. 2.—Ventilation has been improved by splitting the air current. Drainage good.

## W. A. GOULD AND BROTHIER

Midvale No. 1.—General condition fair.

Midvale No. 2.—Not under the law.

Midvale No. 3.—Ventilation weak; drainage good.

Loraine, Goss Run and Henderson No. 5, were not under the law during the greater portion of the year.

#### MOSHANNON COAL MINING COMPANY

Lenore Nos. 1 and 2.—In fair condition.

Moshannon No. 1.—Ventilation fair; drainage good.

Moshannon No. 9.—Ventilation fair. Drainage was very poor.

Moshannon No. 4 and 7.—Not under the law.

#### BROAD TOP COAL AND MINERAL COMPANY

Jacobs.—General condition was good.

#### CENTRE COAL AND COKE COMPANY

Weston.—Ventilation and drainage were very satisfactory.

#### CAMBRIA COAL MINING COMPANY

Leeland No. 1.—Ventilation very fair, drainage good.

Leeland Nos. 2 and 6.—Not under the law.

Leeland No. 7.—Ventilation and drainage were very satisfactory when inspected.

Leeland Nos. 8 and 10.—Idle the greater portion of the year.

Leeland No. 9.—Ventilation was very weak when last inspected, on account of defective stoppings. Drainage was good.

#### PEMBERTON COAL COMPANY

Pemberton.—Ventilation weak but healthy. Drainage good.

#### E. J. WALKER AND COMPANY

Troy.—Not under the law.

Stanley.—Ventilation weak on account of the furnace being entirely too small. The company has promised to erect a fan. Drainage was good.

#### ATLANTIC COAL MINING COMPANY

Cross Keys.—The ventilation is good in the lower or Moshannon seam, but is very weak at face of workings in the upper seam on account of small airways being provided in the beginning. Drainage was good.

#### E. EICHELBERGER AND COMPANY

Bacon No. 2.—The ventilation was very much improved by the erection of a fan. Drainage only fair.

#### HUNTINGDON COAL COMPANY

Delaware No. 1.—Ventilation and drainage satisfactory.

Delaware No. 2.—Worked only fifteen days during the year.

#### STANDARD MOSHANNON COAL COMPANY

Standard No. 4.—Ventilation good, drainage very fair.

## A. J. BLACK

Black No. 3.—Ventilation and general condition satisfactory.  
Black No. 2.—Not under the law.

## ROCKY RIDGE COAL AND MINING COMPANY

Wrays Hill.—Ventilation and drainage fair.

Louise.—Idle until the latter part of the year. No inspection made.

## SCHIPPER BROTHERS COAL MINING COMPANY

Lady Smith Nos. 1 and 2.—Ventilation and drainage satisfactory.

Lady Smith Nos. 3 and 4, (Formerly known as Illinois).—Not under the law.

## G. L. WHITEHEAD COAL COMPANY

Peerless No. 4.—Ventilation very weak at working faces. Idle a great deal during the year.

## COMMERCIAL COAL MINING COMPANY

Commercial No. 1.—Ventilation and general condition satisfactory.

## DECATUR COAL MINING COMPANY

Decatur No. 11.—Ventilation very fair; drainage good. The traveling-way needs some improvements, which I have requested to be made.

## BLYTH COAL COMPANY

Blyth Shaft.—Ventilation and general condition very satisfactory for the number of persons employed.

## MADEIRA HILL COAL MINING COMPANY

Elizabeth No. 1.—Ventilation very fair; drainage and general condition good.

## CLEARMONT COAL MINING COMPANY

Clearmont.—Ventilation and drainage fair.

## IRISH BROTHERS COAL COMPANY

Industry.—General condition fair.

Niagara.—Not under the law.

## H. A. MUNN COMPANY

Benedict.—Ventilation was very weak when inspected and sufficient airways were not provided. Drainage fair.

## FRANKLIN COAL COMPANY, LIMITED

Sterling No. 2.—No inspection made. The mine was idle when I was in that vicinity.

## LULU COAL COMPANY

Schwim.—Ventilation and drainage very satisfactory.

## FERNWOOD COAL COMPANY

Mt. Vernon No. 10.—Ventilation and general condition very fair.

## BRISBIN COAL MINING COMPANY

Mascot.—Not under the law the greater portion of the year.

## HENRIETTA COAL COMPANY

Henrietta No. 2.—Idle the entire year.

Henrietta No. 3.—Not under the law until latter part of year. No inspection made.

## THOMAS BLYTH

Alexander.—Not under the law.

## E. J. D. COXE

Elizabeth No. 1.—Ventilation fair; drainage good.

## HIGHLAND COAL MINING COMPANY

Highland Nos. 3 and 4.—Ventilation very weak and not satisfactory; drainage fair.

## OSCEOLA FIRE BRICK COMPANY

Burns No. 2.—Ventilation and drainage fair.

## MOUNT EQUITY COAL AND COKE COMPANY

Mount Equity Nos. 1, 2 and 3.—Idle greater portion of the year.

## JACOBS AND GLAZIER

Victoria.—Not under the law.

## W. R. GALLAGHER AND BROTHERS

Black Oak.—Ventilation and general condition good.

## S. O. WALKER

Big Run.—Has been idle or employing less than ten persons a great deal of the time.

## LEO J. TIERNEY

Bartle.—Idle the latter part of the year.

Miller.—Idle the entire year.

## THOMAS McGLYNN

Yorkshire No. 2.—Was not under the law until latter part of the year. No inspection made.

## BANIAN RUN COAL COMPANY

Standard No. 7.—Not under the law.

## COAL RUN COAL COMPANY

Coal Run No. 1.—Not under the law.

Coal Run No. 2.—Not under the law until the latter part of the year. No inspection made.

## JOHN H. WILKINSON

Shoff Nos. 1 and 2.—Not under the law.

## VOGAL AND McKENZIE

Birdseye.—Not under the law.

## JOHN QUINN

McCartney No. 3.—Not under the law.

## E. C. BROWN

Kenmar Nos. 2 and 3.—Not under the law.

## WHITE-DUGAN COAL COMPANY

Celtic.—Ventilation and drainage fair.

## CLEARFIELD COLLIERIES COMPANY

Reliance.—Ventilation fair; drainage good.

## A. STOLZ

Katherine.—Ventilation very weak at face of workings. Drainage fair.

## IMPROVEMENTS

## BERWIND-WHITE COAL MINING COMPANY

Eureka No. 28.—A shaft 7 x 7 feet and 65 feet deep, was sunk during the year for an outlet to part of the mine ventilation, and a stairway built in one side of it so that men working in this section can use it as a means of ingress or egress, and thus shorten the distance of underground travel to and from their working places.

## CORONA COAL AND COKE COMPANY

Shoff No. 3.—A round air shaft, 7 feet in diameter and 96 feet deep, was sunk during the year and a double arch furnace built at the foot of it with 60 square feet of grate bar surface.

## ROCKHILL IRON AND COAL COMPANY

Robertsdale Slope.—New airways of large areas were driven in sections of the mine where the ventilation was defective. The main rope haulage was extended several hundred feet.

## BROAD TOP COAL AND MINERAL COMPANY

Jacobs.—Rope haulage was established in the dip working and a steam engine has been substituted for a gasoline engine to drive the fan.

## E. EICHELBERGER AND COMPANY

Bacon No. 2.—A 7 foot Stine fan was erected to replace the furnace which had been very unsatisfactory.

## SCHIPPER BROTHERS COAL MINING COMPANY

Lady Smith Nos. 1 and 2.—A 5 foot Clark fan, driven by a gasoline engine, was erected the latter part of the year.

## BLYTH COAL COMPANY

Blyth Shaft.—A second opening shaft, 9 x 14 feet and 180 feet deep, was completed and equipped with stairs in accordance with the requirements of the mining law.

## HENRIETTA COAL COMPANY

Henrietta No. 3.—An air shaft, 10 x 12 feet and 41 feet deep, was sunk and a 16-foot Brazil fan erected.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in Assembly Hall, First National Bank Building, Tyrone, April 6, 7, 8 and 9.

The Board of Examiners was composed of Nicholas Evans, Mine Inspector; A. E. Bachert, Superintendent; and Thomas B. Gallagher, Mine Foreman.

There were thirty-one applicants examined for certificates as Mine Foremen. The following persons passed a satisfactory examination and were granted certificates:

## Second Grade

John Gallagher, Henry V. Bowser, Thomas Lobb, Samuel S. Lam-born, J. H. Miller and J. Foster Bolinger.

WESTMORELAND AND ALLEGHENY COUNTIES

---

Braddock, Pa., February 26, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I have the honor to transmit herewith my annual report of the Nineteenth Bituminous District for the year ending December 31, 1909.

I was transferred to this District July 1, 1909, from the Seventeenth District.

The report contains the usual statistical tables, a statement of the most important improvements in and about the mines, and a brief description of the accidents,

The mines, with a few exceptions, are in good condition.

Respectfully submitted,

CHARLES P. MCGREGOR,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                   |           |
|-------------------------------------------------------------------|-----------|
| Number of mines, .....                                            | 30        |
| Number of mines in operation, .....                               | 30        |
| Number of tons of coal shipped to market, .....                   | 7,683,211 |
| Number of tons used at mines for steam and heat, .....            | 152,169   |
| Number of tons sold to local trade and used by employees, .....   | 51,850    |
| Number of tons used in the manufacture of coke, .....             | 32,975    |
| Number of tons of coal produced, .....                            | 7,920,205 |
| Number of tons of coke produced, .....                            | 27,120    |
| Number of coke ovens, .....                                       | 85        |
| Number of coke ovens in operation, .....                          | 85        |
| Number of tons of coal produced by pick mining, .....             | 4,061,847 |
| Number of tons produced by compressed air machines, ....          | 1,722,279 |
| Number of tons produced by electrical machines, .....             | 2,136,079 |
| Number of persons employed inside of mines, .....                 | 7,405     |
| Number of persons employed outside, including coke workers, ..... | 1,139     |
| Number of persons employed at manufacture of coke, ....           | 26        |
| Number of fatal accidents inside of mines, .....                  | 24        |
| Number of fatal accidents outside, .....                          | 1         |
| Number of non-fatal accidents inside of mines, .....              | 102       |
| Number of non-fatal accidents outside, .....                      | 5         |
| Number of tons of coal produced per fatal accident inside, .....  | 330,009   |
| Number of persons employed per fatal accident inside, ...         | 309       |
| Number of persons employed per fatal accident outside, ..         | 1,139     |
| Number of persons employed per non-fatal accident inside, ..      | 73        |
| Number of persons employed per non-fatal accident outside, .....  | 228       |
| Number of wives made widows, .....                                | 15        |
| Number of children made orphans, .....                            | 32        |
| Number of steam locomotives used inside of mines, .....           | 1         |
| Number of steam locomotives used outside, .....                   | 5         |
| Number of compressed air locomotives used inside, .....           | 12        |
| Number of compressed air locomotives used outside, ...            | 27        |
| Number of electric motors used inside, .....                      | 27        |
| Number of electric motors used outside, .....                     | 27        |
| Number of fans in use, .....                                      | 4         |
| Number of furnaces in use, .....                                  | 19        |
| Number of gaseous mines in operation, .....                       | 11        |
| Number of non-gaseous mines in operation, .....                   | 11        |
| Number of new mines opened, .....                                 |           |
| Number of old mines abandoned, .....                              |           |

TABLE A  
PRODUCTION OF COAL

| Names of Operators                              | Tons      |
|-------------------------------------------------|-----------|
| Westmoreland Coal Company, .....                | 2,127,079 |
| Keystone Coal and Coke Company, .....           | 1,539,075 |
| New York and Cleveland Gas Coal Company, .....  | 1,053,573 |
| Ocean Coal Company, .....                       | 856,942   |
| Penn Gas Coal Company, .....                    | 655,244   |
| Pittsburg-Westmoreland Coal Company, .....      | 618,720   |
| Pittsburg and Baltimore Coal Company, .....     | 556,103   |
| Manor Gas Coal Company, .....                   | 311,182   |
| W. B. Skelly Coal Company, .....                | 88,091    |
| Adamsburg Gas Coal Company, .....               | 52,140    |
| United-Connellsville Coke Company, .....        | 27,865    |
| G. Vogelesons and Company, .....                | 14,957    |
| Weinman Brothers, .....                         | 7,634     |
| Steel and Scott Company, .....                  | 6,365     |
| Dunn-Connellsville Coal and Coke Company, ..... | 5,235     |
| Total, .....                                    | 7,920,205 |

| Production by Counties |           |
|------------------------|-----------|
| Westmoreland, .....    | 7,209,137 |
| Allegheny, .....       | 711,068   |
| Total, .....           | 7,920,205 |

TABLE B.—Fatal and non-fatal accidents inside and outside of mines; number of tons of coal produced per accident; number of persons employed; number employed per accident

| Names of Operators                   | Fatal Accidents |         |       | Non-Fatal Accidents |         |       | Tons of coal produced per fatal accident inside | Tons of coal produced per non-fatal accident inside | Number of employees inside | Number of employees outside | Total number of employees | Number of employees inside per |                    | Number of employees outside per |  |
|--------------------------------------|-----------------|---------|-------|---------------------|---------|-------|-------------------------------------------------|-----------------------------------------------------|----------------------------|-----------------------------|---------------------------|--------------------------------|--------------------|---------------------------------|--|

He jumped between cars when the motor was pushing an empty trip and the cars bumped up and caught him.                                                                                                                                                                                                                                                                                                         |
| 15               | Mike Wargo, -----                           | Austrian, -                   | Miner, -----                    | 16       | S. ----            | -----            | -----             | Oak Hill No. 3, --- | -----         | Instantly killed by fall of slate. He was working in No. 2 rib on butt entry and went to No. 7 rib to get a drink. It seems he had just gotten there and stooped over to look at the man taking coal down when a piece of slate fell on him.                                                                                                                                                                                                                                    |
| 20               | Paul Bozwia, -----<br>Alonzo Carnahan, ---- | Italian, ----<br>Irish, ----- | Loader, -----<br>Machine runner | 23<br>21 | S. ----<br>M. ---- | 1<br>1           | -----             | Sewickley, -----    | Westmoreland, | Suffocated by after-damp of an explosion of gas and coal dust at face of room. They were cutting a room with a chain coal-cutting or mining machine and heard a noise under and around the machine, which was explosive gas being liberated from the bottom. The gas was ignited from the open lights they used, and this was greatly intensified by the coal dust held in suspension in the air, causing a local explosion. Before any one could reach them they had perished. |
|                  | Anton Oswald, -----                         | Austrian, --                  | Trapper, -----                  | 14       | S. ----            | -----            | -----             | Lyons Run, -----    | -----         | Instantly killed by mine cars while riding on loaded trip. The trip jumped the track and caught him between car and timber on side track.                                                                                                                                                                                                                                                                                                                                       |

|          |                         |                  |               |    |          |       |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------|-------------------------|------------------|---------------|----|----------|-------|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Feb. 4   | Leo Tratwick, -----     | Slavonian, ----- | Miner, -----  | 30 | M. 1     | 2     | Edna No. 2, -----     | Instantly killed by fall of slate at face of rib on butt entry. He was engaged in cleaning up roadway into the rib when a slab of slate fell off side of pillar and caught him. An inquest was held and a verdict of accidental death was rendered.                                                                                                                                                                                                                                                             |
| 20       | Melo Drago, -----       | Italian, -----   | Loader, ----- | 51 | M. 1     | 3     | Export, -----         | Instantly killed by fall of coal at face of room on butt entry. While shearing a cut of coal on the tight side of his room he released the coal and it fell on him. Fatally injured by being caught between loaded trip and empty car at bottom of the shaft. While he was pushing a loaded car down to cager at bottom of shaft a driver came out of shaft bottom entry with his loaded trip, and bumped into the car Milage was pushing, and his legs were caught between bumpers. Died in hospital March 26. |
| March 23 | August Milage, -----    | Austrian, --     | Laborer, --   | 29 | S. ----- | ----- | Criterion, -----      | Instantly killed by fall of roof. He was working with his father in No. 7 rib on No. 6 butt entry, and while drawing post at the face of the rib the roof fell and caught him.                                                                                                                                                                                                                                                                                                                                  |
| April 8  | Derbert Copeland, ----- | American, --     | Miner, -----  | 25 | S. ----- | ----- | Edna No. 1, -----     | Instantly killed by fall of slate in No. 12 rib on No. 5 butt entry, while he and his partner were undermining coal at the face of the rib next to end of rib.                                                                                                                                                                                                                                                                                                                                                  |
| 19       | Walter Nelson, -----    | Scotch, -----    | Miner, -----  | 41 | M. 1     | 5     | Keystone Shaft, --    | Instantly killed by fall of slate at neck of room on butt entry. He had just finished loading a car and started to pull down what he thought to be a small piece of slate over the roadway, when suddenly more fell than was expected and caught him.                                                                                                                                                                                                                                                           |
| May 5    | Anton Mesgon, -----     | Slavonian, --    | Miner, -----  | 32 | M. 1     | 2     | Claridge, -----       | Instantly killed by fall of slate in room on butt entry, while working in a cut-through. He was either passing the wagon on the rib side of the room or going back into the cut-through to work again, when the slate fell on him.                                                                                                                                                                                                                                                                              |
| June 22  | Richard Wilson, -----   | English, -----   | Miner, -----  | 62 | M. 1     | ----- | Claridge, -----       | Instantly killed by fall of coal at face of rib while undermining the coal. He had no sprag set under the coal to make it secure.                                                                                                                                                                                                                                                                                                                                                                               |
| July 16  | August Barrio, -----    | Italian, -----   | Miner, -----  | 27 | S. ----- | ----- | Oak Hill No. 5, ----- |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|          |                         |                  |               |    |          |       | Allegheny, -----      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|          |                         |                  |               |    |          |       | Westmoreland, -----   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| July 26          | Batista Tobacchi, -----  | Italian, ---- | Miner, -----  | 32  | M. 1              | 3                | Lyons Run, -----    |               |        | Instantly killed by being run over by loaded dilly trip on the dilly way while going back into the mine. He was about 3,300 feet from pit mouth. He should have used the mainway.                                                                                                                                                         |
| Aug. 24          | Andy Hinzle, -----       | Polish, ----  | motorman, --  | 27  | M. 1              | 2                | Edna No. 2, -----   |               |        | Instantly killed by being caught between mine car and entry pillar while coming out of No. 6 face entry down a one per cent. grade. It is supposed that he saw a fall on the motor road and just as the motor was near the fall he jumped off, and when the motor struck the fall the cars left the track and caught him.                 |
| 27               | Mike Darin, -----        | Italian, ---  | Driver, ----- | 20  | S. ....           | ---              | Export No. 2, ----- | Westmoreland, |        | Fatally injured by being run over by loaded car. He was dropping a loaded car of slate from dip entry, on a 2 per cent. grade, to main side track. He jumped on front end of the car and in cutting the mule loose from the car he fell off and the car passed over his left leg, cutting it off. He died two days later in the hospital. |
| Sept. 7          | Jacob Itocanich, -----   | Lithuanian,   | Driver, ----- | 27  | M. 1              | 1                | Ocean No. 1, -----  |               |        | Fatally injured while lifting loaded car onto the track. He had the car raised and called to his team of mules to start, which they did, and the car swung around and he was caught between car and entry pillar. Died the next day.                                                                                                      |
| 22               | Valentine Orcebic, ----- | Slavonian,    | Miner, -----  | 35  | M. 1              | 3                | Claridge, -----     |               |        | Instantly killed by fall of roof while drawing posts at No. 1 room on No. 1 butt entry. They had taken out all                                                                                                                                                                                                                            |

the posts on one side and had commenced to draw the posts on the other side. Otebie had not taken many out when he cut one of the posts with his axe. He insisted upon knocking the post out, and struck it again, when the roof fell five feet thick and covered him up.

Fatally injured between entry pillar and mine car. As he was nearing the cut-through between the two face entries he walked alongside of trip on the tight side of the road, and while applying the brake on the cars his clothes caught on the car and he was dragged to a narrow place at curve of cut-through and caught between pillar and mine car. Died the next day in the Pittsburgh hospital.

Instantly killed by fall of slate at face of room on butt parallel entry. His partner had taken down the breast coal and left the draw slate up. Yacketti was told to raise the bottom coal up and while raising the bottom coal he went underneath the slate and the slate fell on him.

Instantly killed by being run over by electric motor and loaded trip of cars. He had cleaned No. 10 butt switches and then lay down on the motor road, with his legs across the track and his body between the rail and entry pillar, and fell asleep, and the electric motor coming out with a loaded trip of forty-one cars ran over him. The motor-man did not see the boy until it was too late. The Coroner's verdict was "accidental death," and the motorman and mine officials were exonerated from blame.

Instantly killed by fall of slate at face of butt entry. He had loaded out all the coal and then commenced knocking out the slate post, and while reaching underneath the slate to draw out a post that was lying on the bottom he fell under the falling slate.

| Date of accident | Name of Person      | Nationality  | Occupation     | Age | Married or single | Number of widows | Number of orphans | Name of Mine        | County        | Nature and Cause of Accident in Brief                                                                                                                                                                                                                                                                                                                                                                              |
|------------------|---------------------|--------------|----------------|-----|-------------------|------------------|-------------------|---------------------|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Dec. 3           | John King, .....    | Austrian, .. | Miner, .....   | 37  | M.                | 1                | 4                 | Arona, .....        |               | Fatally injured by fall of roof at face of butt entry stumps while loading a car with coal. He did not hear the roof working. Died January 8, 1910.                                                                                                                                                                                                                                                                |
| 16               | Louis Sobski, ..... | Polish, .... | Laborer, ..... | 39  | M.                | 1                | 2                 | Denmark, .....      | Westmoreland, | Instantly killed by being crushed between railroad car and post under the tippie. He was employed to keep the slack shoveled from the end of the chute, so as to load the cars full. It is supposed that he undertook to drop down his loaded car and an empty car coupled behind and in some way got between the cars and was squeezed against the tippie post. There were no witnesses to the accident. Outside. |
| 31               | John Losato, .....  | Polish, .... | Miner, .....   | 36  | M.                | 1                | 2                 | Export No. 1, ..... |               | Fatally injured by fall of slate at face of rib on butt entry, while drawing posts to make a break of the roof. While knocking out the last post the slate fell on him. Died January 3, 1910.                                                                                                                                                                                                                      |

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person           | Nationality      | Occupation         | Age   | Married or single     | Name of Mine     | County | Nature and Cause of Accident in Brief                                                                                                                                                                                                                                                                                                                                  |

| Jan. 3           | John Kump, .....         | Finnish, .....   | Loader, .....      | 38 M. | Edna No. 1, .....     |                  |        | Back and leg injured by fall of slate at face of butt entry.                                                                                                                                                                                                                                                                                                           |
| 4                | Charles Smoke, .....     | Austrian, .....  | Miner, .....       | 35 S. | Ocean No. 1, .....    |                  |        | Foot broken and badly smashed by fall of slate at face of room on left butt parallel entry.                                                                                                                                                                                                                                                                            |
| 7                | Jacob Goddiecey, .....   | American, .....  | Miner, .....       | 21 S. | Lyons Run, .....      |                  |        | Leg broken by fall of slate at face of room on parallel butt entry.                                                                                                                                                                                                                                                                                                    |
|                  | Miles Berkhart, .....    | American, .....  | Miner, .....       | 56 M. | Gress, .....          |                  |        | Eye injured. While taking down slate at face of room on butt entry his pick slipped in his hand and struck him in the eye.                                                                                                                                                                                                                                             |
| 8                | James G. Copeland, ..... | American, .....  | Electrician, ..... | 27 S. | Criterion, .....      | Westmoreland,    |        | Foot badly cut and bruised. He started to come out of the mine, and seeing the cage at the bottom of the shaft and not noticing that it was loaded with boards, he gave the required signal and the cage started up the shaft. When within fifty feet of the top the boards caught on the shaft timbers which caused them to scatter in all directions and strike him. |
| 9                | Charles Rager, .....     | American, .....  | Greaser, .....     | 15 S. | Claridge, .....       |                  |        | Leg crushed by falling in front of loaded trip of mine cars while cutting off dilly side. Leg had to be amputated. Outside.                                                                                                                                                                                                                                            |
| 15               | Steve Levoitch, .....    | Austrian, .....  | Miner, .....       | 21 S. | Oak Hill No. 3, ..... | Allegheny, ..... |        | Shoulder broken by a fall of slate at face of rib on butt entry.                                                                                                                                                                                                                                                                                                       |
| 25               | Henry Haines, .....      | American, .....  | Loader, .....      | 23 S. | Denmark, .....        |                  |        | Foot bruised and face slightly cut by fall of slate at face of room.                                                                                                                                                                                                                                                                                                   |
| Feb. 1           | John Krouse, .....       | Bohemian, .....  | Motorman, .....    | 24 S. | Denmark, .....        | Westmoreland,    |        | Legs fractured by being caught between mine car and rib.                                                                                                                                                                                                                                                                                                               |
| 2                | Andy Cojnac, .....       | Slavonian, ..... | Laborer, .....     | 25 M. | Denmark, .....        |                  |        | Leg fractured by being struck by a r. p. d. while placing railroad cars under the tipples. Outside.                                                                                                                                                                                                                                                                    |

|                  | August Cramer, Sr., ----- | German, ---   | Miner, -----  | 49  | M.                |                      | Westmoreland, | These men were burned by an explosion of powder on the main East electric motor haulage road. It was the custom to haul the men in to the side track in the morning. There were about two hundred men on the empty trip at the time and the above named victims were in the 15th car from the electric motor. One of the men had a five-pound can of black powder, and a spark from an open light ignited the powder. |

| 24      | Joseph Paul, .....     | Italian, ...  | Laborer, ... | 25 | M. Keystone Shaft, ...   | Leg broken by fall of slate on the north haulage road, while preparing to set timbers.                 |
| 27      | Peter Barber, .....    | Italian, ...  | Loader, ...  | 33 | M. Elizabeth, .....      | Skull fractured by fall of slate at face of room on butt entry, while knocking down coal with a wedge. |

Westmoreland,

## CONDITION OF MINES

## WESTMORELAND COAL COMPANY

Criterion.—In good condition as to ventilation and drainage. A water car is used to saturate the coal dust, in the entries, but there is no system for working places. I have been notified by the general superintendent that a watering system will be installed for working places. The only explosive used is Coal Special, and shot firers are employed.

Export No. 1.—General condition good, except that the ventilation in No. 3 split is below the requirements of the law. There is no watering system for saturating the coal dust, but the mine is naturally damp. Explosives used are: Black Powder and Carbonite.

Export No. 2.—General condition good, except that the ventilation in Nos. 5 and 6 splits is below the requirements of the law. There is no watering system for saturating the coal dust, but the mine is naturally damp. Explosives used are: Black Powder and Clay Tamping. There are no safety lamps in use.

Larimer.—Condition good as to ventilation and drainage. The mine is retreating with the pillars and entry stumps and will soon be exhausted.

Westmoreland Shaft.—Condition good as to ventilation and drainage. The mine foreman is required to provide shelter holes in some parts of the mine. The system for saturating the coal dust is by water car, pipe line and hose. Explosives used are: Masurite, Carbonite, Coal Special and Black Powder.

## KEYSTONE COAL AND COKE COMPANY

Arona.—The ventilation and drainage were good except that the ventilation in some parts is below the legal requirements of the law. The system for saturating the coal dust is the exhaust steam fan, the fan engine and the mine is also in a naturally damp condition. Explosives used are: Black Powder and Clay Tamping.

Claridge.—Ventilation and drainage were in good condition. Black Powder is used.

Keystone Shaft.—The ventilation and drainage were in good condition generally. The ventilation in No. 5 split, however, should be improved. The system for saturating the coal dust is pipe lines in entry and pipe lines in each room. Explosives used are: Carbonite, Dynamite, Black Powder and Clay Tamping.

Madison.—Ventilation and drainage were in fair condition. The mine is retreating with the pillars and entry stumps.

Sewickley.—The ventilation and drainage were generally in good condition, but shelter holes should be provided in some parts of the mine. The system for saturating the coal dust is by pipe line. Explosives used are: Carbonite, Black Powder and Clay Tamping.

## NEW YORK AND CLEVELAND GAS COAL COMPANY

Duquesne.—Ventilation and drainage were in fair condition.

Lyons Run.—The ventilation and drainage were generally in good condition. Explosive used is Black Powder.

Oak Hill No. 3.—The ventilation and drainage were good except in Nos. 5 and 6 splits, where the ventilation is below the requirements of the law. Explosive used is Black Powder.

Oak Hill No. 5.—Ventilation and drainage were in fair condition. Explosive used is Black Powder.

#### OCEAN COAL COMPANY

Ocean No. 1.—Ventilation and drainage good. The system for saturating the coal dust is by pipe line. Explosives used are: Carbonite, Black Powder and Clay Tamping. Shot firers are employed.

Ocean No. 2.—Ventilation and drainage in good condition generally. The system for saturating the coal dust is by pipe line and by sprinkling with water car on entries or headings, but the rooms are dry and dusty. The general superintendent has notified me that he is going to install pipe system in the rooms.

#### PENN GAS COAL COMPANY

Penn Gas No. 2.—Ventilation and drainage generally in good condition. The system for saturating the coal dust is by sprinkling with improved water car and steam jet. Explosives used are: Masurite and Clay Tamping. Shot firers are employed.

Penn Gas No. 5.—Ventilation and drainage good. The mine is in a naturally damp condition. Explosives used are: Collier No. 5 and Clay Tamping.

#### PITTSBURG-WESTMORELAND COAL COMPANY

Penn Manor No. 1.—Ventilation and drainage in good condition. Shelter holes should be provided in some parts of the mine. Explosives used are: Black Powder and Clay Tamping.

Penn Manor No. 5.—The ventilation and drainage were fair, except in No. 1 split, where the ventilation is below the requirements of the law. Explosive used is Black Powder.

#### PITTSBURG AND BALTIMORE COAL COMPANY

Edna No. 1.—Ventilation and drainage in generally good condition. The system for saturating the coal dust is by sprinkling with a water car. Explosives used are: Carbonite and Clay Tamping.

Edna No. 2.—Ventilation and drainage in good condition generally. The system for saturating the coal dust is by sprinkling with a water car. Explosives used are: Carbonite and Clay Tamping. Shot firers are employed where safety lamps are used.

#### MANOR GAS COAL COMPANY

Denmark.—Ventilation and drainage in generally good condition. Explosives used are: Mineite, Black Powder and Clay Tamping.

#### W. B. SKELLY COAL COMPANY

Elizabeth.—Ventilation and drainage in fair condition. Explosives used are: Black Powder and Clay Tamping.

#### ADAMS GAS COAL COMPANY

Gress.—Ventilation and drainage were in fair condition. Black Powder is used.

## UNITED-CONNELLVILLE COKE COMPANY

Madison.—Ventilation and drainage fair. I requested the Mine Foreman to have the ventilation conducted to the face of the workings, and to discontinue the use of canvas cloth for stoppings between entries. Black Powder is used.

## G. VOGELE SONS AND COMPANY

Hampton.—Ventilation and drainage were in fair condition.

## WEINMAN BROTHERS

Weinman.—Ventilation and drainage were in fair condition.

## STEEL AND SCOTT COMPANY

Ward.—Ventilation and drainage were in fair condition.

## DUNN-CONNELLVILLE COAL AND COKE COMPANY

Little Gem.—Ventilation and drainage were in fair condition. I called the Mine Foreman's attention to the fact that there should be some means of ventilation installed in the mine.

## IMPROVEMENTS

## KEYSTONE COAL AND COKE COMPANY

Arona.—Built sixty-four stoppings and five overcasts. Also one underground stable built of incombustible material, containing 24 stalls and one box stall, the sides of which are of brick and cement. The stalls are formed of 3-inch pipe for columns and 1½ inch pipe for partitions. The mangers are formed with 1½ inch pipe. The floor is of ash concrete. Planks are laid for mules to stand on, this being the only combustible material in the stable.

The exhaust steam has been turned into the main air course. No sprinkling system has been installed in this mine because it is naturally a damp mine and there is no dust. Water plugs have been installed in the stable.

Claridge.—Built fifty-two brick stoppings and three overcasts of brick and iron. Three hundred Wolf safety lamps and thirty-five Clancy safety lamps have been put in use during the year.

Keystone Shaft.—Built one hundred and one permanent stoppings and eight overcasts. An extension thirty feet long has been built to the pump room; the fan has been made reversible; and one Ingersoll-Rand, low pressure air compressor and one 350 horse power Stirling boiler have been installed. Installed a complete water system throughout the mine for sprinkling purposes and also for protection from fire. This system is put in with 2-inch pipe on the main entries, 1-inch pipe on the butt entries, and ¾-inch pipe in the rooms, with water taps at intervals so that hose can be connected every here and there.

Sewickley.—An underground stable has been built capable of holding 21 head of stock. The stable is built of brick and cement side walls, with 80 pound steel rails, 5 feet apart, to support the roof,

which is also supported with three 3-inch gas pipes. The stalls are partitioned off with 1½-inch gas pipe; the mangers are put in with 1½-inch gas pipe. The floor is being laid with ash concrete and plank put in the stalls for the mules to stand on.

Installed a complete water system throughout the mine for sprinkling purposes and also for protection from fire. This system is put in with 2-inch pipe on the main entries, 1-inch pipe on the butt entries and ¾-inch pipe in the rooms, with water taps at intervals so that hose can be attached.

Installed one Robinson fan, size 20 feet x 7 feet, operated by Clifford engine. This gives the mine an extra fan, which can be used in case anything should happen to the other one.

Installed two 6-ton H. K. Porter, cross compound, compressed air locomotives. These are used for hauling coal in places where mules cannot haul.

A new haulage road has been made, which necessitated 3200 feet of grading to be done. This grading at some places was 14 feet deep. This gives a grade sufficient to carry the wagons by gravity for the entire length of the grade.

The return airway on the Fourth South Section has been enlarged for a distance of 1850 feet. This has increased the area of airways in that point to an average of 90 feet.

#### NEW YORK AND CLEVELAND GAS COAL COMPANY

Lyons Run.—Erected eight permanent overcasts and twenty-two brick stoppings.

#### OCEAN COAL COMPANY

Ocean No. 1.—Nine permanent stoppings and two overcasts have been built. A sprinkling system has been installed in the mine, with 2-inch pipe on the face entries and 1-inch pipe on butt entries, with hose to sprinkle rooms. The dust is properly saturated and taken out of the mine.

Ocean No. 2.—An air shaft, 13 x 20 feet and 316 feet deep, has been sunk. Installed one Clifford-Capell fan 18 x 5 feet, driven by 2 cross compound engines, high and low steam pressure, each engine to run fan separately if necessary.

Installed two 150 K. W. generators, direct connected to 19 x 20 McEwen engines 296 horse power each. Erected one 300 horse power Stirling boiler, and installed one Phillips cross-over dump.

An electric haulage system has been installed inside, consisting of 3 Jeffrey haulage locomotives, one 6-ton and two 10-ton machines. Six permanent overcasts and forty permanent stoppings have been built. Water sprinklers have been installed at bottom and pipe line on faces. Water wagons are used and the dust is properly saturated and taken out of the mine. Houses for 45 families have been built.

#### PITTSBURG AND BALTIMORE COAL COMPANY

Edna No. 1.—Installed one new 100 K. W. generator in the power house and one 25 horse power haulage engine on the slate dump.

The improvements inside consisted of making a return air course from fan to sixth flat, enlarging the two return air courses from sixth flat to fifteenth flat, making a new return air course for twelfth flat through eleventh flat, putting in two overcasts over manway and

slope, enlarging overcast over fifteenth flat from 40 feet area to 70 feet. Built seventy-five 13-inch concrete stoppings and fifty 6-inch concrete stoppings and seven overcasts.

Edna No. 2.—Built one permanent overcast and installed one We-Fu-Go Water Softening plant. Fifty Wolf safety lamps were put in use.

## PROSECUTIONS FOR VIOLATIONS OF THE MINING LAWS

March 22, Joseph Oravy, a miner in Criterion mine of the Westmoreland Coal Company, took a pipe beyond the station in said mine inside of which locked safety lamps are used. He was arrested, plead guilty, and was sentenced to pay a fine of \$5.00 and costs.

In April, Peter Pala, Angelo Bendeno and Lorenzo Armacrete passed a permanent danger signal in the Carbon mine of the Keystone Coal and Coke Company. Two of them were arrested, they plead guilty and were fined \$5.00 each and costs. The other one is a fugitive.

In October, Paul Rubick and Mike Tuik used an open light in a safety lamp section of Edna No. 1 mine, operated by the Pittsburgh and Baltimore Coal Company. They were arrested, plead guilty and were fined each \$10.00 and costs.

October 25, Charles Luyccsak was arrested on oath of J. B. Watson, a fire boss, for tampering with electric wires in Edna No. 2 mine of the Pittsburgh and Baltimore Coal Company. Defendant plead guilty and was fined \$5.00 and costs.

In October, Paul Ross was arrested for using an open light in a safety lamp section of Denmark mine, Manor Gas Coal Company. He plead guilty and was sentenced to pay a fine of \$5.00 and costs.

December 9, John Fisher took matches, pipes and cigarette paper, etc., into the safety lamp section of Criterion mine, operated by the Westmoreland Coal Company. He was arrested, plead guilty and was fined \$5.00 and costs.

December 27, Mike Frank, Casper Guseman and William Markus passed a danger signal placed on a travelingway in Edna No. 1 mine of the Pittsburgh and Baltimore Coal Company. Defendants are all fugitives.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in the Knights of Pythias Hall, Irwin, April 6, 7, 8 and 9.

The Board of Examiners was composed of William J. Neilson, Mine Inspector, William Bird, Superintendent and John Walters, Mine Foreman. There were one hundred and thirteen applicants examined; thirty-four for certificates as Mine Foremen and seventy-nine for certificates as Fire Boss. The following persons passed a satisfactory examination and were granted certificates as Mine Foremen.

### First Grade

Joseph Maize, William S. Batey, George H. Harrison, Edward Bytheway and George B. Curry.

## **TWENTIETH DISTRICT**

SOMERSET COUNTY

Somerset, Pa., February 15, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: In compliance with the requirements of the Bituminous Mining Law, I herewith transmit my annual report for the Twentieth Bituminous District for the year ending December 31, 1909.

I was transferred to this District July 1, 1909, from the Eighteenth District.

The report contains the usual tables and statistics, with a brief description of the mines, an account of the important improvements made during the year, and a report of the annual examination of applicants for mine foremen's certificates.

Respectfully submitted,

NICHOLAS EVANS,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                   |           |
|-------------------------------------------------------------------|-----------|
| Number of mines, .....                                            | 72        |
| Number of mines in operation, .....                               | 68        |
| Number of tons of coal shipped to market, .....                   | 5,400,615 |
| Number of tons used at mines for steam and heat, .....            | 123,932   |
| Number of tons sold to local trade and used by employees, .....   | 23,738    |
| Number of tons used in the manufacture of coke, .....             | 27,359    |
| Number of tons of coal produced, .....                            | 5,575,644 |
| Number of tons of coke produced, .....                            | 17,428    |
| Number of coke ovens, .....                                       | 225       |
| Number of coke ovens in operation, .....                          | 225       |
| Number of tons of coal produced by pick mining, .....             | 3,750,731 |
| Number of tons produced by compressed air machines,...            | 943,013   |
| Number of tons produced by electrical machines, .....             | 881,900   |
| Number of persons employed inside of mines, .....                 | 6,211     |
| Number of persons employed outside, including coke workers, ..... | 850       |
| Number of persons employed at manufacture of coke, ....           | 57        |
| Number of fatal accidents inside of mines, .....                  | 28        |
| Number of fatal accidents outside, .....                          | 2         |
| Number of non-fatal accidents inside of mines, .....              | 48        |
| Number of non-fatal accidents outside, .....                      | 2         |
| Number of tons of coal produced per fatal accident inside, .....  | 199,130   |
| Number of persons employed per fatal accident inside, ..          | 222       |
| Number of persons employed per fatal accident outside, ..         | 425       |
| Number of persons employed per non-fatal accident inside, .....   | 129       |
| Number of persons employed per non-fatal accident outside, .....  | 425       |
| Number of wives made widows, .....                                | 12        |
| Number of children made orphans, .....                            | 26        |
| Number of steam locomotives used inside of mines, .....           | —         |
| Number of steam locomotives used outside, .....                   | 1         |
| Number of compressed air locomotives used inside, .....           | 1         |
| Number of compressed air locomotives used outside, ...            | —         |
| Number of electric motors used inside, .....                      | } 85      |
| Number of electric motors used outside, .....                     |           |
| Number of fans in use, .....                                      | 50        |
| Number of furnaces in use, .....                                  | 11        |
| Number of gaseous mines in operation, .....                       | 4         |
| Number of non-gaseous mines in operation, .....                   | 64        |
| Number of new mines opened, .....                                 | —         |
| Number of old mines abandoned, .....                              | —         |

TABLE A  
PRODUCTION OF COAL

| Names of Operators                          | Tons      |

| 25               | James Bowers, ----                              | American, --                    | Miner, ----                   | 37       | M.                | 1                | 4                 | Reading No. 3. ---- |           | Killed by falling down the shaft. He had just come up the shaft and thoughtlessly walked on the cage, and was killed by falling against a piece of rock in his room. He had started to drill a hole to shoot down some loose rock when the rock fell, and in attempting to get out of the way he fell down and broke his neck.                                                                                                                                                                                                                                                                                   |

| 29               | Jesse Carnahan, ----                            | American, --                    | Miner, ----                   | 23       | M.                | 1                | 1                 | Jerome Shaft No. 1. | Somerset, | Killed by fall of bone coal while taking out pillars. After examining the roof after a heavy fall, he began to mine the coal, when the fall occurred. A careful examination of the place would have disclosed the loose bone coal. Killed at the shaft bottom by being caught between the cage and the side of the shaft. There were ten men on the cage being lowered into the shaft. The engineer through some error lost control of the engine, allowing the cage to strike the shaft bottom hard and Moodrick and Burchus were either jarred off or attempted to get off the cage and were caught as stated. |
| Feb. 5           | Michael Moodrick, ----<br>Charles Burchus, ---- | Slavonian, --<br>Lithuanian, -- | Runner, ----<br>Scraper, ---- | 32<br>23 | M.<br>S.          | 1<br>----        | 5                 | Jerome Shaft No. 1. |           | Killed by fall of slate while drawing entry stumps. He had failed to set posts to secure the place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| July 28  | John Leshuk, -----    | Slavonian, ----- | Loader, -----     | 22 S. ----- | Jerome Shaft No. 1, ----- | Killed by shock from an electric wire charged with 250 volts. While helping to push a mine car into his room he got the back of his neck against the wire.                                                                                                                                                                 |
| Aug. 18  | Brenk Sando, -----    | Italian, -----   | Laborer, -----    | 26 S. ----- | Jerome Shaft No. 2, ----- | Killed by falling down shaft. He was standing close to the edge of the tipple landing of the shaft waiting to get orders from the top man to go on the cage, when the cage began to descend without him. The safety gate came down on him, throwing him into the shaft. He fell on the descending cage and broke his neck. |
| 28       | Cornellas Sola, ----- | Italian, -----   | Miner, -----      | 23 S. ----- | Ponfelgh, -----           | Killed by fall of roof while starting a room. He had fired a shot in the bottom slate that discharged some posts from under cross bars and the roof fell on him.                                                                                                                                                           |
| Sept. 13 | Andy Lucket, -----    | Slavonian, ----- | Miner, -----      | 22 S. ----- | Eureka No. 31, -----      | Killed instantly by shock from an electric wire charged with 500 volts. He was pushing his mine car into his room, and while doing so raised his head, striking the wire.                                                                                                                                                  |
| 21       | Robert Fleming, ----- | Scotch, -----    | Rope rider, --    | 18 S. ----- | Jenner No. 3, -----       | Killed by falling between the cars and being run over. Outside.                                                                                                                                                                                                                                                            |
| Oct. 2   | Hogan Shalls, -----   | American, -----  | Motorman, --      | 26 M. 1 2   | Ralplton No. 3, -----     | Killed by motor. He was running his motor at high speed around a switch on the trestle, when it jumped the track and fell to the ground, crushing him underneath.                                                                                                                                                          |
| Dec. 13  | Thomas Kregal, -----  | Slavonian, ----- | Track cleaner, 23 | S. -----    | Jerome Shaft No. 1, ----- | Killed by falling down shaft.                                                                                                                                                                                                                                                                                              |
| 21       | Samuel Scally, -----  | Italian, -----   | Miner, -----      | 22 S. ----- | Orenda No. 2, -----       | Fatally injured by fall of coal while undermining. He failed to secure it.                                                                                                                                                                                                                                                 |

Somerset, --

TABLE 5.—Non-Fatal Accidents Inside and Outside of Mines

| Date of accident | Name of Person        | Nationality    | Occupation         | Age | Married or single | Name of Mine            | County    | Nature and Cause of Accident in Brief                                                                                                                                        |
|------------------|-----------------------|----------------|--------------------|-----|-------------------|-------------------------|-----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Jan. 11          | Norman Engle, -----   | American, ---  | Miner, -----       | 65  | M.                | Elk Lick No. 1, -----   |           | Leg injured by fall of coal at face of room.                                                                                                                                 |
| 29               | Michael Dumbrosky, -- | Polish, ----   | Loader, -----      | 20  | S.                | Eureka No. 30, -----    |           | Leg fractured by fall of coal while robbing pillars.                                                                                                                         |
| Feb. 2           | George Syerat, -----  | Slavonian, --  | Miner, -----       | 26  | S.                | Pine Hill No. 1, -----  |           | Collar bone broken by fall of roof slate while drawing pillars.                                                                                                              |
| 5                | John Platter, -----   | American, ---  | Miner, -----       | 71  | M.                | Grassy Run No. 2, ----- |           | Leg broken by fall of coal while working at the face.                                                                                                                        |
| 8                | Stiney Dunkosky, ---- | Slavonian, --  | Miner, -----       | 16  | S.                | Eureka No. 30, -----    |           | Leg broken by fall of coal from the rib, while loading car on the side, in pillar work.                                                                                      |
| 26               | James Gierdine, ----- | Italian, ----  | Miner, -----       | 24  | S.                | Jenner No. 3, -----     |           | Compound fracture of leg by fall of slate out along the room.                                                                                                                |
| March 5          | R. M. May, -----      | American, ---  | Spragger, -----    | 22  | S.                | Jenner No. 2, -----     |           | Leg broken while coupling the wagons to motor. When the wagons bumped from behind his leg was caught between them and the motor. Outside.                                    |
|                  |                       |                |                    |     |                   |                         | Somerset, | Injured about the body by fall of slate in pillar workings.                                                                                                                  |
| 9                | Anton Mocko, -----    | Polish, ----   | Miner, -----       | 30  | S.                | Eureka No. 30, -----    |           | Left eye injured by a pick. He was shoveling coal and struck his eye against a pick that was lying on a bench of coal close to the face of the room.                         |
| 19               | N. S. Saylor, -----   | American, ---  | Miner, -----       | 31  | M.                | Listie, -----           |           | Compound fracture of leg by fall of bone coal in pillar work.                                                                                                                |
| 20               | Anthony Cleim, -----  | Lithuanian, -- | Miner, -----       | 40  | M.                | Jerome No. 1, -----     |           | Back seriously injured by fall of rock in pillar work.                                                                                                                       |
| 22               | Paul Gianory, -----   | Italian, ----  | Miner, -----       | 19  | S.                | Stauffer, -----         |           | Arm broken and body badly injured by mine cars. While running the electric motor into the mine he ran into some empty cars that had broken loose from the trip ahead of him. |
| April 16         | M. E. Jones, -----    | American, ---  | Night foreman, --- | 42  | M.                | Eureka No. 31, -----    |           |                                                                                                                                                                              |

|          |                        |                  |                    |       |                            |                                                                                                                                                                     |
|----------|------------------------|------------------|--------------------|-------|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| April 28 | James Palla, -----     | Italian, -----   | Miner, -----       | 19 S. | Eureka No. 31, -----       | Leg broken by mine cars leaving the track along the cross heading.                                                                                                  |
| 28       | Stanley Grobosky, ---  | Russian, ---     | Miner, -----       | 30 S. | Jenner No. 3, -----        | Leg broken by fall of rock at the working face.                                                                                                                     |
| May 1    | John Browna, -----     | Italian, ---     | Miner, -----       | 24 S. | Eureka No. 31, -----       | Hip injured by jumping out of a man trip while it was in motion.                                                                                                    |
| 6        | Michael Perry, -----   | Italian, ---     | Miner, -----       | 40 M. | Summit No. 1, -----        | Face, hands and body burned by powder while filling a small can. They had taken the keg of powder into the mine unknown to the mine boss.                           |
|          | Michael Villaus, ----- | Italian, ---     | Miner, -----       | 43 S. |                            | Side and back injured by fall of coal in pillar work.                                                                                                               |
| 7        | Andrew Kost, -----     | Slavonian, ----- | Miner, -----       | 21 S. | Jerome No. 1, -----        | Leg broken by mine wagons. While taking a loaded trip down the heading another driver ran a wagon out of a side heading and Droust's leg was caught between wagons. |
| 12       | Joseph Droust, -----   | Slavonian, ----- | Driver, -----      | 42 S. | Jerome Shaft No. 1, -----  | Leg broken by fall of rock from the side of the entry.                                                                                                              |
| 15       | Thomas Jones, -----    | English, -----   | Timberman, -----   | 38 M. | Knickerbocker No. 2, ----- | Leg broken by a rope slipping from a sheave wheel along the heading.                                                                                                |
| 21       | Joseph Labodis, -----  | Slavonian, ----- | Miner, -----       | 28 M. | Pen Mar No. 2, -----       | Leg broken by clay falling from side of the shaft while timbering it.                                                                                               |
| June 12  | Thomas Hudson, ---     | Scotch, -----    | Rock boss, -----   | 71 M. | Eureka No. 31, -----       | Body squeezed between mine car and post when car left the sidetrack.                                                                                                |
| 23       | Andy Ligua, -----      | Slavonian, ----- | Driver, -----      | 24 M. | Atlantie, -----            | Rib broken, shoulder and body bruised by fall of coal in pillar work.                                                                                               |
| 29       | Benjamin Sperry, ---   | American, ---    | Miner, -----       | 18 S. | Elk Lick No. 1, -----      | Fingers crushed by pillars running over them at room switch.                                                                                                        |
| July 17  | John Wilvitch, -----   | Polish, -----    | Motorman, -----    | 22 S. | Orenda No. 2, -----        | Arm broken by fall of top slate at face of room.                                                                                                                    |
| 20       | John Patrovish, -----  | Slavonian, ----- | Miner, -----       | 22 S. | Knickerbocker No. 2, ----- | Back injured.                                                                                                                                                       |
|          | Martin Seacock, -----  | Slavonian, ----- | Miner, -----       | 19 S. |                            | Back and shoulder injured by fall of roof slate on the heading.                                                                                                     |
|          | William Mays, -----    | English, -----   | Miner, -----       | 29 S. | Stauffer No. 1, -----      | Leg broken by fall of top slate at face of room.                                                                                                                    |
| 21       | John Buchlon, -----    | Slavonian, ----- | Scraper, -----     | 42 M. | Eureka No. 31, -----       | Head, arm and leg injured by fall of top slate at face of heading.                                                                                                  |
| 24       | George Freeman, -----  | American, -----  | Miner, -----       | 50 M. | Listie, -----              | Leg broken by being squeezed between motor and timber at mine opening.                                                                                              |
| Aug. 2   | Charles Shunk, -----   | American, -----  | Electrician, ----- | 29 M. | Elk Lick No. 1, -----      | Side bruised by fall of slate at working face.                                                                                                                      |

Somerset,

TABLE 5—Continued

| Date of accident | Name of Person          | Nationality    | Occupation    | Age | Married or single | Name of Mine         | County    | Nature and Cause of Accident in Brief                                                                   |
|------------------|-------------------------|----------------|---------------|-----|-------------------|----------------------|-----------|---------------------------------------------------------------------------------------------------------|
| Sept. 2          | Frank Laudsmayer, ---   | German, ---    | Miner, ---    | 17  | S.                | Stauffer No. 1, ---  |           | Top of thumb and finger blown off while playing with dynamite.                                          |
| Oct. 1           | Andrew Gulick, -----    | Slavonian, --- | Rockman, ---  | 36  | M.                | Eureka No. 30, ---   |           | Leg broken by rock at face of heading. The car ran back off the track and caught his leg under the car. |
| 8                | Joseph Prack, -----     | Polish, ----   | Miner, ---    | 22  | S.                | Stuart, -----        |           | Leg bruised by fall of slate in pillar work.                                                            |
| 20               | James Palls, -----      | Italian, ----  | Miner, ---    | 19  | S.                | Eureka No. 31, ---   |           | Leg broken by fall of coal while taking out heading stumps.                                             |
| 31               | Fred Rudolfa, -----     | Austrian, --   | Miner, ---    | 35  | M.                | Stauffer No. 1, ---  |           | Leg broken by a piece of falling timber at working face.                                                |
| Nov. 13          | William Dickey, -----   | Slavonian, --- | Miner, ---    | 39  | S.                | Stauffer No. 1, ---  |           | Thumb smashed by fall of coal while making a side track.                                                |
|                  | Frank Sellon, -----     | Slavonian, --- | Miner, ---    | 22  | S.                | Stauffer No. 1, ---  |           | Cut close to the eye by a piece of rock while working on side track.                                    |
|                  | Harry Bowser, -----     | American, --   | Laborer, ---  | 19  | S.                | Elk Lick No. 1, ---  |           | Hip joint knocked out of place by mine car. Outside.                                                    |
| 23               | Guporis Dominick, ---   | Italian, ----  | Miner, ---    | 25  | S.                | Elk Lick No. 1, ---  | Somerset, | Shoulder knocked out of place by fall of coal at face of room.                                          |
| 27               | Albert Gauntze, -----   | American, --   | Runner, ---   | 20  | S.                | Elk Lick No. 1, ---  |           | Foot badly bruised between mine cars along the heading.                                                 |
| 30               | Michael Lisingal, ----- | Slavonian, --- | Miner, ---    | 26  | M.                | S. and C. No. 1, --- |           | Jaw broken and side injured by fall of coal at face of room.                                            |
| Dec. 13          | Steven Glass, -----     | Coalion, ---   | Brakeman, --- | 26  | M.                | Jerome No. 2, ---    |           | Foot smashed by a motor in the mine along the main heading.                                             |
| 20               | John Danks, -----       | Slavonian, --- | Miner, ---    | 36  | M.                | Stauffer No. 1, ---  |           | Thumb smashed and back injured by fall of top in pillar work.                                           |
|                  | Haskell Kimmell, -----  | American, --   | Spragger, --- | 22  | S.                | Reading No. 3, ---   |           | Leg broken by mine cars along the heading.                                                              |
| 29               | Michael Salena, -----   | Slavonian, --- | Miner, ---    | 44  | M.                | Elk Lick No. 1, ---  |           | Ribs broken and ankle injured by fall of slate in pillar work.                                          |

### Explosion of Gas at Orenda No. 2 Mine

On January 25, at 8 o'clock in the evening, an explosion of gas occurred at the Orenda No. 2. mine of the Merchants Coal Company, located at Boswell, by which J. G. Logan, the Superintendent, George Morris, the Assistant Superintendent, John Cole, Mine Foreman, Andrew Stulock and John Stulock, Miners, were killed. About five o'clock in the afternoon of the day of the explosion a trackman passing down the first South dip heading, between rooms Nos. 3 and 5, ignited some gas. He reported it to the fire boss. A little later the same trackman again ignited the gas in about the same place; and two miners going out at quitting time also ignited the gas in about the same place. They then returned down the heading and went out by another road. The mine foreman hearing of the gas being ignited in No. 1 dip off No. 7 Right, proceeded to make an investigation of the place, and in company with the Superintendent and the Assistant Superintendent entered the mine. The electric current was cut off from the mine and instructions were sent out to stop any person from entering the mine. The fan was working as a force fan and the slope serving as a return airway. About 8 o'clock the explosion occurred. The body of Logan was found at Sixth right level. The bodies of Morris and Cole were found at a point in No. 7 Right level beyond the return current from No. 1 dip. No other persons were known to be in the vicinity at the time of the explosion. The bodies of Andrew and John Stulock, German miners, were found in No. 3 South of No. 8 Left. After a very thorough investigation of the place, in No. 1 dip between Rooms Nos. 3 and 5, the conclusion was reached that the cause of the disaster was an explosion of the gas given off by the falls in the pillar workings in the No. 1 Dip heading, ignited by a feeder of gas left burning from the previous ignition about 5.40 P. M.

## CONDITION OF MINES

### CONSOLIDATION COAL COMPANY

Jenner Nos. 1 and 2.—Ventilation and drainage good.

Jenner No. 3.—Ventilation is weak and is not conducted close to the working face. Drainage fair.

Jenner Nos. 4. and 5.—Ventilation and drainage very good.

Stuart.—Ventilation and drainage good. The mine is nearly exhausted.

Listie.—Ventilation is not well maintained up to the working face. Drainage requires attention.

Wilson Creek.—Ventilation and drainage good.

Pine Hill No. 1.—Ventilation and drainage are very unsatisfactory, and very little effort is being made to improve them.

Casselman No. 2.—Ventilation is poorly taken care of and allowed to leak through gob airways. Drainage good.

Summit No. 1.—Ventilation weak; drainage good.

Summit No. 2.—Ventilation and drainage fair.

Elk Lick Nos. 1 and 3.—Ventilation very weak. The condition of the road and their sides is very unsatisfactory.

Elk Lick No. 2.—Ventilation good; drainage fair.

Hamilton.—General condition is good. The mine is nearly exhausted.

#### BERWIND-WHITE COAL MINING COMPANY

Eureka No. 30.—Ventilation good except in No. 10 Right. Drainage good. General condition of the mine is satisfactory.

Eureka No. 31.—Ventilation is weak in the major portion of the mine. Drainage good except in part of the new drift. The general condition of the cross headings is not satisfactory, because of the amount of refuse allowed to accumulate along the sides and in the safety holes.

Eureka No. 39 Upper.—Ventilation is very weak and unsatisfactory. Drainage is well taken care of. Many of the headings are in such a condition as to require special attention.

#### JENNER-QUEMAHONING COAL COMPANY

Jerome Shaft Nos. 1 and 2.—Ventilation, drainage, general conditions, and discipline very good.

#### QUEMAHONING COAL COMPANY

Ralphton Nos. 1, 2, 3 and 4.—Conditions fair with the following exceptions: In Nos. 1, 3 and 4 the ventilation, is very poorly taken care of, and only a small per cent. of the large volume of air produced by the fans is delivered to the working face as the air is allowed to leak through ineffective stoppings.

#### BROTHERS VALLEY COAL COMPANY

Pen Mar No. 2.—Ventilation is very weak and poorly taken care of. Drainage good.

Pen Mar No. 3.—Ventilation is well maintained up to the working face. Drainage is well provided for.

#### MERCHANTS COAL COMPANY

Orenda No. 2.—Ventilation, drainage, and general conditions are very good.

Merchants No. 3.—Ventilation is good. The drainage is very unsatisfactory in parts of the mine.

#### MEYERSDALE COAL COMPANY

Stauffer No. 1.—Ventilation is very weak in parts of the mine. Drainage is good, except in No. 3 Left. General condition of the mine is good.

Stauffer No. 2.—Ventilation and drainage require attention.

#### KNICKERBOCKER SMOKELESS COAL COMPANY

Knickerbocker No. 2.—Ventilation well taken care of and maintained up to the working faces. Drainage good; general condition of the mine is good.

Knickerbocker No. 3.—Ventilation fair; drainage good. General conditions have been very much improved during the year.

## SOMERSET MINING COMPANY

Knickerbocker No. 1.—Ventilation, drainage and general conditions are very good.

## READING IRON COMPANY

Reading No. 3 (formerly Kimmelfton No. 3.)—Ventilation was weak at the last visit, but a strong effort was being made to have it put in good condition. Drainage good.

Reading No. 4 (formerly Kimmelfton No. 4.)—Ventilation, drainage and general conditions are very good.

## ATLANTIC COAL COMPANY

Atlantic.—Ventilation is not well conducted to the working faces. Drainage good.

## ENTERPRISE COAL COMPANY

Ponfeigh.—Ventilation is very weak throughout the mine; drainage good. The condition of the haulage roads is very bad, caused by the accumulation of dirt and general refuse.

## HAWS COAL COMPANY

Lenore Shaft.—Ventilation is good and well maintained up to the working faces. Drainage should receive attention.

Oneida Slope.—Ventilation and drainage good.

## CARBO-SMOKELESS COAL COMPANY

Bethel No. 2.—Ventilation is very weak at the face of the workings. The drainage in parts of the mine requires attention.

Bethel No. 3.—Ventilation is not well taken care of. Drainage poor on the new main.

## SOMERSET AND CAMBRIA COAL COMPANY

S. and C. No. 1.—Ventilation is weak and not well cared for. Drainage good.

## FEDERAL COAL COMPANY

Federal No. 1.—Ventilation and drainage good.

Federal No. 3.—Ventilation very weak and poorly taken care of. Drainage poor.

## GRASSY RUN COAL COMPANY

Grassy Run Nos. 1 and 2. —These mines are connected for ventilation and drainage. They are in good condition.

## HOCKING COAL COMPANY

Hocking No. 2.—Ventilation and drainage good in the parts of the mine that were worked.

## RANDOLPH COAL COMPANY

Randolph.—Ventilation and drainage reasonably good.

## KEYSTONE COAL COMPANY

Keystone Nos. 1 and 2.—Ventilation is very weak and not properly taken care of. The drainage is very bad and should be given attention. Keystone No. 1 is now Glen McClaren.

## CORONET COAL COMPANY

Standard No. 3.—Fairly well ventilated. Some parts are not properly drained.

## MEYERSDALE FUEL COMPANY

Yoder.—Fairly well ventilated and drained.

## STONER COAL COMPANY

Stoner Nos. 1 and 2.—Method of producing the ventilation is not satisfactory. Drainage good.

## KENNETH COAL COMPANY

Kenneth.—Ventilation is very weak in parts of the mine. The drainage in the main heading requires attention.

## S. M. HAMILTON AND COMPANY

Adams.—Ventilation is reasonably good, but the drainage needs attention.

## PENNWOOD COAL COMPANY

Pennwood.—Ventilation and drainage reasonably good.

## W. A. MERRILL AND COMPANY

Enterprise.—Ventilation and drainage are very satisfactory.

## J. W. PRESTON

Franklin Nos. 2 and 3.—Ventilation good. The drainage is not well provided for and should receive immediate attention.

## PITTSBURG CAMBRIA COAL COMPANY

Morro Nos. 1 and 2.—The ventilating current of air is not strong enough at the working faces, owing to small airways and leaky stoppings.

## FRED ROWE

Mystic.—Not under the law.

## BOYNTON COAL COMPANY

Flog Hill.—Not under the law.

## SAVAGE FIRE BRICK COMPANY

Glade City.—Not under the law.

## CUMBERLAND BASIN COAL COMPANY

Cook.—In very good sanitary condition.

## COCHRAN COAL COMPANY

Cochran.—Not under the law.

## FISHER SMOKELESS COAL COMPANY

Neva.—There was neither fan nor furnace at this mine, but a fan is to be installed at once. Drainage requires attention.

## IMPROVEMENTS

## CONSOLIDATION COAL COMPANY

Casselman No. 2.—The tippie was burned down in June and a large and modern one has been erected.

Jenner Nos. 4 and 5.—Installed a Lepley reversible fan, diameter 20 feet, width 7 feet, driven by a 24 x 24 inch four-valve Corliss type adjustable cut-off engine; engine fitted with a continuous automatic oil and grease system. The fan is built to deliver 200,000 cubic feet of air at 2-inch water gauge. The maximum safety running speed of this fan is 165 revolutions per minute.

## BERWIND-WHITE COAL MINING COMPANY

Eureka No. 30.—The steam power plant has been abandoned and all power is conducted to the mine from a large central power plant that furnishes the electric current and the compressed air power for several mines. An opening has been driven out at the other side of the hill, and as a result the ventilation has been very much improved.

Eureka No. 31.—The steam power plant of this mine also has been abandoned, and the mine also receives its power from the large central power plant. The large Capell fan at the main opening has been abandoned and a new Stine fan placed at the rear end of the old workings, and a large Sturdevant fan placed at the new drift in the adjoining hill. Between these hills a large brick sub-station and power house has been erected, in which have been installed two directly connected motor-driven compressors; one 400 Kw. rotary converter, and three 125 Kw. oil-cooled transformers, receiving 6600 volts alternating current, and delivering same at 440 to 460 volts, for the operation of pumps and mining machines equipped with inductive motors.

Eureka No. 39 Upper.—The improvements here follow the same line as those above. A new sub-station has been built inside the mine, in which a lead-covered triple cable 6600 volts is connected to three 75 Kw. oil-cooled transformers.

## JENNER-QUEMAHONING COAL COMPANY

Jerome Shaft No. 1.—Some expensive improvements for cleaning the coal have been installed, and a large cut stone lamp and check house has been erected.

## MERCHANTS COAL COMPANY

Orenda No. 2.—A very large electrically driven pump has been installed in a new pump house, and second one is now under construction. A modern lamp and check house has been built. These improvements reflect great credit on the management.

## HOCKING COAL COMPANY

Hocking No. 2.—A second retaining dam to resist a head of water of 90 feet is being built to keep the water of the old works from coming into this mine.

## PENNWOOD COAL COMPANY

Pennwood.—A large and very expensive coaling tippie and coal bin have been built to enable the coaling of engines on four tracks.

## CUMBERLAND BASIN COAL COMPANY

Cook Mine.—A new electric haulage plant has been installed. The management desires to put everything in good condition.

## PROSECUTIONS FOR VIOLATIONS OF THE MINING LAWS

Joseph Speno, miner at the Orenda No. 2 mine of the Merchants Coal Company, was charged with having an open light in the section of the mine that is worked with locked safety lamps. Defendant entered a plea of guilty and was sentenced to pay the cost, and five days in jail.

Joseph Nowaka, miner at Jerome Shaft No. 1 of the Jenner-Que-mahoning Coal Company, was charged with violating General Rule No. 52 in crowding and pushing to get on the cage. Defendant pleaded guilty and was sentenced to pay the cost.

H. K. Stoner, of the Stoner Coal Company, was charged with operating a coal mine without a Mine Foreman as required by Article VI. The case is pending in court.

## MINE FOREMEN'S EXAMINATIONS

The annual examination of applicants for certificates of qualification as Mine Foremen and Fire Bosses was held in Somerset, April 6, 7, 8 and 9.

The Board of Examiners was composed of Thomas S. Lowther, Mine Inspector; James H. Scurfield, Superintendent, and Thomas Griffith, Mine Foreman. There were fifty-seven applicants examined, thirty-eight for certificates as Mine Foremen, and nineteen for certificates as Fire Bosses. The following persons passed a satisfactory examination and were granted certificates as Mine Foremen:

## First Grade

John Gibson, Jr., and Isaiah Clayton, Jerome.

## Second Grade

George Mitchell and William Mitchison, Garrett.

## ***TWENTY-FIRST DISTRICT***

---

WESTMORELAND, FAYETTE AND WASHINGTON COUNTIES

---

Charleroi, Pa., February 10, 1910.

Hon. James E. Roderick, Chief of Department of Mines:

Sir: I have the honor to transmit herewith my annual report as Inspector of the Twenty-first Bituminous District for the year ending December 31, 1909. This is a new district and was assigned to me July 1, 1909.

The usual descriptive and statistical matter is given in the report.  
Respectfully submitted,

F. W. CUNNINGHAM,  
Inspector.

## SUMMARY OF STATISTICS

|                                                                   |           |
|-------------------------------------------------------------------|-----------|
| Number of mines, .....                                            | 38        |
| Number of mines in operation, .....                               | 38        |
| Number of tons of coal shipped to market, .....                   | 7,670,067 |
| Number of tons used at mines for steam and heat, .....            | 143,633   |
| Number of tons sold to local trade and used by employees, .....   | 14,746    |
| Number of tons used in the manufacture of coke, .....             | 78,498    |
| Number of tons of coal produced, .....                            | 7,906,944 |
| Number of tons of coke produced, .....                            | 52,913    |
| Number of coke ovens, .....                                       | 217       |
| Number of coke ovens in operation, .....                          | 217       |
| Number of tons of coal produced by pick mining, .....             | 2,604,669 |
| Number of tons produced by compressed air machines, ...           | 145,394   |
| Number of tons produced by electrical machines, .....             | 5,156,881 |
| Number of persons employed inside of mines, .....                 | 7,293     |
| Number of persons employed outside, including coke workers, ..... | 919       |
| Number of persons employed at manufacture of coke, ....           | 40        |
| Number of fatal accidents inside of mines, .....                  | 27        |
| Number of fatal accidents outside, .....                          | 1         |
| Number of non-fatal accidents inside of mines, .....              | 53        |
| Number of non-fatal accidents outside, .....                      |           |
| Number of tons of coal produced per fatal accident inside, .....  | 292,850   |
| Number of persons employed per fatal accident inside, ...         | 270       |
| Number of persons employed per fatal accident outside, ..         | 919       |
| Number of persons employed per non-fatal accident inside, .....   | 138       |
| Number of persons employed per non-fatal accident outside, .....  |           |
| Number of wives made widows, .....                                | 12        |
| Number of children made orphans, .....                            | 30        |
| Number of steam locomotives used inside of mines, .....           |           |
| Number of steam locomotives used outside, .....                   |           |
| Number of compressed air locomotives used inside, .....           |           |
| Number of compressed air locomotives used outside, .....          |           |
| Number of electric motors used inside, .....                      | 85        |
| Number of electric motors used outside, .....                     |           |
| Number of fans in use, .....                                      | 36        |
| Number of furnaces in use, .....                                  | 6         |
| Number of gaseous mines in operation, .....                       | 31        |
| Number of non-gaseous mines in operation, .....                   | 7         |
| Number of new mines opened, .....                                 | 1         |
| Number of old mines abandoned, .....                              |           |

TABLE A  
PRODUCTION OF COAL

| Names of Operators                                          | Tons      |
|-------------------------------------------------------------|-----------|
| Monongahela River Consolidated Coal and Coke Company, ..... | 3,356,697 |
| Vesta Coal Company, .....                                   | 2,338,482 |
| Pittsburg Coal Company, .....                               | 1,255,306 |
| Peoples Coal Company, .....                                 | 282,071   |
| Naomi Coal Company, .....                                   | 223,557   |
| Diamond Coal Company, .....                                 | 176,911   |
| Sunshine Coal and Coke Company, .....                       | 52,818    |
| Zundell Coal Company, .....                                 | 51,515    |
| Harris-Smith Coal and Coke Company, .....                   | 42,164    |
| Echo Coal Company, .....                                    | 37,190    |
| Pates Coal Works, .....                                     | 30,601    |
| Mt. Hope Coke Company, .....                                | 25,840    |
| Peter Wagner, .....                                         | 16,245    |
| Wilson Coal Company, .....                                  | 14,040    |
| Johnston Coal Company, .....                                | 3,057     |
| Warner and Leonard Coal Company, .....                      | 450       |
| Total, .....                                                | 7,906,944 |

Production by Counties

|                     |           |
|---------------------|-----------|
| Westmoreland, ..... | 586,799   |
| Washington, .....   | 3,794,429 |
| Fayette, .....      | 3,525,716 |
| Total, .....        | 7,906,944 |

TABLE B.—Fatal and non-fatal accidents inside and outside of mines; number of tons of coal produced per accident; number of persons employed; number employed per accident

| Names of Operators                                | Fatal Accidents |         |       | Non-Fatal Accidents |         |       | Tons of coal produced per fatal accident inside | Tons of coal produced per non-fatal accident inside | Number of employees inside | Number of employees outside | Total number of employees | Number of employees inside per fatal accident | Number of employees outside per fatal accident | Number of employees inside per non-fatal accident | Number of employees outside per non-fatal accident |

| Jan. 5           | James Moody, -----                         | American, ---                | Motorman, ---             | 27       | M. 1              | 1                | 1                 | Vesta No. 4, ---               | Washington, ---                 | Instantly killed by mine cars on entry. It is supposed that he was reaching for the brake and fell under the loaded cars, which passed over his body.                                                                                                                            |
| 9                | Joseph Lachia, -----                       | Polish, ---                  | Loader, ---               | 23       | S. ---            | ---              | ---               | Vesta No. 4, ---               | Washington, ---                 | Instantly killed by fall of slate at face of room while picking slate bands from the coal.                                                                                                                                                                                       |
| 11               | Constanti Polls, -----                     | Italian, ---                 | Loader, ---               | 35       | M. 1              | 2                | ---               | Vesta No. 4, ---               | Washington, ---                 | Instantly killed by being electrocuted. He was repairing the motorman's trolley pole at the entrance of his room, and after completing the job he raised up against the trolley wire.                                                                                            |
| 20               | John Sheman, -----                         | Slavonian, ---               | Loader, ---               | 21       | S. ---            | ---              | ---               | Vesta No. 4, ---               | Washington, ---                 | Fatally injured. He was bringing three cars down an entry and noticed a car off the track ahead of him. When he attempted to get out of the car he came in contact with the trolley wire and received an electric shock and fell between car and rib. He died three hours later. |
| 30               | Charles Nemish, -----<br>John Morro, ----- | Russian, ---<br>Italian, --- | Loader, ---<br>Miner, --- | 38<br>26 | M. 1<br>S. ---    | 4<br>---         | 4                 | Fayette City, ---<br>Knob, --- | Fayette, ---<br>Washington, --- | Instantly killed by fall of slate at face of room.                                                                                                                                                                                                                               |
| Feb. 15          | Dick Capola, -----                         | Italian, ---                 | Loader, ---               | 25       | S. ---            | ---              | ---               | Vesta No. 4, ---               | Washington, ---                 | Instantly killed by fall of roof on pillar work while pulling loose coal from the side. He failed to post.                                                                                                                                                                       |
| 23               | John Starcheck, -----                      | Polish, ---                  | Loader, ---               | 23       | S. ---            | ---              | ---               | Albany, ---                    | Fayette, ---                    | Fatally injured by fall of slate at face of room while loading his car. He died the following day.                                                                                                                                                                               |
| March 3          | Herman Rahnke, -----                       | German, ---                  | Miner, ---                | 57       | M. 1              | 1                | 1                 | Champion, ---                  | Washington, ---                 | Instantly killed by fall of slate at face of entry while taking the slate down. Instantly killed by fall of slate in his working place while removing a post.                                                                                                                    |

TABLE 4.—Continued

| Date of accident | Name of Person        | Nationality   | Occupation   | Age | Married or single | Number of widows | Number of orphans | Name of Mine        | County          | Nature and Cause of Accident in Brief                                                                                                                                                                                                                                                                           |
|------------------|-----------------------|---------------|--------------|-----|-------------------|------------------|-------------------|---------------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| March 5          | John Slovinsky, ----- | Polish, ----  | Loader, ---- | 63  | M. -----          | -----            | -----             | Diamond, -----      | Washington, --- | Fatally injured by fall of slate near face of room. He was loading a car of coal close to the left side of the rib in his room, which was well posted, but owing to the wet roof and a slip in the slate between post and rib, the slate fell. He died a few minutes after he was removed from under the slate. |
| 10               | James Boyle, -----    | Scotch,-----  | Miner, ----- | 37  | S. -----          | -----            | -----             | Apollo, -----       | Fayette, -----  | Fatally injured by fall of coal at face of room while undermining. He failed to set sprags under the coal. He died on the way to the hospital.                                                                                                                                                                  |

| May 28  | Andy Shebeck, -----     | Slavonian, ----- | Loader, -----     | 47 | M. 1     | 2     | Chamouni, -----     | Fayette, -----      | Fatally injured by fall of coal at face of working place while loading a car of coal. He died 12 hours later.                                                                                                                                                                                          |
| June 19 | Joseph Aldo, -----      | Italian, -----   | Miner, -----      | 23 | S. ----- | ----- | Chamouni, -----     | Fayette, -----      | Instantly killed by fall of roof at face of working place. After he had taken out a stump of coal and finished loading his last car he sat down to rest under the roof, when it fell on him.                                                                                                           |
| July 7  | Floyd Lynn, -----       | American, -----  | Blacksmith, ----- | 22 | S. ----- | ----- | Little Redstone, -- | Fayette, -----      | Fatally injured by haulage rope coming off the sheave. He was standing on the inside of the curve repairing a guide sheave when it came off throwing him against a building. Outside.                                                                                                                  |
| 30      | Mike Neulich, -----     | Slavonian, ----- | Loader, -----     | 22 | S. ----- | ----- | Washington, -----   | Fayette, -----      | Fatally injured by fall of roof coal at face of room. He fired a shot, which blew out some timbers, and before the place was cleared of smoke he went into the room to see the effect of the shot, when the roof fell on him.                                                                          |
| Sept. 3 | John Tremboss, -----    | Slavonian, ----- | Loader, -----     | 21 | M. 1     | ----- | Somers No. 4, --    | Westmoreland, ----- | Instantly killed by fall of slate at face of room. He was pulling some loose coal which fell and knocked out a post from under the slate that fell on him.                                                                                                                                             |
| 28      | Angelo Boldicky, -----  | Italian, -----   | Miner, -----      | 34 | M. 1     | 2     | Arnold No. 1, ----  | Fayette, -----      | Instantly killed by fall of slate on pillar work. The slate was not sufficiently posted and broke over the coal.                                                                                                                                                                                       |
| Nov. 17 | Vediet Dudop, -----     | Polish, -----    | Loader, -----     | 26 | S. ----- | ----- | Naomi, -----        | Fayette, -----      | Instantly killed by fall of slate at face of entry. He charged a hole in the slate to blast it down and just as he finished tamping it the slate fell on him. He removed the posts too soon.                                                                                                           |
| 22      | Frank Karlit, -----     | American, -----  | Driver, -----     | 19 | S. ----- | ----- | Eclipse, -----      | Washington, -----   | Instantly killed by mine car. He was driving a mule with one loaded car on a nearly level track 130 feet inside of the pit mouth and was found dead under the car on the entry. It appears that he was riding on the front end and fell under the car.                                                 |
| Dec. 3  | Nick Dorotz, -----      | Italian, -----   | Labor boss, ----- | 31 | M. 1     | 2     | Vesta No. 4, ----   | Washington, -----   | Fatally injured by blast of roof rock. He was blasting some roof and did not get out of the entry when he fired the blast and a piece of rock struck him. He died soon after he reached the hospital.                                                                                                  |
| 15      | Vincent Parentie, ----- | Austrian, -----  | Miner, -----      | 30 | S. ----- | ----- | Little Redstone, -- | Fayette, -----      | Instantly killed by mine cars on haulage road. He was walking up the side-track, and as the trip entered the rope track, and as the trip entered the rope moved from between the tracks over to the empty track and struck him and knocked him down. Before he could help himself the trip struck him. |

TABLE 4.—Continued

| Date of accident | Name of Person        | Nationality   | Occupation         | Age      | Married or single | Number of widows | Number of orphans | Name of Mine    | County           | Nature and Cause of Accident in Brief                                                                                                                                                                                                                              |

| Date of accident | Name of Person                  | Nationality              | Occupation         | Age      | Married or single | Name of Mine  | County     | Nature and Cause of Accident in Brief                                                                                                                                              |
|------------------|---------------------------------|--------------------------|--------------------|----------|-------------------|---------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Feb. 3           | Mike Buscher,<br>(Frank Shoper, | Slavonian,<br>Slavonian, | Loader,<br>Loader, | 23<br>26 | S.<br>S.          | Knob,         | Washington | Face and hands burned by a premature blast while they were tamping it. The needle or tamping bar came in contact with a sulphur ball, causing a spark which ignited the powder.    |
| 6                | Steve Farbabi,                  | Hungarian,               | Loader,            | 23       | M.                | Knob,         | Washington | Thigh bone broken by fall of slate at the face of his room.                                                                                                                        |
| 19               | Joseph Bissel,                  | American,                | Miner,             | 56       | M.                | Chamouni,     | Fayette    | Head slightly cut by fall of slate at face of room.                                                                                                                                |
| 26               | John Perri,                     | Italian,                 | Miner,             | 36       | M.                | Little Squaw, | Washington | Leg broken by fall of coal and slate on pillar work.                                                                                                                               |
| March 1          | Joseph Butsek,                  | Hungarian,               | Loader,            | 32       | M.                | Crescent,     | Washington | Leg broken by fall of slate at face of room. He started to load coal from under the slate without posting it.                                                                      |
| April 3          | John Kosarik,                   | Slavonian,               | Loader,            | 32       | M.                | Vesta No. 4,  | Washington | Leg and arm broken by fall of slate at face of room.                                                                                                                               |
| 9                | Charles Package,                | Slavonian,               | Miner,             | 36       | M.                | Fayette City, | Fayette    | Leg broken by fall of slate at face of entry.                                                                                                                                      |
| 20               | Frank Washcoat,                 | Hungarian,               | Miner,             | 25       | S.                | Pike,         | Fayette    | Compound fracture of the leg by fall of coal while shoveling under a butt cut.                                                                                                     |
| 24               | Paul Botts,                     | Hungarian,               | Miner,             | 45       | M.                | Pike,         | Fayette    | Leg broken and body squeezed by fall of roof while loading a car of coal.                                                                                                          |
| May 1            | Henry Peters,                   | German,                  | Miner,             | 37       | M.                | Vesta No. 4,  | Washington | Leg and rib broken by fall of roof at face of room while knocking coal.                                                                                                            |
| 12               | Stanley Milkos,                 | Russian,                 | Miner,             | 22       | S.                | Fayette City, | Fayette    | Leg fractured by being caught between loaded cars. He jumped on a moving trip as it was leaving the side track, and when the cars bumped together his leg was caught between them. |
|                  | Steve Oswalt,                   | Hungarian,               | Loader,            | 29       | M.                | Vesta No. 4,  | Washington | Foot crushed by fall of slate at face of room.                                                                                                                                     |

|         |                           |                 |                    |    |                        |                   |                                                                                                                                                                                        |
|---------|---------------------------|-----------------|--------------------|----|------------------------|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| May 22  | Mike Minko, -----         | Hungarian, ---  | Miner, -----       | 32 | M. Vesta No. 4, -----  | Washington, ----- | Leg crushed by fall of slate at face of entry while he was standing on the bumper of the car.                                                                                          |
| 28      | Joseph Meshey, -----      | German, ---     | Motorman, -----    | 22 | S. Vesta No. 4, -----  | Washington, ----- | Leg crushed by a motor running against his motor on main entry.                                                                                                                        |
| June 15 | Andrew Quick, -----       | English, ---    | Miner, -----       | 42 | M. Chamouni, -----     | Fayette, -----    | Leg broken by fall of coal at face of room.                                                                                                                                            |
|         | James Restue, -----       | Italian, ---    | Loader, -----      | 38 | M. Tremont, -----      | Fayette, -----    | Body bruised by fall of slate from the face of his room while loading a car of coal.                                                                                                   |
|         | William McNaughton, ----- | American, ---   | Driver, -----      | 22 | S. Pike, -----         | Fayette, -----    | Arm broken by being caught between car and rib. He did not stop at the bottom of the entry to see if he had a clear track, and collided with a trip from this entry.                   |
| 17      | William McCune, -----     | American, ---   | Motorman, -----    | 23 | S. Pike, -----         | Fayette, -----    | Head slightly cut by fall of roof. His motor jumped the rails at a curve and knocked out some posts which liberated the loose roof.                                                    |
| 26      | Paul Kohoot, -----        | Slavonian, ---  | Trip-runner, ----- | 18 | S. Pike, -----         | Fayette, -----    | Back and leg injured by fall of roof. He was on the motor with McCune.                                                                                                                 |
|         | Samuel Drum, -----        | English, ---    | Asst. Mine Foreman | 57 | M. Vesta No. 1, -----  | Washington, ----- | Arm injured by fall of roof at the face of room while he was instructing a workman.                                                                                                    |
| July 14 | Angelo Nickelue, -----    | Italian, ---    | Miner, -----       | 35 | M. Vesta No. 1, -----  | Washington, ----- | Two ribs broken by fall of roof while on his way to work.                                                                                                                              |
|         | George Hertzog, -----     | American, ---   | Miner, -----       | 50 | M. Beaumont, -----     | Washington, ----- | Leg broken by fall of coal at face of room while undermining the coal.                                                                                                                 |
| 22      | William Beverage, -----   | American, ---   | Motorman, -----    | 34 | M. Vesta No. 4, -----  | Washington, ----- | Leg broken by being caught between car and motor. He did not notice a car on the entry and ran into it.                                                                                |
| Aug. 2  | Thomas Keep, -----        | Lithuanian, --- | Loader, -----      | 26 | M. Crescent, -----     | Washington, ----- | Burned about the face and the sight of one eye destroyed by a premature blast of black powder while he was tamping it.                                                                 |
| 4       | Jesse Crumpton, -----     | American, ---   | Trip runner, ----- | 22 | S. Vesta No. 4, -----  | Washington, ----- | Foot crushed by electric motor running over it while he was getting on the motor on main entry.                                                                                        |
|         | George Leeman, -----      | American, ---   | Loader, -----      | 27 | M. Arnold No. 1, ----- | Fayette, -----    | Leg broken by fall of roof coal at face of room.                                                                                                                                       |
|         | Arthur Johnston, -----    | American, ---   | Trip runner, ----- | 24 | S. Arnold No. 1, ----- | Fayette, -----    | Foot crushed by electric motor passing over it. He got off the empty cars and stepped over on the loaded track in front of the motor on the side track.                                |
| 11      | William Dryer, -----      | Hungarian, ---  | Driver, -----      | 28 | S. Tremont, -----      | Fayette, -----    | Bruised about the body by being caught between car and rib on butt entry. While attempting to stop his trip of loaded cars after being flagged, he got off the cars on the tight side. |

TABLE 5—Continued

| Date of accident | Name of Person        | Nationality    | Occupation          | Age | Married or single    | Name of Mine    | County | Nature and Cause of Accident in Brief                                                                                                                                                                                                                              |

## CONDITIONS OF MINES

## MONONGAHELA RIVER CONSOLIDATED COAL AND COKE COMPANY.

Alice, Little Redstone, Tremont, Washington, Snow Hill, Chamouni, Albany, Knob, Beaumont, Crescent, Vigilant, Eclipse, Champion, Fayette City and Apollo were all poorly ventilated. The ventilation lacks ample reserve power at some of the mines, while at others the ventilators are of insufficient capacity to produce and circulate brisk air currents near the face of the workings. At some of the mines the ventilator was ample, but the air currents did not reach the face of the workings in sufficient volume, due to obstructed air courses, poorly constructed stoppings, and numerous doors, all of which tend to short circuit the air current.

The hauling roads in many portions of the mines were obstructed along the sides of the entries, making it dangerous for persons in passing the cars and motors while they are in motion.

Shelter holes were not provided at all places required by the mine law, and what few there were, in many cases, were found to be filled or obstructed by dirt.

The drainage of the mines was in a fair condition. Most of these mines are of a very damp nature, but in a few of them portions are dry and dusty, and these portions are sprinkled with water by the water car system, and the accumulations of fine coal are removed from the mines.

Permissible explosives are used exclusively in Albany, Knob, and Chamouni mines, and in portions of Apollo, Fayette City and Alice mines.

It is only proper to state that the officials of these mines have not refused to comply with my recommendations to better the conditions, such as new fans, sinking air shafts, making additional air courses, building overcasts and incombustible stoppings, making shelter holes and cleaning all obstruction from the sides of the hauling roads. All pillar work will be worked with locked safety lamps. I am of the opinion, that if this work is kept up along the present lines in my next report I shall be able to state that the mines are in first-class condition.

## VESTA COAL COMPANY

Vesta Nos. 1 and 2.—The north side of the mine is very wet and muddy, due to many openings to the surface. Owing to the damp character of the mine no system is used to sprinkle the dust. The ventilation was fair.

Vesta No. 3.—The drainage was good, but the ventilation was poor. I have been informed by the superintendent, since my inspection of this mine, that he has changed mine foremen and that the ventilation has been increased in the workings and so divided as to meet my requirements. No provision is made to take care of the dust.

Permissible explosives are used to blast the coal.

Vesta No. 4.—The drainage was good. The ventilation was good in some parts of the mine, while in other parts it was very weak, due to many doors and defective stoppings, which cause a short circuit of the air current. There are five fans at this mine, but only four are in operation; one fan, a 20 x 8 foot Clifford Capell, is held in reserve in case of emergency.

There is no provision made to saturate the dust. Permissible explosives are used exclusively to blast the coal.

and reported for the night shift, and also that shelter holes were not

And found that this mine was not properly examined by the fire bosses and reported for the night shift, and also that shelter holes were not provided at all places required by the mine law. Upon my request the proper examinations are made and they are making the necessary shelter holes.

A slight mine fire occurred in this mine during the month of July at the junction of fifteen entries, causing the sealing off of about seven miles of entries for about six weeks. The cause of the fire is unknown.

Open lights are used on pillar work, and I have recommended that safety lamps be used on that kind of work. I am informed by the superintendent that 250 Wolf lamps have been purchased for that purpose.

#### PITTSBURG COAL COMPANY

Arnold No. 1.—Drainage and ventilation in reasonably good condition. This mine receives about 20,000 cubic feet of air per minute from Arnold No. 2 mine. On pillar work safety lamps and permissible explosives are used. The dust is saturated by the water car system.

Arnold No. 2.—Drainage and ventilation in excellent condition. On pillar work locked safety lamps and permissible explosives are used. The dust is saturated by exhaust steam and the water car systems. All stoppings in this mine are made of brick.

Somers Nos. 2 and 4.—Drainage and ventilation in excellent condition. The greater portion of these mines is damp, and the dry portions are sprinkled with water by the water car system.

Little Squaw.—General condition fairly good. The mine is nearly exhausted. It is of a wet character and does not require a watering system to sprinkle the dust.

#### PEOPLES COAL COMPANY

Pike.—On my first inspection the ventilation was not in a satisfactory condition, and the sides of the entries in portions of the mine were obstructed by slate, etc. But on my last inspection I found the ventilation in excellent condition, and the system of distributing the air currents a good one, also the sides of the entries were cleaned, and all electric wires removed to the intake air currents. In all pillar and entry work locked safety lamps are used and permissible explosives are used exclusively in blasting the coal, and all shots are loaded and fired by shot firers.

The dust is saturated by water pipe system and accumulations of fine coal removed from the mine.

#### NAOMI COAL COMPANY

Naomi.—Ventilation in fair condition; drainage good. The dust is saturated by the water car system.

## DIAMOND COAL AND COKE COMPANY

Diamond.—Drainage and ventilation fairly good. Portions of the mine are wet, and the water car system is used to saturate the dust in the dry portions.

## SUNSHINE COAL AND COKE COMPANY

Cyrilla No. 1.—Ventilation fairly good. The drainage in the left side of the mine is defective. There seems to be a very poor discipline at this mine. There is no provision to take care of the dust; however, the mine is damp.

Cyrilla No. 2.—Ventilation fair; drainage good. It is connected with the old Umpire mine. No provision made to take care of the dust.

## ZUNDELL COAL COMPANY

Brown.—Ventilation good; drainage defective. On account of the wet character of this mine, no system is required to take care of dust.

## MT. HOPE COKE COMPANY

Mt. Hope.—Ventilation and drainage good. This is a new mine that began operation this year. No provision made to take care of the dust.

## HARRIS-SMITH COAL AND COKE COMPANY

Hill Top.—Ventilation and drainage defective. The dust does not require a system to saturate it on account of the wet condition of the mine.

## WILSON COAL COMPANY

Peacock.—Ventilation and drainage very bad. The mine is very nearly exhausted and will not come under the law in the future.

## ECHO COAL COMPANY

Echo.—Drainage and ventilation defective. The mine is nearly exhausted and will not come under the law in the future.

## JOHNSTON COAL COMPANY

Johnston.—Not in operation.

## WARNER AND LEONARD COAL COMPANY

Kinder.—A new slope mine located at West Brownsville Junction in Washington County. Not under the law. Coal was just reached and mined during the month of December. The connection with the air shaft has not yet been made.

## PATES COAL WORKS

Umpire.—Drainage and ventilation in excellent condition.

## PETER WAGNER

Somers No. 1.—This mine is leased from the Pittsburg Coal Company and is nearly exhausted. The drainage was defective. Ventilation was fairly good.

## IMPROVEMENTS

## MONONGAHELA RIVER CONSOLIDATED COAL AND COKE COMPANY

Crescent.—An eight-foot two-stage Stine fan has been installed. Twenty-six masonry stoppings and twenty-six brick overcasts have been built. A brick motor repair shop and a car repair shop have been built and equipped with machinery.

Knob.—Enlarged and cleaned up 1500 feet of the return airway, and built seven masonry stoppings.

Albany.—Built two incombustible overcasts.

Chamouni.—Built three masonry overcasts.

Alice.—Built eighteen masonry stoppings and three overcasts, and made an additional air course parallel to the main entry 3028 yards in length. Installed one Thompson-Ryan generator, 150 K. W. 500 volts. A Sirocco fan is being erected, capable of exhausting 200,000 cubic feet of air per minute; it is driven by a Westinghouse electric 200 H. P. motor.

Little Redstone.—Built thirty-three concrete stoppings and one overcast.

Apollo.—Built fifty masonry stoppings and seven overcasts. Have very recently made a new air shaft 90 feet in depth and 100 feet area, at the rear end of the workings, which will materially improve the ventilation.

Fayette City.—Built thirty-five masonry stoppings and four overcasts.

Tremont.—Built twenty masonry stoppings and two overcasts. A 25 x 8 foot Robinson fan is in course of erection.

## VESTA COAL COMPANY

Vesta No. 1.—A 6-foot Jeffrey fan has been installed.

Vesta No. 3.—A 6-foot Jeffrey centrifugal fan has been installed.

Vesta No. 4.—Installed one 6-foot Jeffrey centrifugal fan, and one pair of 42 x 60 inch haulage engines. Built forty stone stoppings and increased the sectional area of the main airways.

## PITTSBURG COAL COMPANY

Arnold No. 1.—Built twelve brick stoppings and one overcast.

Arnold No. 2.—Have made a new slope opening, 400 feet in length and 75 feet in area, has been made, and an 8-inch exhaust steam line has been put in the mine to assist in the saturation of the air currents in cold weather. Built eighteen brick stoppings and six overcasts.

Somers No. 2.—Built six masonry stoppings.

Somers No. 4.—Built six masonry stoppings.

## PEOPLES COAL COMPANY

Pike.—Built twelve brick stoppings and five overcasts. Removed all electric wires from the return to the intake air courses. Installed two gas-proof mining machines.

## NAOMI COAL COMPANY

Naomi.—Built twenty-four concrete stoppings. Changed electric wires from the return to the intake airways, and installed two gas-proof mining machines.

## DIAMOND COAL AND COKE COMPANY

Diamond.—Built fifteen concrete stoppings.

## PATES COAL WORKS

Umpire.—New operation in the old Umpire mine leased from the Monongahela River Consolidated Coal and Coke Company. The equipment is new.

## MT. HOPE COKE COMPANY

Mt. Hope.—A new mine equipped with a Lepley fan driven by an electric motor, one electric locomotive, modern tipple and 75 rectangular coke ovens.

## PROSECUTIONS FOR VIOLATIONS OF THE MINING LAWS

William Chalfant and William Young, Fayette City mine, were charged with unlocking their safety lamps inside the mine, in violation of the law. At a hearing in the Squire's office the case was dismissed on account of insufficient evidence.

Mike Wilson, superintendent and owner of the Peacock mine, was charged with failure to provide an anemometer for the Mine Foreman, and failure to countersign the Mine Foreman's record book.

Information was made at the same time against the Mine Foreman, William Muir, charging him with making false entries in the record book, and failure to measure the air currents as required by law. The court sentenced them to pay a fine of twenty-five dollars and costs.

David Edmonds and Frank Moody, drivers at the Little Redstone mine, were charged with traveling on the motor road against the orders of the Mine Foreman. The case was dismissed at the hearing on account of insufficient evidence.

Joseph Previs, a driver at the Little Redstone mine, was charged with using impure oil. He paid a fine of five dollars and costs.

James Miller, a machine runner at the Tremont mine, was charged with using impure oil. He entered a plea of guilty and sentence was suspended by his paying the costs.

John Brotski, Andrew Druste, Charles Cartwat and Andrew Zubie, miners at the Naomi mine, were charged with passing beyond a danger signal. At the trial, due to insufficient evidence, the verdict in each case was "not guilty, the defendants to pay the costs," which was about forty dollars.

John Dull, Sr., and Harry Furlong, were charged with removing a danger signal in the Fayette City mine. They entered a plea of guilty and sentence was suspended by their paying the costs.

William Shotton, a miner at the Fayette City mine, was charged with breaking a brattice. He entered a plea of guilty and sentence was suspended by his paying the costs.
